2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned

The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual. Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding. The current status of Ofqual as an independent regulator accountable to Parliament is the right one. However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do.

The Oxford Handbook of Special Music Education and Music Therapy Kimberly A. McCord, Cynthia Colwell, Deborah VanderLinde, 2025. School music teachers have always taught students with disabilities in their classes and ensembles and occasionally school music therapists and teachers will collaborate. More often than not music educators are unaware that their students are receiving music therapy. This handbook addresses this issue in both research and practice by bringing together the complementary fields of Music Therapy and Special Music Education the latter still a relatively new field but growing in research output and interest. With a focus on school music education early childhood through grade 12 the twenty six chapters in this handbook offer a range of discussions by leaders in the fields of music education and music therapy on topics such as theoretical models of disability, ablism in music therapy, intercultural music learning in special education, Universal Design for Learning, music therapy for the whole school community and more. Many chapters provide descriptions of successful programs in music therapy and special music education around the world. Taken as a whole *The Oxford Handbook of Special Music Education and Music Therapy* is a collaboration between the two fields for the benefit of children of all ages, their teachers and their music therapists.
