The Visible Human Project Informatic Bodies And Posthuman Medicine:

The Visible Human Project Catherine Waldby, 2003-09-02 The Visible Human Project is a critical investigation of the spectacular three dimensional recordings of real human bodies dissected photographed and converted into visual data files made by the US National Library of Medicine in Baltimore Catherine Waldby uses new ideas from cultural studies science studies and social studies of the computer to situate the Visible Human Project in its historical and cultural context and to consider the meanings such an object has within a computerised culture In this fascinating and important book Catherine Waldby explores how advances in medical technologies have changed the way we view and study the human body and places the VHP within the history of technologies such as the X ray and CT scan which allow us to view the human interior Bringing together medical conceptions of the human body with theories of visual culture from Foucault to Donna Haraway Waldby links the VHP to a range of other biomedical projects such as the Human Genome Project and cloning which approach living bodies as data sources She argues that the VHP is an example of the increasingly blurred distinction between living and dead human bodies as the bodies it uses are digitally preserved as a resource for living bodies and considers how computer based biotechnologies affect both medical and non medical meanings of the body s life and death its location and its limits *The Visible Human Project* Cathy Waldby, 2000 The Visible Human Project is a critical investigation of the spectacular three dimensional recordings of real human bodies dissected photographed and converted into visual data files made by the US National Library of Medicine in Baltimore Catherine Waldby uses new ideas from cultural studies science studies and social studies of the computer to situate the Visible Human Project in its historical and cultural context and to consider the meanings such an object has within a computerised culture In this fascinating and important book Catherine Waldby explores how advances

Perishability Fatigue Vincent Bruyere, 2018-09-25 The Svalbard Global Seed Vault project is an arctic archive designed

to preserve the world's agricultural biodiversity. What do it and other novel forms of storage tell us about our relationship to the future in a time of resource depletion and extinction scenarios. In this innovative book Vincent Bruyere offers an invitation to look at the present we live in through a fresh lens: the difference between storage and burial in the age of sustainability science. Perishability Fatigue considers questions of permanence and the potentiality of retrieval, noting the tensions within our collective sense of time and finitude. Bruyere reflects on the nature and significance of perishability, asking what it means to have one's sense of temporality engendered by seed banks and frozen embryo storage, genetically modified organisms and the de-extinction of species, nuclear waste repositories, oncology and palliative care. He draws attention to the scripts and scenarios that mediate our relations to loss and decay, preservation and conservation, emphasizing the inequalities implicit in technologies of perishability which promise continuity in the future to some while refusing it to others. A highly interdisciplinary study, Perishability Fatigue reframes the environmental humanities and humanistic inquiry into sustainability science by developing a new language to commemorate fatigue and transience in a culture of preparedness and survival.

Encyclopedia of Death and Dying Glennys Howarth, Oliver Leaman, 2003-12-16. In recent years there has been a massive upsurge in academic, professional and lay interest in mortality. This is reflected in academic and professional literature, in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying. Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns. There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field. This Encyclopedia answers that need. The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date. The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts, social sciences, humanities, medicine and the sciences. In addition to scholars and students in the field, from anthropologists and sociologists to art and social historians, the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying, dead and bereaved people. It will be welcomed as the definitive death and dying reference source and an essential tool for teaching, research and independent study.

The Inner History of Devices Sherry Turkle, 2008. Memoir, clinical writings and ethnography inform new perspectives on the experience of technology. Personal stories illuminate how technology enters the inner life.

Roman Bodies Andrew Hopkins, Maria Wyke, British School at Rome, 2005. This collection of seventeen essays explores the dramatic changes in Western conceptions of the body encompassing the cultural shifts that occurred across Empire, religion and science from antiquity to the eighteenth century.

Cyberfeminism. Next Protocols Claudia Reiche, Verena Kuni, 2004. Cyberfeminism Next Protocols invents and documents with approaches coming from art theory and activism a cyberfeminism which is dedicated to the wilderness of precise critique and experimental thinking. It opens with the

following questions What are the everyday embodied conditions of women s lives as they are being altered by the new technologies and communications networks What are new forms of oppression and of liberation Has the digital medium starting with the indecisiveness of the Turing test and in its latest form when calculation tasks have become autonomous data processing taken the place of the subject Can you tell Where do you or the machine end From this starting point develops a multifaceted very complex critique and analysis of the many intersections of power gender and technology in the digital age
