Instincts Dominic D. P. Johnson,2022-08-30 A very timely book Anne Marie Slaughter CEO of New America How cognitive biases can guide good decision making in politics and international relations A widespread assumption in political science and international relations is that cognitive biases quirks of the brain we all share as human beings are detrimental and responsible for policy failures disasters and wars In Strategic Instincts Dominic Johnson challenges this assumption explaining that these nonrational behaviors can actually support favorable results in international politics and contribute to political and strategic success By studying past examples he considers the ways that cognitive biases act as strategic instincts lending a competitive edge in policy decisions especially under conditions of unpredictability and imperfect information Drawing from evolutionary theory and behavioral sciences Johnson looks at three influential cognitive biases overconfidence the fundamental attribution error and in group out group bias He then examines the advantageous as well as the detrimental effects of these biases through historical case studies of the American Revolution the Munich Crisis and the Pacific campaign in World War II He acknowledges the dark side of biases when confidence becomes hubris when attribution errors become paranoia and when group bias becomes prejudice Ultimately Johnson makes a case for a more nuanced understanding of the causes and consequences of cognitive biases and argues that in the complex world of international relations strategic instincts can in the right context guide better performance Strategic Instincts shows how an evolutionary perspective can offer the crucial next step in bringing psychological insights to bear on foundational questions in international politics
