The World Atlas of Language Structures Online, 2008 A large database of structural phonological grammatical lexical properties of languages gathered from descriptive materials such as reference grammars by a team of more than 40 authors Includes 141 maps with accompanying texts on diverse features such as vowel inventory size noun genitive order passive constructions and hand arm polysemy Each map shows between 120 and 1370 languages each language being represented by a symbol and different symbols showing different values of the feature Altogether 2 650 languages are shown

on the maps A Typology of Verbal Borrowings Jan Wohlgemuth, 2009-07-14 The questions as to why most languages appear to have more trouble borrowing verbs than nouns and as to the possible mechanisms and paths by which verbs can be borrowed or the obstacles for verb borrowing have been a topic of interest since the late 19th century However no truly substantial typological research had been undertaken in this field before the present study The present work is the first in depth cross linguistic study on loan verbs and the morphological syntactic and sociolinguistic aspects of loan verb accommodation It applies current methodologies on database management quantitative analysis and typological conventions and it is based on a broad global sample of data from over 400 languages and the typological data from the World Atlas of Language Structures WALS One major result of the present study is the falsification on empirical grounds of long standing claims that verbs generally are more difficult to borrow than other parts of speech or that verbs could never be borrowed as verbs and always needed a re verbalization in the borrowing language Word Order Jae Jung Song, 2012-03-29 Word order is one of the major properties on which languages are compared and its study is fundamental to linguistics This comprehensive survey provides an up to date critical overview of this widely debated topic exploring and evaluating word order research carried out in four major theoretical frameworks linguistic typology generative grammar optimality theory and processing based theories It is the first book to bring these theoretical approaches together in one place and is therefore a one stop resource covering the current developments in word order research It explains word order patterns in different languages and at different structural levels and critically evaluates and where possible compares the theoretical assumptions and word order principles used in the different approaches Also highlighted are issues and problems that require further investigation or remain unresolved This book will be invaluable to those investigating word order and researchers and students in syntax linguistic theory and typology The Expression of Negation Laurence R. Horn, 2010 Negation is at the core of human language without negation there can be no denial contradiction irony or lies This book examines the form and function of negative sentences in a variety of languages and offers state of the art surveys of the acquisition of negation by children its processing by adults its historical development and its interaction with other operators and predicates within natural language sentences Topics covered include the nature of negative polarity the phenomenon of pleonastic or illogical negation and the role of morphological syntactic semantic pragmatic Language Typology and Syntactic Description: Volume 2, Complex Constructions Timothy Shopen, 2007-10-04 This unique three volume 2007 survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world's languages Clearly organized and broad ranging it covers topics such as parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect mood and diexis The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages Each volume is accessibly written and clearly explains each new concept introduced Although the volumes can be read independently together they provide an

indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations Most of the chapters in the second edition are substantially revised or completely new some on topics not covered by the first edition Volume II covers co ordination complementation noun phrase structure relative clauses adverbial clauses discourse structure and sentences as combinations of clauses *Austronesian Undressed* David Gil,Antoinette Schapper,2020-10-15 Many Austronesian languages exhibit isolating word structure This volume offers a series of investigations into these languages which are found in an isolating crescent extending from Mainland Southeast Asia through the Indonesian archipelago and into western New Guinea Some of the languages examined in this volume include Cham Minangkabau colloquial Malay Indonesian and Javanese Lio Alorese and Tetun Dili The main purpose of this volume is to address the general question of how and why languages become isolating by examination of a number of competing hypotheses While some view morphological loss as a natural process others argue that the development of isolating word structure is typically driven by language contact through various mechanisms such as creolization metatypy and Sprachbund effects This volume should be of interest not only to Austronesianists and historians of Insular Southeast Asia but also to grammarians typologists historical linguists creolists and specialists in language contact **The Oxford Guide to the Malayo-Polynesian Languages of Southeast Asia** Alexander Adelaar,Antoinette Schapper,2024-06-27 This volume presents the most wide ranging treatment available today of the Malayo Polynesian languages of Southeast Asia and their outliers It offers a comprehensive account of the historical relations and typological diversity in the group including current debates in their prehistories and descriptive priorities for future study **Languages of Mainland Southeast Asia** N.J. Enfield,Bernard Comrie,2015-03-30 The studies in this book represent the rich diverse and substantial research being conducted today in the linguistics of Mainland Southeast Asia The chapters cover a broad scope Several studies address questions of language relatedness often challenging conventional assumptions about the status of language contact as an explanatory factor in accounting for linguistic similarities Several address the question of Mainland Southeast Asia as a linguistic area exploring new ways to imagine and define the boundaries and indeed the boundedness of a Mainland Southeast Asia area Two contributions rethink the received notion of the sesquisyllable with new empirical and theoretical angles And a set of chapters explores topics in the morphology and syntax of the region s languages sometimes challenging orthodox assumptions and claims about what a typical language of Mainland Southeast Asia is like Written by leading researchers in the field and with a substantial overview of current knowledge and new directions by the volume editors N J Enfield and Bernard Comrie this book will serve as an authoritative source on where the linguistics of Mainland Southeast Asia is at and where it is heading **Sign Language Research Sixty Years Later: Current and Future Perspectives** Valentina Cuccio,Erin Wilkinson,Brigitte Garcia,Adam Schembri,Erin Moriarty,Sabina Fontana,2022-11-14 **The Oxford Handbook of Polysynthesis** Michael Fortescue,Marianne Mithun,Nicholas Evans,2017-09-28 This handbook offers an extensive crosslinguistic and cross

theoretical survey of polysynthetic languages in which single multi morpheme verb forms can express what would be whole sentences in English These languages and the problems they raise for linguistic analyses have long featured prominently in language descriptions and yet the essence of polysynthesis remains under discussion right down to whether it delineates a distinct coherent type rather than an assortment of frequently co occurring traits Chapters in the first part of the handbook relate polysynthesis to other issues central to linguistics such as complexity the definition of the word the nature of the lexicon idiomaticity and to typological features such as argument structure and head marking Part two contains areal studies of those geographical regions of the world where polysynthesis is particularly common such as the Arctic and Sub Arctic and northern Australia The third part examines diachronic topics such as language contact and language obsolence while part four looks at acquisition issues in different polysynthetic languages Finally part five contains detailed grammatical descriptions of over twenty languages which have been characterized as polysynthetic with special attention given to the presence or absence of potentially criterial features

Creole Languages and Linguistic Typology Parth Bhatt, Tonjes Veenstra, 2013-12-15 It is generally assumed that Creole languages form a separate category from the rest of the world's languages The papers in this volume written by internationally renowned scholars in the field of Creole studies seek to explore more deeply this commonly held assumption by comparing the linguistic properties of specific Creole languages to each other and also to non Creole languages Using a variety of methodological and analytical approaches the contributions to this volume show that the linguistic classification of Creole languages continues to be a topic of intense debate that requires the re examination of the premises of linguistic typology What is the linguistic motivation for considering that languages are related or unrelated How and why do common linguistic properties arise Are Creoles indeed exceptional This volume examines these questions and provides a strong foundation for continued research into the phonological morphological syntactic and semantic features found in Creole languages Most of these articles were previously published in the Journal of Pidgin and Creole Languages 26 1 2011 The article by Jeff Good was previously published in the Journal of Pidgin and Creole Languages 27 1 2012
