Uptalk The Phenomenon Of Rising Intonation

Martin Schweinberger, Patricia Ronan

Uptalk The Phenomenon Of Rising Intonation:

Uptalk Paul Warren, 2016-01-05 Uptalk is commonly used to refer to rising intonation at the end of declarative sentences or to put it more simply the tendency for people to make statements that sound like questions a phenomenon that has received wide exposure and commentary in the media How and where did it originate Who are the most frequent uptalkers How much does it vary according to the speaker's age gender and regional dialect Is it found in other languages as well as English These and other questions are the subject of this fascinating book The first comprehensive analysis of uptalk it examines its historical origins geographical spread and social influences Paul Warren also looks at the media's coverage of the phenomenon including the tension between the public's perception and the views of experts Uptalk will be welcomed by those working in linguistics as well as anyone interested in the way we talk today Stigmatized on Screen Lindsey Clouse, 2022-06-27

This book reveals how marginalized communities and women are underrepresented on our screens and too often depicted in stereotypical ways This is doubly true for marginalized speakers those who speak traditionally nonstandard dialects Lindsey Clouse examines the origins of linguistic prejudice and how our public schools perpetuate the myth of bad English By dissecting the 500 top grossing films of the last 20 years Clouse exposes how speakers of Black English Southern U S English Spanish influenced English and gendered speech patterns are represented underrepresented misrepresented and mocked Clouse analyzes hundreds of films and characters to reveal how filmmakers and audiences work together to reinforce negative beliefs about stigmatized dialects and the people who speak them and reveals how those beliefs stack up against decades of linguistic research She concludes by showing that these portrayals translate to real life linguistic discrimination and discusses the ways in which we can combat this often hidden prejudice Scholars of introductory sociolinguistics American dialect studies and media studies will find this book of particular interest *Intonational*

Morphology John C. Wakefield, 2020-04-09 This book discusses the morphological properties of intonation building on past research to support the long recognized relationship between the functions and meanings of discourse particles and the functions and meanings of intonation The morphological status of intonation has been debated for decades and this book provides evidence from the literature combined with new and compelling empirical evidence to show that specific intonational forms correspond to specific segmental discourse particles Based on the conclusion that intonation is in the lexicon it proposes syntactic positions for intonational meanings using a cartographic approach It also describes how intonation is represented in speakers' minds which has important implications for first and second language acquisition as well as for theories and approaches to artificial speech recognition and production This book is of interest to theoretical and applied linguists as well as to anyone whose research and interests relate in any way to intonation **The Oxford**

Socio-Pragmatic Variation in Ireland Martin Schweinberger, Patricia Ronan, 2024-07-22 Pragmatics represents the study of language use in socially grounded contexts and it is thus a central discipline in Linguistics Due to its focus on language use it has been referred to as a transdiscipline that interacts with a broad variety of disciplines that are concerned with social action and as

such pragmatics overlaps with many other linguistic and non linguistic disciplines Irish English is one of the earliest varieties of English to have attracted the interest of scholars working on pragmatic variation From a sociolinguistic and a pragmatics perspective it represents one of the best studied varieties of English and can thus be argued to offer important impulses to the study of variationist pragmatics in general Ulster Scots though in close contact with Irish English has received less attention Given this important position of Irish English in pragmatics research and the paucity of such research on Ulster Scots this volume explicitly focuses on socio pragmatics and deals with the way speakers in and around Ireland use language in a way so that it assists them in the construction of their social identities or helps them navigate socio cultural spaces

include sociolinguistics second language pedagogy and literature studies

The Oxford Handbook of Language and Prejudice Jane Setter, Sender Dovchin, Vijay A. Ramjattan, 2025-09-25 This volume explores and rearticulates the relationship between language and prejudice. Language plays an important role in the conceptualization, enactment, and defence of prejudice at both the individual and institutional level. Language and language users can also be the object of prejudice, and language itself can, with some conditions, be thought of as a solution to prejudice. The chapters in the volume examine how prejudice manifests itself, how it is perceived, and how it might be combatted. Parts I-III cover linguistic prejudices relating to gender and sexuality, ableism, and race and ethnicity, while Parts IV-VI explore social issues, politics, and religion, and educational perspectives. The final part looks at projects and initiatives to tackle linguistic prejudice in a range of contexts. While recent work in the field has tended to inadvertently construct knowledge according to normative and Northern epistemologies, this volume features contributions that also provide an understanding of linguistic prejudice from Global South perspectives.

Afrikaans Linguistics WAM Carstens, Nerina Bosman, 2024-10-03 Offering a contemporary exploration of the multifaceted landscape of Afrikaans linguistics, *Afrikaans Linguistics: Contemporary Perspectives* marks a seminal contribution to the field. This volume, for the first time, presents accessible insights into diverse linguistics subdisciplines, inviting international scholars to familiarise themselves with Afrikaans language studies. Throughout much of the late 19th and 20th centuries, Afrikaans scholars predominantly communicated in Afrikaans, resulting in a significant gap in the dissemination of knowledge about the language. The chapters in this book, written by prominent South Africans as well as international scholars working in the field of Afrikaans, serve as a pivotal bridge by providing essential historical context while also paying attention to the development of Afrikaans linguistics during the 20th century. The primary focus remains on illuminating 21st-century research trajectories, offering a comprehensive snapshot of contemporary scholarship in Afrikaans linguistics.

Modelling Paralanguage Using Systemic Functional Semiotics Thu Ngo, Susan Hood, J. R. Martin, Clare Painter, Bradley A. Smith, Michele Zappavigna, 2021-12-02 Winner of the ASFLA Australian Systemic Functional Linguistics Association M A K Halliday Prize 2023. This book is the first comprehensive account of body language as paralanguage, informed by Systemic Functional Semiotics (SFS). It brings together the collaborative work of internationally renowned academics and emerging scholars to offer a fresh linguistic perspective on gesture, body orientation, body movement, facial expression, and voice quality resources that support all spoken language. The authors create a framework for distinguishing non-semiotic behaviour from paralanguage and provide a comprehensive modelling of paralanguage in each of the three metafunctions of meaning: ideational, interpersonal, and textual. Illustrations of the application of this new model for multimodal discourse analysis draw on a range of contexts, from social media vlogs to animated children's narratives, to face-to-face teaching. *Modelling Paralanguage Using Systemic Functional Semiotics* offers an innovative way for dealing with culture-specific and context-specific paralanguage.
