When Protest Makes Policy Laurel Weldon, 2022-10-20 Do social movements lead to more inclusive democracy or to a more polarized fragmented elite dominated polity [A Modern Guide to Globalization](#) Barrie Axford, Richard Huggins, 2025-10-07 This Modern Guide provides invaluable insights from leading scholars into the burgeoning field of global studies At a time of heated debate regarding the future of humanity and the resilience of earth system processes it examines the strengths and weaknesses of global scholarship as a tool for understanding the human condition

[Women and Democracy in Iraq](#) Huda Al-Tamimi, 2019-05-30 As the post invasion reconstruction of Iraq has unfolded the potential for Iraqi women to participate actively and visibly in the country's political structure has been one of its most notable results The 2005 Constitution required that no less than 25% of seats in the Iraqi Parliament be filled by women Yet despite subsequent parliamentary statistics suggesting great strides for female political participation there has been a resounding silence on the wider implications of this quota for women in Iraqi political life This book is the first full length study of women's political representation in Iraq Based on interviews with politicians and substantial media analysis Huda Al Tamimi outlines the political sectarian and cultural constraints facing female Members of Parliament and the ways in which individual women and women's organizations are actively challenging barriers to their political influence The book is a vital contribution to discussions concerning the success and limitations of gender quotas in the Middle East It also offers new and critical perspectives on the evolution of Iraqi politics a subject that remains of high priority for a region and international community interested in the nation's reconstruction

Representation Maria C. Escobar-Lemmon, Michelle M. Taylor-Robinson, 2014-05-14 While there is a vast literature on women's political interests there is hardly any consensus about what constitutes women's interests or how scholars should approach studying them Representation can occur in various venues or by various actors but due to power imbalances across political groups it is not always realized in any substantive way The essays in this book constitute a broad and geographically comparative move toward defining new and unified theoretical orientations to studying representation among women Representation involves not only getting group members into government but also articulating group interests and translating those interests into policy Because competing groups have different policy preferences and act out of self interest representation of historically marginalized groups is a contentious contingent process that is likely to ebb and flow The book begins with a theoretical positioning of the meaning of women's interests issues and preferences It considers the need to add nuance to how we conceive of and study intersectionality and the dangers of stretching the meaning of substantive representation It then looks at descriptive representation in political parties high courts and legislatures as well as how definitions of interest affect who represents women in legislatures and social movements The book concludes by suggesting testable propositions and avenues

for future research to enhance understanding about representation of women and of other historically under represented groups Chapters include cases from the United States Latin America Western Europe and Africa Unequal America Anthony DiMaggio,2020-12-09 This book examines Americans and their beliefs about the class divide in the United States It argues that Americans beliefs about class and the economic divide develop through a multistep process Economic affluence influences the development of worldview measured in terms of ideology partisanship and self identified class consciousness Class consciousness in turn affects how people look at political and economic issues This book is intended for scholars and students at every level who study inequality from a political economic or sociological position along with general readers with a growing interest in and awareness of the effects of inequality on our democracy especially in the wake of the Covid 19 pandemic the resulting economic contraction and the protests over racial injustice erupting throughout the world in 2020
