The Value Of The Humanities:

The Value of the Humanities Helen Small, 2013-10-04 The Value of the Humanities provides a critical account of the principal arguments used to defend the value of the Humanities The claims considered are that the Humanities study the meaning making practices of culture and bring to their work a distinctive understanding of what constitutes knowledge and understanding that though useful to society in many ways they remain laudably at odds with or at a remove from instrumental use value that they contribute to human happiness that they are a force for democracy and that they are a good in themselves to be valued for their own sake Engaging closely with contemporary literary and philosophical work in the field from the UK and US Helen Small distinguishes between arguments that retain strong Victorian roots Mill on happiness Arnold on use value and those that have developed or been substantially altered since Unlike many works in this field The Value of the Humanities is not a polemic or a manifesto Its purpose is to explore the grounds for each argument and to test its validity for the present day Tough minded alert to changing historical conditions for argument and changing styles of rhetoric it promises to sharpen the terms of the public debate

The Value of the Humanities in Higher Education

Evelyn Tsz Yan Chan, Flora Ka Yu Mak, Thomas Siu Ho Yau, Yutong Hu, Michael O'Sullivan, Eddie Tay, 2020-08-12 This book presents an extensive analysis of the multifaceted benefits that higher education in the humanities offers individuals and society as explored in the context of Hong Kong Using both quantitative graduate employment survey data and qualitative data from interviews with past humanities graduates and with leading humanities scholars the study provides an objective picture of the value of humanities degrees in relation to the economic needs and growth of Hong Kong together with an in depth exploration of their value and use in the eyes of humanities graduates and practitioners Therefore although it is hardly the only book on the value and status quo of the humanities worldwide it nonetheless stands out in this crowded field as one of the very few extended studies that draws on empirical data The book will appeal to both an academic and a wider audience including members of the general public non academic educators and government administrators interested in the status quo of humanities education whether in Hong Kong or elsewhere The report also includes a wealth of text taken directly from interviews with humanities graduates who share their compelling life stories and views on the value of their humanities education

The Value of the Humanities, 2018 Humanities education and research has been a critical foundation of our society for centuries Disciplines such as history literature and philosophy have shaped institutions and policy debates and attracted generations of students seeking to understand more about how societies function and change However changing frameworks for understanding social value and the expansion of tertiary education disciplines over time have affected perceptions of the importance of the Humanities This report articulates the value of the Humanities to students thinking about their education and career options and to businesses faced with hiring

choices Our research builds on a rich and diverse literature through econometric analysis of HILDA and AES data analysis of graduate outcomes and employer satisfaction surveys and consultations with global businesses public sector agencies and researchers in Humanities disciplines Executive summary ed The Value of the Humanities Lynne V. Entrepreneurship and Digital Humanities Francesca Spigarelli,Louise Kempton,Lorenzo Compagnucci,2024-11-08 Addressing the growing need for integration between STEM and the social sciences and humanities this book reinterprets the role of entrepreneurship education It explores how universities can adapt to the rapid change and challenges of the job market brought by digital and green transitions *The Public Value of the Humanities* Jonathan Bate,2011 Recession is a time for asking fundamental questions about value At a time when governments are being forced to make swingeing savings in public expenditure why should they continue to invest public money funding research into ancient Greek tragedy literary value philosophical conundrums or the aesthetics of design Does such research deliver value for money and public benefit Such questions have become especially pertinent in the UK in recent years in the context of the drive by government to instrumentalize research across the disciplines and the prominence of discussions about **Major Decisions** Laurie Grobman,E. Michele Ramsey,2020-03-13 A practical how to guide for students and a powerful reminder of the value of a humanities education In recent decades the humanities have struggled to justify themselves in the American university The costs of attending a four year college have exploded resulting in intense pressure on students to major in STEM science technology engineering and mathematics business and other pre professional or practical majors that supposedly transmit more marketable skills than can be acquired from the humanities But as Laurie Grobman and E Michele Ramsey argue this vision of humanities majors idly pondering the meaning of life for four years is inaccurate Major Decisions demonstrates how choosing a major in the humanities is a worthwhile investment in a global economy that is shifting in the direction of college graduates who think broadly critically and ethically Indeed the core skills and knowledge imparted by an education in the humanities including facility with written and verbal communication collaboration problem solving technological literacy ethics leadership and an understanding of the human impacts of globalization are immensely useful to employers across a variety of sectors Major Decisions serves as a deeply informative guide to students and parents and provides a powerful reminder to employers and university administrators of the true value of an education in the humanities *Value and the Humanities* Zoe Hope Bulaitis,2020-09-18 Tracing the shift from liberal to neoliberal education from the nineteenth century to the present day this open access book provides a rich and previously underdeveloped narrative of value in higher education in England Value and the Humanities draws upon historical financial and critical debates concerning educational and cultural policy Rather than writing a singular defence of the humanities against economic rationalism Zoe Hope Bulaitis constructs a nuanced map of the intersections of value in the humanities encompassing an exploration of policy engagement scientific discourses fictional representation and the humanities in public life The book articulates a kaleidoscopic range of

humanities practices which demonstrate that although recent policy encourages higher education to be entirely motivated by outcomes fiscal targets and the acquisition of employability skills the humanities continue to inspire and aspire beyond these limits This book is a historically grounded and theoretically informed analysis of the value of the humanities within the context of the market Restating the Value of the Humanities Jane Conroy,Margaret Kelleher,2014 **Journal of**

Jean Baudrillard and Radical Education Theory Kip Kline,Kristopher Holland,2020-11-16 In Jean Baudrillard and Radical Education Theory Turning Right to Go Left the authors argue that Baudrillard has been underappreciated in philosophical and theoretical work in education They introduce him here as an important figure in radical thought who has something to add to theoretical lines of inquiry in education The book does not offer an introduction to Baudrillard Rather his corpus is mined in order to describe how it functions as a counter to the code of education rational thought critical reason etc In effect they establish that Baudrillard advocates for a counter path to thinking that can shake us out of our ready made thoughts and realize the radical potential for change Pedagogically Speaking Felix Emmanuel Schelling,1929
