Fairness in the World Economy Americo Beviglia Zampetti, 2006
In an international context fairness is particularly important since only a system which is perceived by its participants as fair can command acceptance and compliance The main focus of this study is to investigate the development of the notion of fairness in US trade policy and law as well as the impact this notion has on international trade discussions and rule making and especially on the formation of the multilateral trade regime The contention of the author Americo Beviglia Zampetti is that fairness concerns which have been present in the US trade policy debates and treaty practice since the Republic's inception have contributed to shaping these debates and practice over the years both at home and abroad These concerns were finally thrust upon the international scene through inclusion in the multilateral trade regime after World War II As such the book forms part of the broader debate over the costs and benefits of globalization The methodological approach chosen is that of an intellectual history which seeks to understand the origin of a particular idea trace its trajectory within the international trade policy discourse and evaluate its impact on policy and regime formation Fairness in the World Economy will be a fascinating and insightful read for academics students researchers and policymakers with an interest in international trade issues as well as international affairs relations and economics

Globalisation and International Trade Liberalisation Martin Richardson, 2000 While integration in the modern world economy is quite different to its counterpart in the last century, national borders are still extremely significant as trade barriers and the international discussion of globalisation is paramount. This volume centres on two broad themes: the desirability or otherwise of globalisation and the practical mechanics of and prospects for increased multinational international trade liberalisation. Progress on competition policy issues are discussed along with the future of financial institutions, national policies, the scope of possible future expansion of the World Trade Organisation (WTO) and its dispute settlement mechanism in light of recent trans-Atlantic disputes. With a diversity of opinions from contributors prominent in fields ranging from business and academia through to Non-Governmental Organisations (NGOs) such as the WTO and the British Commonwealth, this is a fascinating look at globalisation and trade. Both foreign policy and economics academics will find this book invaluable along with policymakers and NGOs.

Global Trade and India's Evolving Role in the World Economy DR. ANAND KUMAR PANDEY, Global trade which has been the foundation of both economic development and international cooperation has had a significant impact on nations and sectors all over the world. As a consequence of the increasing global connection, trade has gone beyond the basic exchange of goods and services to encompass investment, human capital and technology. This expansion went beyond the traditional definition of trade. India has improved its position in global trade and emerged as a significant player in this dynamic environment. This is due to the country's diverse economy, vast workforce and intelligent policies. The historical commercial routes of India, the economic reforms that have been implemented and the country's participation in multilateral treaties have all contributed to the country's standing in international commerce. For centuries, India has been at the vanguard of world innovation, moving its emphasis from textiles and spices to pharmaceuticals, renewable energy and information technology. In ancient times, India was primarily concerned with textiles and spices. India's economy was liberalised in 1991, which welcomed foreign investments and increased India's presence in worldwide markets. This was a momentous occasion that marked the beginning of a paradigm shift. The objective of this study is to investigate the shifting dynamics of international business with a particular emphasis on India, with the goal of conducting an analysis of the country's accomplishments, challenges and possible remedies. The findings of this study offer insight on India's export-import patterns, economic ambitions and trade strategies, which enables the country to better position itself in the global economy.
