Trends and Applications in Constructive Approximation Detlef H. Mache, József Szabados, Marcel G. de Bruin, 2006-03-30 This volume contains contributions from international experts in the fields of constructive approximation. This area has reached out to encompass the computational and approximation theoretical aspects of various interesting fields in applied mathematics. Mathematical Reviews, 2005. *New Trends in Shape Modelling and Approximation Methods* Driss Sbibi, Sara Remogna, Abdelhafid Serghini, 2024-10-01 This book presents recent research results from a selection of the talks presented in the international symposium New Trends in Approximation and Applications held at Oujda Morocco in June 2022. The various chapters describe developments in approximation and its different applications including approximation methods in Numerical Analysis, curves and surfaces in CAGD, interpolation and smoothing, shape modelling and computational topology, subdivision schemes and applications, wavelets and multiresolution methods. The book is addressed to researchers in all of these areas as well as in general mathematical modelling.

Trends in Approximation Theory Kirill Kopotun, Tom Lyche, Marian Neamtu, 2001 Contains a carefully edited selection of papers that were presented at the Symposium on Trends in Approximation Theory held in May 2000 and at the Oslo Conference on Mathematical Methods for Curves and Surfaces held in July 2000. Mathematical Methods for Curves and Surfaces covers topics from abstract approximation to wavelets.

Recent Trends in Numerical Analysis D. Trigiante, 2000 The contributions for this volume dedicated to honour the 65th birthday of Professor I. Galligani have been numerous and cover a wide range of topics of the current Numerical Analysis and of its applications. New Trends in Applied Harmonic Analysis Akram Aldroubi, Carlos Cabrelli, Stephane Jaffard, Ursula Molter, 2016-04-21 This volume is a selection of written notes corresponding to courses taught at the CIMPA School New Trends in Applied Harmonic Analysis. Sparse Representations, Compressed Sensing and Multifractal Analysis. New interactions between harmonic analysis and signal and image processing have seen striking development in the last 10 years and several technological deadlocks have been solved through the resolution of deep theoretical problems in harmonic analysis. New Trends in Applied Harmonic Analysis focuses on two particularly active areas that are representative of such advances: multifractal analysis and sparse representation and compressed sensing. The contributions are written by leaders in these areas and cover both theoretical aspects and applications. This work should prove useful not only to PhD students and postdocs in mathematics and signal and image processing but also to researchers working in related topics.

Current Trends in Mathematical Analysis and Its Interdisciplinary Applications Hemen Dutta, Ljubiša D. R. Kočinac, Hari M. Srivastava, 2019-08-23 This book explores several important aspects of recent developments in the interdisciplinary applications of mathematical analysis (MA) and highlights how MA is now being employed in many areas of scientific research. Each of the 23 carefully reviewed chapters was written by experienced experts in respective fields and will enrich readers' understanding of the respective research problems, providing them with sufficient

background to understand the theories methods and applications discussed The book s main goal is to highlight the latest trends and advances equipping interested readers to pursue further research of their own Given its scope the book will especially benefit graduate and PhD students researchers in the applied sciences educators and engineers with an interest in recent developments in the interdisciplinary applications of mathematical analysis *Modern Trends in Hypercomplex*

Analysis Swanhild Bernstein,Uwe Kähler,Irene Sabadini,Franciscus Sommen,2016-11-21 This book contains a selection of papers presented at the session Quaternionic and Clifford Analysis at the 10th ISAAC Congress held in Macau in August 2015 The covered topics represent the state of the art as well as new trends in hypercomplex analysis and its applications **New**

Intuitive Geometry Gergely Ambrus,Imre Bárány,Károly J. Böröczky,Gábor Fejes Tóth,János Pach,2018-11-03 This volume contains 17 surveys that cover many recent developments in Discrete Geometry and related fields Besides presenting the state of the art of classical research subjects like packing and covering it also offers an introduction to new topological algebraic and computational methods in this very active research field The readers will find a variety of modern topics and many fascinating open problems that may serve as starting points for research **Trends and Changes in Hydroclimatic**

Variables Ramesh Teegavarapu,2018-09-14 Trends and Changes in Hydroclimatic Variables Links to Climate Variability and Change discusses the change detection and trend analysis methods used to assess hydroclimatic variables in a changing climate Changes and trends in hydroclimatic variables are assessed using state of the art methods such as non linear trend estimation including spline smoothing and local regression and handling persistence or serial auto correlation in data for assessing trends in different hydroclimatic variables e g pre whitening methods This book offers a variety of real life case studies and problem solving techniques for a field that is rapidly evolving Users will find methods to evaluate points where time series characteristics change and non homogeneity in time series In addition it covers the subject of climate variability and change in an immense level of detail including changes on precipitation streamflow and sea levels Examines statistical methods for trend analysis providing an excellent reference book for scholars scientists students and professionals Offers an

exhaustive treatment of several hydroclimatic variables in one book providing readers with a comprehensive understanding of changes in hydroclimatic variables over time and space Presents case studies dealing with changes in hydroclimatic variables in different geographical regions of the world Focuses on climate variability and change including an extensive assessment of trends and their associated links to climate variability and change New Trends in Hopf Algebra Theory Nicolás Andruskiewitsch, Walter Ricardo Ferrer Santos, Hans-Jürgen Schneider, 2000 This volume presents the proceedings from the Colloquium on Quantum Groups and Hopf Algebras held in Cordoba Argentina in 1999 The meeting brought together researchers who discussed recent developments in Hopf algebras one of the most important being the influence of quantum groups Articles offer introductory expositions and surveys on topics of current interest that to date have not been available in the current literature Surveys are included on characteristics of Hopf algebras and their generalizations biFrobenius algebras braided Hopf algebras inner actions and Galois theory face algebras and infinitesimal Hopf algebras The following topics are also covered existence of integrals classification of semisimple and pointed Hopf algebras Hopf algebras dendriform algebras etc Non classical topics are also included reflecting its applications both inside and outside the theory **Scientiae Mathematicae Japonicae** ,2009 **Rundbrief der Gesellschaft für Angewandte Mathematik und Mechanik** Gesellschaft für Angewandte Mathematik und Mechanik, 2002 **Numerical Analysis and Applied Mathematics** Theodore E.
