Where Is The Green Sheep Literacy Activities:

Two Books Are Better Than One! Shari Frost, 2016-06-03 Coming in June 2016 Today's early literacy programs are more demanding than ever. No longer is it sufficient to teach letters, letter sounds, sight words, and simple texts in kindergarten through second grade. Children are expected to read and comprehend texts in a variety of genres with increasing complexity. Then they must integrate the ideas and concepts from those texts into their own writing. *Two Books are Better Than One: Reading and Writing and Talking and Drawing Across Texts in K-2* helps teachers meet those demands. Each chapter contains an anchor lesson focused on a different way of connecting texts including by theme, characters, perspective, structure, or genre. The lessons feature research-based and common core aligned strategies: interactive read-alouds, shared reading and writing, scaffolded small group reading, accountable talk, close reading, and opinion, narrative, and explanatory writing. Each anchor lesson features two high-quality children's books, and each chapter is rounded out with a list of other recommended book pairs to support you in creating your own lessons.

Read, Rhyme, and Romp Heather McNeil, 2012-06-26 Designed to promote literacy in young children and to empower parents, educators, and librarians, this guide is filled with simple strategies, creative activities, and detailed instructions that help make reading fun. Encouraging a love of reading in young children can be a source of both great frustration and immense joy. This handy resource provides essential tips, techniques, and strategies for making early literacy development fun and inspiring a lifelong love of reading. *Read, Rhyme, and Romp: Early Literacy Skills and Activities for Librarians, Teachers, and Parents* explores the six basic pre-literacy skills that experts agree are necessary for a young child to be ready to learn to read. Special sections within each chapter are dedicated to the specific needs of preschool teachers, parents, and librarians, making the content relevant to different settings. Recommended book lists, personal anecdotes, and literacy-rich activities combine to create an effective and accessible plan for implementing an early literacy program.

Bringing Heart and Mind into Storytime Heather McNeil, 2022-04-01 Learn how to use children's books during storytime to approach sensitive topics and increase children's social-emotional wellness and how to create storytimes that are engaging, participative, and FUN. The emotional challenges many children experience consume the time of teachers, exhaust parents, and sometimes lead children toward behaviors that prohibit social and academic success. Storytime to the rescue! Library storytimes prepare children for kindergarten; storytimes at home and in preschools allow teachers, parents, and children to think and talk about empathy and the importance of honoring your own and others' feelings. In *Bringing Heart and Mind into Storytime*, Heather McNeil teaches librarians and teachers how to use books to open conversations with children to teach such concepts as patience, tenacity, kindness, and teamwork. McNeil shares research on brain development, social-emotional learning, and the importance of play, but she also emphasizes maintaining the fun of storytime. She recommends songs, action rhymes, games, and crafts that contribute to fun and healthy storytimes. Extensive lists of recommended books will help readers find the right ones for their audience.

iPads in the Early Years Michael Dezuanni, Karen Dooley, Sandra Gattenhof, Linda Knight, 2015-01-09 Digital devices such as smart phones and tablet computers are becoming

commonplace in young children's lives for play, entertainment, learning and communication. Recently there has been a great deal of focus on the educational potential of these devices in both formal and informal educational settings. There is now an abundance of educational apps available to children, parents and teachers which claim to enhance children's early literacy and numeracy development, but to date there has been very little formal investigation of the educational potential of these devices. This book discusses the impact on children's learning when iPads were introduced in three very different early years settings in Brisbane, Australia. It outlines how researchers worked with pre-school teachers and parents to explore how iPads can assist with letter and word recognition, the development of oral literacy and digital literacies and talk around play. Chapters consider the possibilities for using iPads for creativity and arts education through photography, storytelling, drawing, music creation and audio recording and critically examine the literacies enabled by educational software available on iPads and the relationship between digital play and literacy development. iPads in the Early Years provides exciting insights into children's digital culture and learning in the age of the iPad. It will be key reading for researchers, research students and teacher educators focusing on the early years as well as those with an interest in the role of ICTS and particularly tablet computers in education.

Multimodal Perspectives of Language, Literacy, and Learning in Early Childhood Marilyn J. Narey, 2017-01-03 Our image-rich media-dominated culture prompts critical thinking about how we educate young children. In response, this volume provides a rich and provocative synthesis of theory, research and practice that pushes beyond monomodal constructs of teaching and learning. It is a book about bringing sense to 21st-century early childhood education with sense as related to modalities: sight, hearing and sense in terms of making meaning. It reveals how multimodal perspectives emphasize the creative, transformative process of learning by broadening the modes for understanding and by encouraging critical analysis, problem-solving and decision-making. The volume's explicit focus on children's visual texts, art facilitates understanding of multimodal approaches to language, literacy and learning. Authentic examples feature diverse contexts including classrooms, homes, museums and intergenerational spaces and illustrate children's sense-making of life experiences such as birth, identity, environmental phenomena, immigration, social justice and homelessness. This timely book provokes readers to examine understandings of language, literacy and learning through a multimodal lens, provides a starting point for constructing broader multimodal views of what it might mean to make meaning and underscores the production and interpretation of visual texts as meaning-making processes that are especially critical to early childhood education in the 21st century.

Engaging Families as Children's First Mathematics Educators Sivan Phillipson, Ann Gervasoni, Peter Sullivan, 2016-11-21 This book explores how professionals can engage and inspire parents to support their young children's mathematics learning. Bringing together international experts, researchers and scholars, it proposes a framework for engaging with and supporting parents, including those who are less aware of the crucial development of children's mathematical skills in the early years. Focusing on mathematics learning from birth to 5 years, the book's underlying assumption is that it is

possible to offer guidance to professionals working with families with young children concerning how to engage and support families in the area of mathematics learning including those families who seem alienated from education services Specifically the respective chapters present a framework for understanding children s early mathematical development and the important role of families in this regard They describe effective strategies for engaging families in their children s mathematics learning including those who are marginalised and experience multiple disadvantages so that all families can best support their children s mathematical learning and their development of positive attitudes towards learning In closing hurdles and opportunities within the systems surrounding family engagement are addressed
