Feminism, Capitalism, and Critique Banu Bargu, Chiara Bottici, 2017-07-24. This edited collection examines the relationship between three central terms: capitalism, feminism, and critique, while critically celebrating the work and life of a thinker who has done the most to address this nexus: Nancy Fraser. In honor of her seventieth birthday and in the spirit of her work in the tradition of critical theory, this collection brings together scholars from different disciplines and theoretical approaches to address this conjunction and evaluate Fraser's lifelong contributions to theorizing it. Scholars from philosophy, political science, sociology, gender studies, race theory, and economics come together to think through the vicissitudes of capitalism and feminism while also responding to different elements of Nancy Fraser's work which weaves together a strong feminist standpoint with a vibrant and complex critique of capitalism. Going beyond conventional disciplinary distinctions and narrow debates, all the contributors to this project share a commitment to critically understanding the connection between capitalism, exploitation, and the viable roads for emancipation. They recover insights provided by classical traditions of political and social thought but they also open new research directions adapted to the global challenges of our time. **New**

Books on Women and Feminism, 2006. **The Education Feminism Reader** Lynda Stone, Gail Masuchika Boldt, 1994. The Education Feminism Reader is an anthology of the most important and influential essays written in feminist education theory since the late seventies. Attentive to the quality and diversity of this growing field, the Reader showcases the thinking of traditionally liberal feminists, radical postmodern theorists, and those feminists with psychological, philosophical, and political agendas. Lynda Stone introduces and frames the volume through a discussion of the historical and historicist location of the project. The 22 essays are empirical and non-empirical studies emerging from philosophy and psychology of education, critical sociology, multicultural theory, and literary criticism, and many authors make theoretical connections to their own lives, their own educations, and their own teaching. Special attention has been given to the organization of the anthology with a view to making it particularly useful as a classroom text in education and women's studies courses. One of the most important aspects of The Education Feminism Reader is the inclusion of feminists of color whose voices are intended as a counterbalance and critique of a field that has long been exclusively white. Committed to a pluralist vision of feminism, the anthology attempts to speak for the present in feminist theory even as it builds from a past and towards a future. **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 2006.
