Urban Theory And The Urban Experience Encountering The City:

Urban Theory and the Urban Experience Simon Parker, 2004 For the first time Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and theoretical perspectives on the city owe to one another Both students and urban scholars will appreciate the critical way in which classical and contemporary debates on the nature of the city are presented Extensive use is made throughout of documentary literary and cultural sources to bring the different theoretical perspectives to life Discussion points introduce and explain key concepts and intellectual histories in a jargon free manner End of chapter further readings have also been annotated to encourage additional study Urban Theory and the Urban Experience Simon Parker, 2015-04-24 Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and theoretical perspectives on the city owe one another From the foundations of modern urban theory in the work of Weber Simmel Benjamin and Lefebvre to the writings of contemporary urban theorists such as David Harvey and Manuel Castells and the Los Angeles school of urbanism Urban Theory and the Urban Experience traces the key developments in the idea of the city over more than a century Individual chapters explore investigative studies of the great metropolis from Charles Booth to the contemporary urban research of William J Wilson along with alternative approaches to the industrial city ranging from the Garden City Movement to the new urbanism The volume also considers the impact of new information and communication technologies and the growing trend towards disaggregated urban networks all of which raise important questions about viability and physical and social identity of the conventional townscape Urban Theory and the Urban Experience concludes with a rallying cry for a more holistic and integrated approach to the urban question in theory and in practice if the rich potent For the benefit of students and tutors frequent question points encourage exploration of key themes and annotated further readings provide follow up sources for the issues raised in each chapter The book will be of interest to students scholars practitioners and all those who wish to learn more about why the urban has become the dominant social economic and cultural form of the twenty first century **Cities, Politics & Power** Simon Parker, 2010-11-02 Traditionally the study of power in the city was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies Increasingly however attention has turned to the function of the city not only as a centre of urban governance but as a major economic social cultural and strategic force in its own right Cities Politics and Power combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power This book is divided into five sections with a short introduction outlining the argument and organisation of the text Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate oppress

and annihilate urban populations Part three critically examines the key collective actors and processes that compete for and organise political power within cities and how urban governance operates and interacts with lesser and greater scales of government and networks of power Part four then explores the ways in which the political is constituted by urban inhabitants and how social identity information and communication networks and the natural and built environment all comprise intersecting fields of urban power The conclusion calls for a broader theoretical and thematic approach to the study of urban politics This book makes extensive use of comparative and historical case studies providing broad coverage of politics and urban movements in both the Global North and the Global South with a particular focus on the UK USA Canada Latin America and China It is written in an accessible and lucid style and provides suggestions for further reading at the end each chapter

New York and Toronto Novels after Postmodernism Caroline Rosenthal, 2011 Cities are material and symbolic spaces through which nations define their cultural identities The great cities that have arisen on the North American continent have stimulated the imaginations of the United States and Canada in very different ways This first comparative study of North American urban fiction starts out by delineating the sociohistorical and literary contexts in which cities grew into diverging symbolic spaces in American and Canadian culture After an overview of recent developments in the cultural conception of urban space the book takes New York and Toronto fiction as exemplary for exploring representations of the urban after postmodernism It analyzes four twenty first century novels two set in New York Siri Hustvedt's *What I Loved* and Paule Marshall's *The Fisher King* and two set in Toronto Carol Shields's *Unless* and Dionne Brand's *What We All Long For* While these texts continue to echo the specific traditions of nation building and canon formation in the United States and Canada they also share certain features All of them investigate the affective crossroads of

