Manuel Abrunhosa, António Chambel, Silvia Peppoloni, Helder I. Chaminé, 2021-03-30 This book gathers the peer reviewed proceedings of the 1st congress on Geoethics Groundwater Management GEOETH GWM 20 held in Porto Portugal in an online format on 18-22 May 2020 Hosted in School of Engineering ISEP Polytechnic of Porto based on Porto city a UNESCO World Heritage Site the international conference focused on what has now been dubbed hydrogeoethics a novel transdisciplinary scientific field integrating all dimensions of geoethics in groundwater science and practice Given its scope the book is of interest to all researchers and practitioners in the geosciences hydrology water resources hydrogeology natural resources management environment engineering law sociology education philosophy culture among others This joint congress is the result of a collaborative agreement between the IAH International Association of Hydrogeologists and IAPG International Association for Promoting Geoethics and reflects the need for concerted actions to achieve sustainable development The diversity scale significance and increasing magnitude of anthropogenic interactions with aquifers and groundwater which often involve conflicting values or interests call for analysis discussions and decisions on the part of the agents involved e.g. groundwater scientists policymakers managers organisations professionals and citizens This approach calls for a responsible sustainable and human approach to groundwater use and management The groundwater community involved in the exploration and exploitation use and management of this increasingly vital natural resource is becoming more and more aware that ethical

issues pervade all our attitudes from concept to action and need to be addressed. Diverse values and cultures, science and education, law and policies, human and natural environments, and the public and the economic sectors view groundwater and its value and role differently. The authors believe that in a globalised and interconnected world, common ground must be found in the interest of peace, human development, and sustainability. The main topics covered here include:

- 1 Fundamentals of hydrogeoethics: cultures, principles, and geoethical values on groundwater science and engineering.
- 2 Lessons for a resilient and sustainable future with hydrogeoethics: case studies of geoethics in groundwater science, engineering, profession, and management.
- 3 Scientific and humanistic components of hydrogeoethics in groundwater education and professional training.
- 4 Socio hydrogeology and ethical groundwater management.
- 5 Geoethics of decision making under uncertainty and ethical issues in neglecting groundwater functioning.

Theory and Practice of Climate Adaptation Fátima Alves, Walter Leal Filho, Ulisses Azeiteiro, 2018-03-24. Climate change is one of the greatest challenges of our time. As such, both the Fifth Assessment Report AR5 released by the Intergovernmental Panel on Climate Change (IPCC) and the 25th Conference of the Parties (COP 25) recommendations call for action not only from government but also from various stakeholders. Apart from the knowledge offered by modeling and forecasts, which allows the readers to understand the problem and how it is likely to develop in the future, the book highlights approaches, methods, and tools that can help readers cope with the social, economic, and political problems posed by climate change. In other words, the book's goal is to accelerate developments in the field of climate change adaptation. This book gathers papers presented at the 2nd World Symposium on Climate Change Adaptation, a joint initiative by the University of Coimbra (Portugal), the Research and Transfer Centre Sustainable Development and Climate Change Management at Hamburg University of Applied Sciences (Germany), and the International Climate Change Information Programme (ICCIP). The book is truly interdisciplinary, covering various key areas in the field of climate change adaptation. Its focus is on integrative approaches to implementing climate change adaptation and is expected to contribute to the further development of this fast-growing field.
