Needy Media Stephen Monteiro, 2025-09-16 What makes our portable networked personal media devices smartphones, tablets, smartwatches so irresistible? Reacting to our touch, voice, or gaze, seizing and keeping our attention with sounds, vibrations, and screen prompts, these objects construct an animated intimacy that builds trust and emotional dependence. Needy Media explores how features such as face recognition, awareness sensors, and touchscreens have developed and intersected, tying them to key concepts of psychology, language, and the body. Surveying products and practices across a half century, Stephen Monteiro argues that the appeal is as much about how media devices behave as it is about the information they convey. Monteiro traces a symbiotic overreliance, a neediness between users and devices fostered by personalized aspects of digital materiality. The physical and emotional bonds that emerge, he argues, not only cast our devices as loyal companions adaptable to our needs and idiosyncrasies, they also facilitate the corporate harvesting of massive amounts of personal data in the name of making technology more friendly, intuitive, and individualized. Raising important questions about privacy and power, Needy Media seeks answers in the complex and sensitive relationship between interface and body, a coupling that makes the networked object both an essential psychological presence and a lingering concern for our sense of self.

A User's Guide to the N-line Model Norman W. Scheffner, Julie Dean Rosati, 1987 This user's manual provides the necessary guidance, complete with multiple example applications, which include model input and output for using the N-line numerical model. Capabilities of the model include the simulation of a single or multiple shore perpendicular structures, b) single or multiple detached offshore breakwaters, and c) disposal of material or dredging of material in the coastal zone. Model parameters are discussed in order to guide the potential user to a successful application of the model. The N-line model is versatile, easy to use, and capable of producing dependable results when used for appropriate applications. The documentation in this manual covers only the breakwater subroutine. Since conceptual modifications were not made to the original model, the original documentation presented in CERC's report MR 83-10 should be obtained by any potential user of the model. The N-line model is useful in showing qualitative trends for a complex case such as Lakeview Park, Lorain, Ohio. Some of the drawbacks of the program when modeling Lakeview Park, such as the inability to reach an equilibrium shoreline,

and the low sinuosity of the shoreline when influenced by breakwater segments could possibly be successfully modeled by modifying the different input parameters such as the ADEAN parameter and or initial shoreline location and or the model code Perhaps then a quantitative verification if the model could be made However in this case the model would have then been tailored to produce a previously known result Last Instructions Nir Hezroni,2018-05-22 The sequel to Three Envelopes the critically acclaimed groundbreaking Mossad thriller by Nir Hezroni Three Envelopes was hailed as a superior thriller debut with a high level of suspense and a heart stopping conclusion Publishers Weekly starred review guaranteed to absorb and alarm its readers in equal measure Shots Mag Now in Last Instructions author Nir Hezroni continues former Israeli secret service operative Agent 10483 s story using the same unique immersive narrative style Agent 10483 a psychopathic former Israeli spy is busy trying to shut down the spy organization he once worked for and plotting his revenge against the key individuals who he deems responsible for the Organization s betrayal against him Now he s traveling the world in a quest to find a hidden nuclear warhead to use against them Everyone wants to get their hands on Agent 10483 the two teams from the Organization twin assassins who are working in the service of Herr Schmidt an intelligence organization unto himself who also wants the warhead and Carmit a sub contractor for the Organization who performed transformations on him to manipulate his behavior during the course of his assassination missions abroad Offering a fascinating behind the scenes glimpse into the technology of high level intelligence operations Nir Hezroni s dark thriller is a chilling exploration of the mind of a master killer **The Summary of Engineering Research** University of Illinois at Urbana-Champaign.
