Theology Disability And The New Genetics Why Science Needs The Church:

Theology, Disability and the New Genetics John Swinton, Brian Brock, 2007-08-21 A unique text which focuses on the theory and practice of the church as it engages with the complex issues that are emerging in response to new genetic technology

God, Science, and Designer Genes Spencer S. Stober, Donna Yarri, 2009-10-13 A biologist and a Christian theologian examine the scientific and philosophical implications and potential impacts of genetic technologies God Science and Designer Genes An Exploration of Emerging Technologies provides a unique approach to the central ethical dilemma in contemporary science offering both an up to date account of the current state of genetic technologies and insightful discussions of the moral theological questions these technologies raise Coauthored by professors of biology and theology God Science and Designer Genes examines a range of from the headlines issues including the relationship between science and religion designing our children stem cell research cloning genetics and behavior genetics and privacy and using genetic technologies for social justice Who should benefit personally and financially from DNA technology Who might be harmed How do we protect individual rights and guard against discrimination How will embryo modification affect the identity of those so modified God Science and Designer Genes gives readers an eloquent thoughtful and objective foundation for considering these and other questions about the potential conflict between scientific achievement personal faith and social responsibility

The Social Contexts of Disability Ministry Albert A. Herzog Jr., 2017-09-29 This book provides pastors seminarians and interested laity with the background necessary to understand the need for disability ministry and the contexts out of which the church's ministry among people with disabilities must emerge This is true not only for descriptions of ministries over the past sixty years but also the challenges disability poses for biblical studies church history Christian theology and ethics Insights are gained not only from mainstream secular and religious sources but from evangelical and other conservative materials The blending of items from different religious resources reveals just how ubiquitous disability is and the need for disability ministry now and for many years into the future The book's format is such that either it can serve as a text for courses on disability ministry or individual chapters can be employed in various courses on selected topics in biblical studies history theology and ethics Pastors and lay leaders will enjoy the depth of coverage for each topic This is a book about a serious subject for serious readers Its materials are designed to inform stimulate and promote disability ministry as a topic worthy of serious study

In God's Image Peter A. Comensoli, 2018-04-24 In God's Image Recognizing the Profoundly Impaired as Persons is a bold Catholic argument in defense of the profoundly impaired While a range of theological voices can now be heard speaking up on behalf of those who live their lives at the extremes of the human condition few voices have been explicitly Catholic Comensoli draws on the irreplaceable contribution of St Thomas Aquinas to forge an engagement with one of the leading thinkers in the theology of the disabled Professor Hans Reinders While recognizing the crucial contribution that Reinders has made Comensoli situates our perception of the cognitively impaired

within the horizon of God's own image refusing a reduction of the substantialist position the Catholic tradition has always valued This is linked to the fresh and countercultural community life pioneered by Jean Vanier founder of the L'Arche communities For Comensoli the profoundly impaired are persons whose personhood cannot be recognized outside of the condition of their impairment and through which God's Image is perceived in all its paradoxical implications Stakeholders and Ethics in Healthcare Lisa A. Martinelli, 2022-03-20 This ground breaking book uses organizational ethics and stakeholder theory to explore the ethical accountability of leadership in healthcare organizations to their distinct vulnerable stakeholder communities The book begins with a discussion of the moral agency of healthcare organizations and introduces stakeholder theory It then looks at key ethical challenges in relation to the confidentiality and privacy of healthcare data before turning to child health and interventions around issues such as obesity maltreatment and parenting The book ends by focusing on ethics of care in relation to older people and people with disabilities An insightful contribution to thinking about ethics for contemporary healthcare management and leadership this interdisciplinary book is of interest to readers with a background in healthcare business and management law bioethics and theology *Nova acta Leopoldina*, 2010 Design and Destiny Ronald Cole-Turner, 2008 Table of Contents Design and Destiny Jewish and Christian Perspectives on Human Germline Modification by Cole Turner Ronald Editor Terms of Use Series Foreword p vii Acknowledgments p ix 1 Religion and the Question of Human Germline Modification Ronald Cole Turner p 1 2 Judaism and Germline Modification Elliot N Dorff p 29 3 The Roman Catholic Magisterium and Genetic Research An Overview and Evaluation Thomas A Shannon p 51 4 A Traditional Christian Reflection on Reengineering Human Nature H Tristram Engelhardt Jr p 73 5 Germline Gene Modification and the Human Condition before God Nigel M de S Cameron and Amy Michelle DeBaets p 93 6 Human Germline Therapy Proper Human Responsibility or Playing God James J Walter p 119 7 Germline Genetics Human Nature and Social Ethics Lisa Sowle Cahill p 145 8 Freedom Conscience and Virtue Theological Perspectives on the Ethics of Inherited Genetic Modification Celia Deane Drummond p 167 9 Religion Genetics and the Future Ronald Cole Turner p 201 Suggestions for Further Reading p 225 Contributors p 229 Index p 231 Descriptive content provided by Syndetics a Bowker service Summary Design and Destiny Jewish and Christian Perspectives on Human Germline Modification by Cole Turner Ronald Editor Terms of use We are approaching the day when advances in biotechnology will allow parents to design a baby with the traits they want The continuing debate over the possibilities of genetic engineering has been spirited but so far largely confined to the realms of bioethics and public policy Design and Destiny approaches the question in religious terms discussing human germline modification the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic

