The Year Without Summer Tracing A D 536 And Its Aftermath:

The Years Without Summer Joel Gunn, 2000 Tree rings worldwide and other evidence record an almost catastrophic change in the environment during the middle years of the 6th century AD *Surviving Sudden Environmental Change* Jago Cooper, Payson Sheets, 2012-02-01 Archaeologists have long encountered evidence of natural disasters through excavation and stratigraphy In *Surviving Sudden Environmental Change* case studies examine how eight different past human communities ranging from Arctic to equatorial regions from tropical rainforests to desert interiors and from deep prehistory to living memory faced and coped with such dangers Many disasters originate from a force of nature such as an earthquake cyclone tsunami volcanic eruption drought or flood But that is only half of the story decisions of people and their particular cultural lifeways are the rest Sociocultural factors are essential in understanding risk impact resilience reactions and recoveries from massive sudden environmental changes By using deep time perspectives provided by interdisciplinary approaches this book provides a rich temporal background to the human experience of environmental hazards and disasters In addition each chapter is followed by an abstract summarizing the important implications for today's management practices and providing recommendations for policy makers Publication supported in part by the National Science Foundation *The Way the Wind Blows* Roderick J. McIntosh, Joseph A. Tainter, Susan Keech McIntosh, 2012-07-24 Robert W Harms Yale University *Perilous Planet Earth* Trevor Palmer, 2003-06-12 A readable account of the history of natural disasters throughout history *Archaeology of Eastern North America*, 2001 *The Restoration of Borobudur* Unesco, 2005 This publication traces the history and restoration of Chandi Borobudur a Buddhist temple built over 1 000 years ago on the island of Java Indonesia which was successfully restored during 1973 1983 and listed as a World Heritage Site in 1991 It covers the various aspects of the process including the long and painstaking task of logging the position of the stones the studies that revealed the underlying sources of decay and the important archaeological finds that provided clues to the temple's spiritual past and includes many of the original drawings and photographs taken from the restoration project archives *A History of the Ancient Southwest* Stephen H. Lekson, 2009 According to archaeologist Stephen H Lekson much of what we think we know about the Southwest has been compressed into conventions and classifications and orthodoxies This book challenges and reconfigures these accepted notions by telling two parallel stories one about the development personalities and institutions of Southwestern archaeology and the other about interpretations of what actually happened in the ancient past While many works would have us believe that nothing much ever happened in the ancient Southwest this book argues that the region experienced rises and falls kings and commoners war and peace triumphs and failures In this view Chaco Canyon was a geopolitical reaction to the Colonial Period Hohokam expansion and the Hohokam Classic Period was the product of refugee Chacoan nobles chased off the Colorado Plateau by angry farmers Far to the south Casas Grandes was a failed attempt to create a Mesoamerican state and modern Pueblo people with societies so different from those at Chaco and Casas

Grandes deliberately rejected these monumental hierarchical episodes of their past From the publisher The second printing of A History of the Ancient Southwest has corrected the errors noted below SAR Press regrets an error on Page 72 paragraph 4 also Page 275 note 2 regarding absolute dates 50 000 dates was incorrectly published as half a million dates Also P 125 lines 13 14 Between 21 000 and 27 000 people lived there should read Between 2 100 and 2 700 people lived there

Coinage in the Northumbrian Landscape and Economy, C.575-c.867 Tony Abramson,2018 This book presents the author's digitization of Pirie's corpus of 9th century Northumbrian stycas This database enhanced by data from elsewhere is compared by location with the artefactual database known as VASLE created at the University of York 2008 to demonstrate that the co occurrence of coins and portable artefacts defines monetary evolution in Northumbria Additionally the author presents a new periodization and reveals the previously disparaged gold shillings of York to have been issued by Bishop Paulinus a disruptive finding chronologically with wider consequences Northumbria benefited increasingly both monetarily and fiscally as the face value of coins fell Other conclusions include the idea that Northumbrian coin production was erratic that the Yorkshire Wolds were more highly monetized than the surrounding lowlands indicating a more enterprising culture that styca hoards represent episcopal expropriations and that there were significant changes in settlement and economy in the central lowlands This work demonstrates that monetization reflected northern independence innovation and enterprise Back cover page 4 of cover