the city while returning to a more realistic mode of representation Caroline Rosenthal is Professor of American Literature at the Friedrich Schiller University in Jena Germany *Urban Theory* John Rennie Short, 2017-08-24 This wide ranging and state of the art new edition reviews the classic contributions to understanding modern and post modern cities and is comprehensively updated to take account of the issues and concepts at stake in 21st century urban theory **Exploring the Spatiality of the City across Cultural Texts** Martin Kindermann, Rebekka Rohleder, 2020-10-19 Exploring the Spatiality of the City across Cultural Texts Narrating Spaces Reading Urbanity explores the narrative formations of urbanity from an interdisciplinary perspective Within the framework of the spatial turn contributors from disciplines ranging from geography and history to literary and media studies theorize narrative constructions of the city and cities and analyze relevant examples from a variety of discourses media and cities Subdivided into six sections the book explores the interactions of city and text as well as other media and the conflicting narratives that arise in these interactions Offering case studies that discuss specific aspects of the narrative construction of Berlin and London the text also considers narratives of urban discontinuity and their theoretical implications Ultimately this volume captures the narratological artistic material social and performative possibilities inherent in spatial representations of the city **Cities and Creativity from the Renaissance to the Present** Ilja Van Damme, Bert De Munck, Andrew Miles, 2017-09-18 This volume critically challenges the current creative city debate from a historical perspective In the last two decades urban studies has been engulfed by a creative city narrative in which concepts like the creative economy the creative class or creative industries proclaim the status of the city as the primary site of human creativity and innovation So far however nobody has challenged the core premise underlying this narrative asking why we automatically have to look at cities as being the agents of change and innovation What processes have been at work historically before the predominance of cities in nurturing creativity and innovation was established In order to tackle this question the editors of this volume have collected case studies ranging from Renaissance Firenze and sixteenth century Antwerp to early modern Naples Amsterdam Bologna Paris to industrializing Sheffield and nineteenth and twentieth century cities covering Scandinavian port towns Venice and London up to the French techno industrial city Grenoble Jointly these case studies show that a creative city is not an objective or ontological reality but rather a complex and heterogenic assemblage in which material infrastructural and spatial elements become historically entangled with power laden discourses narratives and imaginaries about the city and urban actor groups Macau 20 Years after the Handover Meng U Jeong, 2020-05-25 This book outlines the major social and political changes in the city of Macau during its first 20 years under the One Country Two Systems arrangement with Mainland China Despite the long standing image of Macau as Asia s Las Vegas it is a city that has changed a great deal since its return to China Equally despite this return it retains a unique social economic and political character distinct both from the Mainland of China and from its larger neighbour Hong Kong The chapters in this book examine the detail of this uniqueness from a range of perspectives including the gambling industry

police society relations media usage patterns and protest movements Analysing the state of affairs 20 years after the city's return to China they also attempt to anticipate its future trajectory This is a valuable guide for scholars of Asian and particularly Chinese urban politics that will be of interest to academics and students looking to better understand the particularities of Macau

Reinventing Los Angeles Robert Gottlieb, 2007-10-12 Describes how water politics cars and freeways and immigration and globalization have shaped Los Angeles and how innovative social movements are working to make a more livable and sustainable city Los Angeles the place without a sense of place famous for sprawl and overdevelopment and defined by its car clogged freeways might seem inhospitable to ideas about connecting with nature and community But in Reinventing Los Angeles educator and activist Robert Gottlieb describes how imaginative and innovative social movements have coalesced around the issues of water development cars and freeways

and land use to create a more livable and sustainable city Gottlieb traces the emergence of Los Angeles as a global city in the twentieth century and describes its continuing evolution today He examines the powerful influences of immigration and economic globalization as they intersect with changes in the politics of water transportation and land use and illustrates each of these core concerns with an account of grass roots and activist responses efforts to reenvision the concrete bound fenced off Los Angeles River as a natural resource Arroyofest the closing of the Pasadena Freeway for a Sunday of walking and bike riding and immigrants initiatives to create urban gardens and connect with their countries of origin Reinventing Los Angeles is a unique blend of personal narrative Gottlieb himself participated in several of the grass roots actions described in the book and historical and theoretical discussion It provides a road map for a new environmentalism of everyday life demonstrating the opportunities for renewal in a global city *Imagining Global Amsterdam* Marco de Waard, 2012-01-01

