Transitions to Alternative Transportation Technologies National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Assessment of Resource Needs for Fuel Cell and Hydrogen Technologies, 2008-11-17 Hydrogen fuel cell vehicles HFCVs could alleviate the nation's dependence on oil and reduce U.S. emissions of carbon dioxide the major greenhouse gas Industry and government sponsored research programs have made very impressive technical progress over the past several years and several companies are currently introducing pre-commercial vehicles and hydrogen fueling stations in limited markets However to achieve wide hydrogen vehicle penetration further technological advances are required for commercial viability and vehicle manufacturer and hydrogen supplier activities must be coordinated In particular costs must be reduced new automotive manufacturing technologies commercialized and adequate supplies of hydrogen produced and made available to motorists These efforts will require considerable resources especially federal and private sector funding This book estimates the resources that will be needed to bring HFCVs to the point of competitive self-sustainability in the marketplace It also estimates the impact on oil consumption and carbon dioxide emissions as HFCVs become a large fraction of the light duty vehicle fleet **Proceedings of the 1996 U.S. DOE Hydrogen Program Review, May 1-2, 1996, Miami, Florida**, 1996 Advances in Battery Manufacturing, Service, and Management Systems Jingshan Li, Shiyu Zhou, Yehui Han, 2016-09-19 Addresses the methodology and theoretical foundation of battery manufacturing service and management systems BM2S2 and discusses the issues and challenges in these areas This book brings together experts in the field to highlight the cutting edge research advances in BM2S2 and to promote an innovative integrated research framework responding to the challenges There are three major parts included in this book manufacturing service and management The first part focuses on battery manufacturing systems including modeling analysis design and control as well as economic and risk analyses The second part focuses on information technology's impact on service systems such as data driven reliability modeling failure prognosis and service decision making methodologies for battery services The third part addresses battery management systems BMS for control and optimization of battery cells operations and hybrid storage systems to ensure overall performance and safety as well as EV management The contributors consist of experts from universities industry research centers and government agency In addition this book

Provides comprehensive overviews of lithium ion battery and battery electrical vehicle manufacturing as well as economic returns and government support Introduces integrated models for quality propagation and productivity improvement as well as indicators for bottleneck identification and mitigation in battery manufacturing Covers models and diagnosis algorithms for battery SOC and SOH estimation data driven prognosis algorithms for predicting the remaining useful life RUL of battery SOC and SOH Presents mathematical models and novel structure of battery equalizers in battery management systems BMS Reviews the state of the art of battery supercapacitor and battery supercapacitor hybrid energy storage systems HESSs for advanced electric vehicle applications Advances in Battery Manufacturing Services and Management Systems is written for researchers and engineers working on battery manufacturing service operations logistics and management It can also serve as a reference for senior undergraduate and graduate students interested in BM2S2

The Hydrogen Energy Transition

Daniel Sperling, James S. Cannon, 2004-06-14 The Hydrogen Energy Transition addresses the key issues and actions that need to be taken to achieve a changeover to hydrogen power as it relates to vehicles and transportation and explores whether such a transition is likely or even possible Government agencies and leaders in industry recognize the need to utilize hydrogen as an energy source in order to provide cleaner more efficient and more reliable energy for the world's economies This book analyzes this need and presents the most up to date government industry and academic information analyzing the use of hydrogen energy as an alternative fuel With contributions from policy makers and researchers in the government corporate academic and public interest sectors The Hydrogen Energy Transition brings together the viewpoints of professionals involved in all aspects of the hydrogen concerned community The text addresses key questions regarding the feasibility of transition to hydrogen fuel as a means of satisfying the world's rapidly growing energy needs The initiatives set forth in this text will mold the research development and education efforts for hydrogen that will assist in the rapidly growing transportation needs for automobiles and other vehicles Presentations by the world's leaders in government industry and academia Real world solutions for the world's current fuel crisis Endorsed by the University of California Transportation Center and Transportation Research Board
