The Child's Theory of Mind Henry M. Wellman, 1990 Do children have a theory of mind If they do at what age is it acquired What is the content of the theory and how does it differ from that of adults The Child's Theory of Mind integrates the diverse strands of this rapidly expanding field of study It charts children's knowledge about a fundamental topic the mind and characterizes that developing knowledge as a coherent commonsense theory strongly advancing the understanding of everyday theories as well as the commonsense theory of mind Wellman presents evidence that children as young as age three do possess a commonsense theory of mind that they grasp the distinction between mental constructs and physical entities and that they have an understanding of the relationship between individuals mental states and their overt actions He delves in detail into questions about the nature of adults commonsense theories of mind and about the nature of commonsense theories Wellman then examines the content of the three year old's theory of mind the nature of children's notions of mind before age three the changes in the theory during subsequent development from ages three to six and the young child's conception of mind in comparison with those of older children and adults Henry M Wellman is a Professor in the Department of Psychology and the Center for Human Growth and Development at the University of Michigan at Ann Arbor

Six Theories of Mind Charles William Morris, 1932

Neural Theories of Mind William R. Uttal, 2020-07-24 In this fascinating book William R Uttal raises the possibility that however much we learn about the anatomy and physiology of the brain and psychology we may never be able to cross the final bridge explaining how the mind is produced by the brain Three main classes of mind brain theory are considered and rejected field theories because they are based on a superficial analogy single cell theories because they emerge from a massive uncontrolled experimental program and neural net theories because they are constrained by combinatorial complexity To support his argument Uttal explores the empirical and conceptual foundations of these theoretical approaches and identifies flaws in their fundamental logic The author concludes that the problems preventing solution of the mind brain problem are intractable yet well within the confines of natural science

Children's Theories of Mind Douglas Frye, Chris Moore, 1991

This book is a result of a study group that met to discuss the child's theory of mind. A topic whose effects span cognitive language and social development it may bring a unifying influence to developmental psychology. New studies in this area acknowledge children's conceptions of intention and belief as well as intention and belief themselves and consider the explanations they provide for children's developing abilities. The contributors to this important volume examine several aspects of the child's theory of mind and present significant research findings on the theory itself and how it changes and develops for each child. Discussions of the utility of a theory of mind to the child and to developmental psychologists trying to understand children are provided. Finally new explanations are offered for how children acquire a theory of mind in the first place.

Theories of the Mind Stephen Priest, 1991. Many of the world's leading thinkers have been haunted by the same great philosophical puzzle: What is the exact relationship between the body and the mind? In lucid prose Priest walks readers through the main schools of philosophical thought from Plato and Descartes to the dualists, double aspect theorists and phenomenologists and offers a compelling new solution.

Causal Theories of Mind Steven Davis, 1983. No detailed description available for Causal Theories of Mind.

Dual-Process Theories of the Social Mind Jeffrey W. Sherman, Bertram Gawronski, Yaacov Trope, 2014-05-01. This volume provides an authoritative synthesis of a dynamic influential area of psychological research. Leading investigators address all aspects of dual process theories: their core assumptions, conceptual foundations and applications to a wide range of social phenomena. In 38 chapters the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation, social perception, thinking and reasoning, self-regulation and the interplay of affect, cognition and motivation. Current empirical and methodological developments are described. Critiques of the duality approach are explored and important questions for future research identified.

Consciousness Andrea Eugenio Cavanna, Andrea Nani, 2014-09-30. This book reviews some of the most important scientific and philosophical theories concerning the nature of mind and consciousness. Current theories on the mind-body problem and the neural correlates of consciousness are presented through a series of biographical sketches of the most influential thinkers across the fields of philosophy of mind, psychology and neuroscience. The book is divided into two parts: the first is dedicated to philosophers of mind and the second to neuroscientists, experimental psychologists. Each part comprises twenty short chapters with each chapter being dedicated to one author. A brief introduction is given on his or her life and most important works and influences. The most influential theories developed by each author are then carefully explained and examined with the aim of scrutinizing the strengths and weaknesses of the different approaches to the nature of consciousness.

Creations of the Mind Eric Margolis, Stephen Laurence, 2007-06-14. *Creations of the Mind* presents sixteen original essays by theorists from a wide variety of disciplines who have a shared interest in the nature of artifacts and their implications for the human mind.