Imagining Global Amsterdam gaat over het beeld van Amsterdam in film literatuur visuele kunst en in het moderne stedelijke discours in het bijzonder in de context van de mondialisering De essays gaan onder andere dieper in op Amsterdam als een lieu de mmoire van de vroeg moderne wereldhandel Wat betekent deze herinnering in de hedendaagse cultuur Waarom verwijzen zo veel contemporaine films en romans naar dit verleden terug Ook het inter nationale imago van Amsterdam als een multicultureel en ultra tolerant %x global village %x komt aan bod Waarom is dit beeld zo persistent en hoe heeft het zich in de loop van de laatste decennia ontwikkeld Tot slot wordt ingegaan op de vraag hoe mondialiseringsprocessen ingrijpen in de stadscultuur zoals in het prostitutiegebied op de Wallen en via de erfgoedindustrie Hoe manifesteert de mondialisering zich in de stad en welke rol speelt beeldvorming daarbij Deze bundel vormt een rijk geschakeerd onderzoek naar de relatie tussen Amsterdam mondialisering en stedelijke beeldvorming Marco de Waard is als docent literatuurwetenschap verbonden aan het Amsterdam University College *The New Blackwell Companion to The City* Gary Bridge, Sophie Watson, 2011-02-23 This book considers the state of the city and contemporary urbanisation from a range of intellectual and international perspectives The most interdisciplinary collection of its kind Provides a contemporary update on urban thinking that builds on well established debates in the field Uses the city to explore economic social cultural environmental and political issues more broadly Includes contributions from non Western perspectives and cities **The SAGE Handbook of the 21st Century City** Suzanne Hall, Ricky Burdett, 2017-10-16 The SAGE Handbook of the 21st Century City focuses on the dynamics and disruptions of the contemporary city in relation to capricious processes of global urbanisation mutation and resistance An international range of scholars engage with emerging urban conditions and inequalities in experimental ways speaking to new ideas of what constitutes the urban highlighting empirical explorations and expanding on contributions to policy and design The handbook is organised around nine key themes through which familiar analytic categories of race gender and class as well as binaries such as the urban rural are readdressed These thematic sections together capture the volatile processes and intricacies of urbanisation that reveal the turbulent nature of

our early twenty first century Hierarchy Elites and Evictions Productivity Over investment and Abandonment Authority Governance and Mobilisations Volatility Disruption and Adaptation Conflict Vulnerability and Insurgency Provisionality Infrastructure and Incrementalism Mobility Re bordering and De bordering Civility Contestation and Encounter Design Speculation and Imagination This is a provocative inter disciplinary handbook for all academics and researchers interested in contemporary urban studies Politics of Urbanism Warren Magnusson,2013-07-03 To see like a city rather than seeing like a state is the key to understanding modern politics In this book Magnusson draws from theorists such as Weber Wirth Hayek Jacobs Sennett and Foucault to articulate some of the ideas that we need to make sense of the city as a form of political order Locally and globally the city exists by virtue of complicated patterns of government and self government prompted by proximate diversity A multiplicity of authorities in different registers is typical Sovereignty although often claimed is infinitely deferred What emerges by virtue of self organization is not susceptible to control by any central authority and so we are impelled to engage politically in a world that does not match our expectations of sovereignty How then are we to engage realistically and creatively We have to begin from where we are if we are to understand the possibilities Building on traditions of political and urban theory in order to advance a new interpretation of the role of cities urbanism in contemporary political life this work will be of great interest to scholars of political theory and urban theory international relations theory and international relations **How Cities Matter** Richard Harris,2021-08-12 Most historians and social scientists treat cities as mere settings In fact urban places shape our experience There daily life has a faster artificial rhythm and for good and ill people and agencies affect each other through externalities uncompensated effects whose impact is inherently geographical In economic terms urban concentration enables efficiency and promotes innovation while raising the costs of land housing and labour Socially it can alienate or provide anonymity while fostering new forms of community It creates congestion and pollution posing challenges for governance Some effects extend beyond urban borders creating cultural change The character of cities varies by country and world region but it has generic qualities a claim best tested by comparing places that are most different These qualities intertwine creating built environments that endure To fully comprehend such path dependency we need to develop a synthetic vision that is historically and geographically informed
