The Vision Revolution The Vision Revolution:

The Vision Revolution Mark Changizi, 2009-06-02 In *The Vision Revolution* How the Latest Research Overturns Everything We Thought We Knew About Human Vision Mark Changizi prominent neuroscientist and vision expert addresses four areas of human vision and provides explanations for why we have those particular abilities complete with a number of full color illustrations to demonstrate his conclusions and to engage the reader Written for both the casual reader and the science buff hungry for new information *The Vision Revolution* is a resource that dispels commonly believed perceptions about sight and offers answers drawn from the field's most recent research Changizi focuses on four why questions 1 Why do we see in color 2 Why do our eyes face forward 3 Why do we see illusions 4 Why does reading come so naturally to us

Why Do We See in Color It was commonly believed that color vision evolved to help our primitive ancestors identify ripe fruit Changizi says we should look closer to home ourselves Human color vision evolved to give us greater insights into the mental states and health of other people People who can see color changes in skin have an advantage over their color blind counterparts they can see when people are blushing with embarrassment purple faced with exertion or the reddening of rashes Changizi's research reveals that the cones in our eyes that allow us to see color are exquisitely designed exactly for seeing color changes in the skin And it's no coincidence that the primates with color vision are the ones with bare spots on their faces and other body parts Changizi shows that the development of color vision in higher primates closely parallels the loss of facial hair culminating in the near hairlessness and highly developed color vision of humans

Why Do Our Eyes Face Forward Forward facing eyes set us apart from most mammals and there is much dispute as to why we have them While some speculate that we evolved this feature to give us depth perception available through stereo vision this type of vision only allows us to see short distances and we already have other mechanisms that help us to estimate distance Changizi's research shows that with two forward facing eyes primates and humans have an x-ray ability Specifically we're able to see through the cluttered leaves of the forest environment in which we evolved This feature helps primates see their targets in a crowded encroached environment To see how this works hold a finger in front of your eyes You'll find that you're able to look through it at what is beyond your finger One of the most amazing feats of two forward facing eyes Our views aren't blocked by our noses beaks etc

Why Do We See Illusions We evolved to see moving objects not where they are but where they are going to be Without this ability we couldn't catch a ball because the brain's ability to process visual information isn't fast enough to allow us to put our hands in the right place to intersect for a rapidly approaching baseball If our brains simply created a perception of the way the world was at the time light hit the eye then by the time that perception was elicited which takes about a tenth of a second for the brain to do time would have marched on and the perception would be of the recent past Changizi explains Simply put illusions occur when our brain is tricked into thinking that a stationary two dimensional picture has an element that is moving Our brains project the moving element into the future and as a result we

don't see what's on the page but what our brain thinks will be the case a fraction of a second into the future Why Does Reading Come So Naturally to Us We can read faster than we can hear which is odd considering that reading is relatively recent *The Myth of the Nation and the Vision of Revolution* Jacob Leib Talmon, Jacob Laib Talmon, Ya'akov Leyb Talmon, 1981-01-01 **The Vision Thing** Thomas Singer, 2014-01-14 Contemporary politics goes on at a mythic level This is the provocative argument put forward in this unique book which results from the collaboration of practising politicians organisational and political consultants scholars of mythology and culture and Jungian analysts from several countries The first part of the book focuses on leadership and vision and features a reflection on myth and leadership by former U S Senator Bill Bradley The second part deals with the way the theme of the one and the many works itself out in politics today From the perspective of the many there are chapters on factionalism ethnic strife genocide and multiculturalism From the perspective of the one there are chapters on the economic myth and gender politics showing how these bring coherence to today's confused political scene culminating in the suggestion that the modern political psyche is itself in the midst of a rite of passage The relevance of the book to the practice and study of politics mainstream and marginal cannot be overemphasised and the book will provide stimulating reading for practitioners and students in these areas as well as for those engaged in psychological work such as therapy counselling or analysis **The Vision Of The Anointed** Thomas Sowell, 2019-07-23 One of America's pre eminent economists offers a provocative critique of the failures of liberalism In *The Vision of the Anointed* Thomas Sowell presents a devastating critique of the mind set behind the failed social policies of the past thirty years Sowell sees what has happened during that time not as a series of isolated mistakes but as a logical consequence of a tainted vision whose defects have led to crises in education crime and family dynamics and to other social pathologies In this book he describes how elites the anointed have replaced facts and rational thinking with rhetorical assertions thereby altering the course of our social policy Competition Science Vision, 2006-05 Competition Science Vision monthly magazine is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India Well qualified professionals of Physics Chemistry Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to the point study material for aspiring candidates The magazine covers General Knowledge Science and Technology news Interviews of toppers of examinations study material of Physics Chemistry Zoology and Botany with model papers reasoning test questions facts quiz contest general awareness and mental ability test in every monthly issue *The vision of judgment ...
