balance power and liberty the framers established a structure that would allow future generations to continually readjust the scale Bodenhamer explores this dynamic through seven major constitutional themes federalism balance of powers property representation equality rights and security With each he takes a historical approach following their changes over time For example the framers wrote multiple protections for property rights into the Constitution in response to actions by state governments after the Revolution But twentieth century courts and Congress redefined property rights through measures such as zoning and the designation of historical landmarks diminishing their commercial value in response to the needs of a modern economy The framers anticipated just such a future reworking of their own compromises between liberty and power With up to the minute legal expertise and a broad grasp of the social and political context this book is a tour de force of Constitutional history and analysis
