York Piping Guide:

Piping and Pipelines Assessment Guide Keith Escoe, 2006-04-10 Whether it's called fixed equipment at ExxonMobil stationary equipment at Shell or static equipment in Europe this type of equipment is the bread and butter of any process plant. Used in the petrochemical industry pharmaceutical industry food processing industry paper industry and the manufacturing process industries stationary equipment must be kept operational and reliable for companies to maintain production and for employees to be safe from accidents. This series the most comprehensive of its kind uses real life examples and time tested rules of thumb to guide the mechanical engineer through issues of reliability and fitness for service. This volume on piping and pipeline assessment is the only handbook that the mechanical or pipeline engineer needs to assess pipes and pipelines for reliability and fitness for service. Provides essential insight to make informed decisions on when to run alter repair monitor or replace equipment. How to perform these type of assessments and calculations on pipelines is a hot issue in the petrochemical industry at this time. There is very little information on the market right now for pipers and pipeliners with regard to pipe and pipeline fitness for service.

Ice and Refrigeration, 1922 **Guidelines for Engineering Design for Process Safety** CCPS (Center for Chemical Process Safety), 2012-04-10 This updated version of one of the most popular and widely used CCPS books provides plant design engineers facility operators and safety professionals with key information on selected topics of interest.