The Recurring Dark Ages Sing C. Chew,2007 In this modern era of global environmental crisis Sing Chew provides a convincing analysis of the recurring human and environmental crises identified as Dark Ages In this his second of a three volume series concerning world ecological degradation Chew reviews the past 5 000 year history of structural conditions and processes that define the relationship between nature and culture Chew's message about the coming Dark Ages as human communities continue to reorganize to meet the contingencies of ecological scarcity and climate changes is a must read for those concerned with human interactions and environmental changes including environmental anthropologists and historians world historians geographers archaeologists and environmental scientists

Environmental Change and Human Adaptation in the Ancient American Southwest David Elmond Doyel,Jeffrey S. Dean,2006 This volume contains a varied and instructive set of studies of human behavioral adaptation to environmental change in the ancient Southwest making significant contributions to southwestern prehistory settlement pattern studies agriculture behavioral ecology paleo environmental reconstruction and statistical and computer aided modeling

The Periphery in the Center Robert J. Rowland,2001 A good overview of the archaeology and history of Sardinia from the earliest inhabitation on the island through the prehistoric period to the Romans late Roman medieval and late medieval periods

Trend, Tradition, and Turmoil David Hurst Thomas,Matthew C. Sanger,David G. Anderson,2010 The late Archaic of the American Southeast is typically described as a time of population growth innovative developments in

subsistence strategies and increased social complexity Although it is difficult to generalize many early Woodland communities are characterized as relatively small scale fairly mobile foragers organized into unranked or minimally ranked lineages and clans Early Woodland groups also seem to be more socially isolated than their late Archaic predecessors with a decline in regional exchange networks The papers in this volume were presented at a conference entitled What Happened in the Late Archaic which was co sponsored by the American Museum of Natural History and the St Catherines Island Foundation and held on St Catherines Island Georgia May 9 11 2008 The Third Caldwell Conference invited the participants to engage the appropriate archaeological data from the American Southeast specifically addressing the nature of change during the late Archaic early Woodland transition This volume consists of a dozen substantive papers followed by three discussant contributions

South-western Britain in the Early Middle Ages Susan M. Pearce, 2003 South Western Britain in the Early Middle Ages looks at the southwestern peninsula of Great Britain including the present counties of Cornwall Devon Dorset and Somerset during the late Roman and post Roman periods It considers the exploitation of lowland and upland landscapes and how the social organization this involved changed over time Ceremonial activity including burial and its relationship to Christian practice is discussed in detail The use of monastic foundation exchange connections with the Mediterranean and the development of centers of power are analyzed The book considers ideas of SBritishness and SGermanness and the way in which what became the West Saxon kingdom was created Above all it is concerned to stress the cultural similarities between South Western Britain and the wider Antique world as this gradually changed into the world of the early Middle Ages

Histoire et nature François Clément, 2011 Depuis la fin du XXe siècle une succession d'événements dramatiques a mis sur le devant de la scène les questions touchant au climat aux risques naturels et la santé ouragans et tempêtes inondations séismes tsunamis ruptures volcaniques pandémies zoonotiques L'attention qui leur est portée dans la société lance un défi la communauté scientifique dont on attend qu'elle clarifie l'opinion au moyen de données précises et fiables Si les travaux des climatologues des physiciens et des biologistes aident à comprendre les mécanismes qui sont l'œuvre dans le fonctionnement de la nature ils n'apportent des réponses qu'une partie des interrogations la dimension historique et sociale des phénomènes n'apparaît peine alors qu'elle devient primordiale quand il s'agit de raisonner hauteur d'homme Il revient donc aux chercheurs en sciences humaines notamment aux historiens de combler cette lacune car ils possèdent en propre l'expertise nécessaire pour exploiter les informations conservées dans la mémoire humaine et aussi pour appréhender l'impact réel des mouvements de la nature sur la

vie des individus et des sociétés Les auteurs des contributions rassemblés ici se sont appropriés des problématiques que leurs disciplines ont longtemps délaissées Ils l'ont fait dans le respect de leur propre diversité et des prérogatives des autres acteurs de la recherche Historiens géographes philologues spécialistes des mondes antiques et médiévaux travaillant entre Byzance et Cordoue et de la Cyrénaïque au V^e siècle ayant accès aux sources dans leur version originale ils sont réunis autour de la conviction que non seulement Nature et Histoire ont vu ensemble mais qu'une synoptique s'avère nécessaire et que cela concerne également leur horizon disciplinaire Histoire humaine et comparée du climat Emmanuel Le Roy Ladurie, 2004
