NASA Technical Memorandum ,1981 **NASA SP.** ,1992 *Dynamics of Coupled Systems in High-Speed Railways* Weihua Zhang, 2025-10-01 Dynamics of Coupled Systems in High Speed Railways Theory and Practice presents the relationship between various coupled systems that can affect train operation including interaction between track and train the pantograph catenary system and train power supply system and train and airflow and train with respect to the structure and characteristics of high speed railway The overall simulation optimization and control are achieved based on an analysis of the dynamics generated by coupled systems in high speed trains with a theoretical framework for the dynamics presented in the book Presents the first book available on the dynamics of coupled systems in high speed trains Provides a systematic view of high speed vehicle dynamics covering the issues that are especially concerned for high speed operations such as high speed pantograph and catenary aerodynamic

characteristics and running stability of high speed trains Covers the optimization of dynamic performance the design of parameters the simulation of high speed train service processes and the identification of high speed train state and condition assessment Bluff Body Aerodynamics and Its Applications Manabu Ito,Masaru Matsumoto,Naruhito Shiraishi,1990 With the increasing slenderness and lightness of civil engineering structures such as tower blocks and bridges wind effects on them have been attracting considerable interest from researchers and design engineers Since most structures in civil engineering present bluff forms to the wind the main emphasis of this collection of papers is on bluff body aerodynamics The flow effects in this case in addition to turbulence effects in the atmospheric boundary layer illustrate the unique and complex nature of the problems that can be encountered in this field as opposed to the classical studies in the aeronautical field that influenced the initial development stages of industrial aerodynamics Selected papers from the colloquium are presented in this volume The papers offer a comprehensive presentation of the results of the studies made of wind effects on engineering structures The latest trends in the field are outlined and the results obtained in the solution of topical problems are described
