Levinas and the Other in Psychotherapy and Counselling Del Loewenthal, 2022-11-28 For Emmanuel Levinas the danger of Western thought is that if we start with ourselves we end with ourselves Psychotherapy and counselling would be for the sole purpose of strengthening self initiated and self directed fulfilment resulting in individual and societal forms of totalitarianism Levinas suggests that ethics should be about putting the Other first but not in some fundamentalist Christian sense of the self choosing to give one's life for others The origin of authentic ethical behaviour is not from the self but from the Other Levinas offers us a fundamental shift in our thinking about therapeutic practices His writings call on us to have an ethical responsibility in the very way we practice therapy This is with all the complexities of negotiating from nearness and distance involvement and boundaries and how we view ourselves in attempting to do this Levinas inspires us towards ontological epistemological and methodological shifts The attempt to put the Other first can significantly change our notion of being It can help us be taken away from the dangers of a therapy based on ego psychology which seems to permeate so much of our therapies whether classified as humanistic psychoanalytic behavioural or existential All except the Introduction and two of the chapters were originally published in the European Journal of Psychotherapy and Counselling

Handbook of Counselling Psychology Sheelagh Strawbridge, Ray Woolfe, 2010 This Third Edition of a seminal text reflects new developments with counseling psychology It covers areas such as neuroscience narrative approaches and post modernist thinking The six sections include tradition challenge and change in counseling psychology difference and discrimination and professional and ethical issues Special attention has been paid to the research evidence current issues and debates theoretical and philosophical underpinnings political and resource issues and illustrative case material

Patterns in Interpersonal Interactions Karl

Tomm, Sally St. George, Dan Wulff, Tom Strong, 2014-05-16 In this book we present a comprehensive view of a systemic approach to working with families initiated by Karl Tomm more than two decades ago at the Calgary Family Therapy Centre in Canada. The contributors of this edited book articulate the IPscope framework as it was originally designed and its evolution over time. We invite you experienced professionals and new family therapists to join with us to explore some of the mysteries of human relationships. While the focus on our explorations revolves around clinical mental health problems and initiatives towards solutions, the concepts are applicable in many domains of daily life. They highlight the ways in which we as persons invite each other into recurrent patterns of interaction that generate and maintain some stability in our continuously changing relationships. The stabilities arise when our invitations become coupled and can be characterized as mutual yet they always remain transient. What is of major significance is that these transient relational stabilities can have major positive or negative effects in our lives. Consequently we could all potentially benefit from greater awareness of the nature of these patterns, how particular patterns arise and how we might be able to influence them.

What You Really Need to Know about Counselling and Psychotherapy Training Cathy McQuaid, 2014-03-05 Becoming a counsellor or psychotherapist is a transformative and life changing experience. Some trainees manage this process well while others struggle to come to terms with the personal impact of their training. In *What You Really Need to Know about Counselling and Psychotherapy Training* Cathy McQuaid provides an in depth but accessible guide to the processes of understanding individual motivations for wanting to undertake training and choosing the most appropriate course. Backed by extensive research, the book explains the training process from beginning to end, covering topics including entry requirements, course curriculum and terms and conditions of training, the training relationship and group process, the challenges of training, the outcomes of counselling and psychotherapy training. McQuaid leads the reader through the process of choosing a course, working with the course leader and with a group of peers, and considering potential employment prospects upon completion. Prompting the reader to consider their own personal, professional and educational needs within the framework of training, this is essential reading for anyone thinking of training as a counsellor or psychotherapist and for trainers and training course providers.

Regulating the Psychological Therapies Denis Postle, 2007 Keeping track of the arguments for and against state regulation and how, if or why the psychological therapies should become state sponsored has been an onerous task in recent years. For many practitioners, the institutional politics and disinformation around the regulation topic have tended to breed boredom and apathy to seem out of the question. And that, considering the work we do, this is perceived as incongruous civic accountability for the psychological therapies. He shows how vested interests, which in the last decade successfully seduced an otherwise uninterested government into bringing forward state regulation, now find that they have got their wish but tragically for clients and practitioners alike, not in the form they sought.

Against and for CBT Richard House, Del Loewenthal, 2008 Offers a wide range of critical perspectives on the rise of Cognitive Behavioural Therapy (CBT) from around the world.