reasons although they offer certain moral conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism's traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter Ronald Cole Turner is H Parker Sharp Professor of Theology and Ethics at Pittsburgh Theological Seminary He is the author of *The New Genesis Theology and the Genetic Revolution* and the coauthor of *Pastoral Genetics Theology and Care at the Beginning of Life* Descriptive content provided by Syndetics a Bowker service *Book Review Index - 2009 Cumulation* Dana Ferguson, 2009-08 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year *Captive to Christ, Open to the World* Brian Brock, 2015-02-26 In this wide ranging and engaging collection of interviews Brian Brock discusses how Christian faith makes a difference for life in the modern world Beginning with a discussion of teaching Christian ethics in the contemporary academy Brock takes up environmental questions political and medical ethics the modern city and Christian responsibility to it energy use the information age agriculture political consensus and coercion and many other issues The reader is thus offered a broad and incisive discussion of many contemporary topics in a brief illuminating but never superficial manner The book's unusual conversational style allows strikingly clear creative and concrete theological connections to emerge in the spaces between moral questions rarely thought of as linked As the title suggests the running theme of the interviews is being bound to Christ and placed into the contemporary world Brock's theological readings of contemporary cultural trends are vigorous unapologetic and insightful and they offer delightful surprises as well as fertile new ways through the sterile impasses of many issues currently being debated in the public square This book provides an excellent starting point for those interested in fresh theological insights into contemporary ethical questions and an accessible introduction to Brock's previous works *Religion Index One*, 2000

Disability's Challenge to Theology Devan Stahl, 2022-08-15 *Disability's Challenge to Theology* uses insights from disability studies to understand in a deeper way the ethical implications that genetic technologies pose for Christian thought Theologians have been debating genetic engineering for decades but what has been missing from many theological debates is a deep concern for persons with genetic disabilities In this ambitious and stimulating book Devan Stahl argues that

engagement with metaphysics and a theology of nature is crucial for Christians to evaluate both genetic science and the moral use of genetic technologies such as human genetic engineering gene therapy genetic screenings preimplantation genetic diagnosis and gene editing Using theological notions of creation ex nihilo and natural law alongside insights from disability studies Stahl seeks to recast the debate concerning genetic well being Following the work of Stanley Hauerwas Stahl proposes the church as the locus for reimagining disability in a way that will significantly influence the debates concerning genetic therapies Christianity has all too frequently been complicit in excluding degrading and marginalizing people with disabilities but the new Christian metaphysics developed here provides normative theological guidance on the use of genetic technologies today Only by heeding the voices of people with disabilities can Christians remain faithful to the call to find Christ in the least of these and from there draw closer to God
