McAnally, Susan Rose, Stephen Patrick Quigley, 2007 This book was written specifically for professors and college students in teacher training programs for deaf education and for classroom teachers working with deaf and hard of hearing learners It is one of the very few books on the market that focuses entirely on the hearing impaired It consists of three sections each one providing in depth information on topics critical to the teaching of reading to this specific population Section one Foundations contains chapters dealing with theory and research in such topics as cognition reading language literary development vocabulary and comprehension One chapter on ASL English and Reading looks at the research in the area of second language learners and discusses its application to deaf and hard of hearing students Section two Instructional Management deals with instructional management and describes instructional systems and designs These chapters look at current trends in education and how these trends apply to the education of students who are deaf and hard of hearing Section three Applications focuses on specific instructional models in reading writing and spelling detailing strategies that have been successfully used with deaf and hard of hearing learners The last chapter in this section discusses assessment giving information and examples of both formal and authentic procedures **Current Index to Journals in Education** ,1996 **Teaching the Struggling Reader** Barbara R. Schirmer, 2010 An innovative resource for literacy teachers Teaching the Struggling Reader takes a novel approach to instruction the reading program is based on the needs of the struggling reader rather than the other way around Most teachers plan their reading lesson and then work in the needs of a struggling reader This book is for teachers looking for a more contemporary and inclusive way to teach reading Starting with assessment the author shows you how to group readers by ability and need rather than by risk factors Finally you will save planning time by learning how to incorporate strategies that you already know into developing your lesson rather than changing your style to accommodate the requirements of a particular reading program *Journal of Developmental Education* ,1994 Creating Reading Instruction for All Children Thomas G. Gunning, 1996 This book will not tell you how to teach reading Teaching reading is in large measure a matter of making choices Should you use basal readers or children s books or both Should you teach children to read whole words or to sound out words letter by letter or both Should you have three reading groups or four or no groups There are no right answers to these questions The answers depend on your personal philosophy your interpretation of the research the level at which you are teaching the kinds of students you are teaching community preferences and the nature of your school or school district s reading program Scott Foresman Reading ,2004 School Library Journal ,1998 **Classroom Based Assessment** Bonnie Campbell Hill, Cynthia Ruptic, Lisa Norwick, 1998 Strategies for Teaching Writing from the Pennsylvania Writing Project Mary Lou Kuhns, Robert H.
