Shrubs for Gardens, Agroforestry, and Permaculture Martin Crawford, 2020-07-08 A range of useful shrubs for different niches sites and functions in gardens and on homesteads and farms World renowned expert Martin Crawford covers common fruit bushes like currants and gooseberries and includes many other less known shrubs with edible fruits nuts leaves or other parts He takes us on a journey into the world of exotic spice trees shrubs with medicinal parts and plants that fix nitrogen to help fertilise other plants All these can be grown in temperate climates diversifying our diets enabling us to design beautiful productive gardens as well as showing us how we can integrate agroforestry into our smallholdings and farms to create new income streams Despite increasingly urgent calls from scientists the not fit for purpose economic and political systems we live in cannot be relied upon to implement the carbon emission reductions needed This is where we come into it whether we are

farmer gardener or plant dabbler by planting shrubby plants that sequester carbon we can minimise our carbon footprint and ideally live a carbon negative life On a broadscale perennial and woody species are the way forward to reduce carbon emissions in agriculture Woody crops sequester carbon in their biomass but can also be grown in systems that allow for sequestration of large amounts of carbon into the soil Silvohorticulture Andy Dibben, Ben Raskin, 2025-01-16 Dibben and Raskin offer an insightful inspiring but also exceptionally practical guide to integrating trees into annual cropping systems in this book we see how the phrase the sky is the limit has never been more applicable Jesse Frost author of The Living Soil Handbook An invaluable handbook for farmers growers and gardeners Silvohorticulture is the first book to offer a detailed practical guide on how to effectively integrate trees with vegetable growing offering information previously known only in the foresting world Drawing on the decades long experiences of Ben Raskin and Andy Dibben both of whom have designed and managed agroforestry systems and have extensive experience in commercial horticultural crop production this is the definitive book on the interaction between trees and crops covering the benefits of trees for edible crops and the potential for additional crops from trees plus crucial new information on how to fit trees into complex crop rotations as well as manipulating access to light Ben and Andy also reveal the latest research on how tree roots behave and importantly how that impacts your crops Agroforestry can bring immense benefits to farmers and growers not just optimizing yield but also improving soil managing pests and water increasing biodiversity and reducing costs System design must be customised to each grower's requirements and Silvohorticulture offers step by step detail that will allow you to manage your trees and crops successfully In this immensely practical guide the authors provide the technical details towards integrating trees with vegetables and other crops all while dispelling any preconceived notions that this idea reduces productivity or function In fact these systems might prove essential for farm resilience in a changing climate Steve Gabriel author of Silvopasture

The Home-Scale Forest Garden Danida Friedman-Baker, 2022-05-20 Learn how to create an edible forest garden perfect for gardeners and growers at any scale Includes over 100 cold hardy berry bushes fruit and nut trees perennial vegetables herbs edible flowers mushrooms and more When market gardener Dani Baker attended a permaculture workshop at her local Cooperative Extension office in upstate New York she was inspired by its message of working with nature to create a thriving edible garden ecosystem She immediately launched a new experiment she dubbed the Enchanted Edible Forest In The Home Scale Forest Garden Baker shares what she learned as she became a forest gardener providing a practical in depth guide to creating a beautiful bountiful edible landscape at any scale from a few dozen square feet to an acre or more Baker provides information on planning planting and maintaining a resilient forest garden ecosystem including Using permaculture principles Observing and mapping your space Building planting beds including helgkultur mounds Coping with saturated soil Matching perennial edible plants to the right growing conditions Grouping plants in diverse layers that attract and shelter beneficial insects and birds Creating microclimates to increase the range of plants you can grow
