**Mental Maths** Peter Patilla,1999       **SAT 2016**              ,2017-10-12 SAT SAT SAT SAT SAT SAT SAT SAT SAT  
vocabulary incontext evidence based SAT SAT       **Mental Math** Abhishek VR,2019-05-19 Discover the Mental Math Secrets  
to Become a Human Calculator Schools taught you a way to do math that works when you have a pen paper But the same  
methods takes a lot of effort when you have to do math in your head This is because it uses a lot of your working memory the  
short term memory used to complete a mental task For example try to mentally multiply  $73\,201 \times 3$  It might take only a few  
seconds to multiply the individual digits But if you multiply right to left the way you learnt in school you will rely on your  
working memory You will use it to recall every single digit you calculate to put it back together and get your final answer You  
may even find yourself calculating some digits again because you forgot one of the numbers The difficulty increases further  
when you have to multiply larger numbers like  $732 \times 323$  You will have to remember numbers across many steps Mental  
arithmetic would be a lot easier to do in your head if you didn't have to remember so many numbers In school you learnt to  
write the down numbers as you calculate to free up your working memory In mental math there are many other ways to do  
the same thing One of the tricks to free up your working memory is to calculate from left to right instead of right to left Try  
multiplying  $73\,201 \times 3$  from left to right starting from  $7 \times 3$  and ending with  $1 \times 3$  You will find yourself calling out the answer  
before you even finish the whole problem You can use this trick to solve any math problem in the future But we have just  
scratched the surface There are many more tricks inside the book that make doing mental math as easy as reading a comic  
Here is a glimpse of what you will be able to master Mentally add large numbers Example Add  $8739\,5492$  in your head in  
seconds Subtract numbers fast Example Mentally subtract  $7520\,4998$  without writing anything down Multiplication tricks to  
multiply three digit numbers Example Multiply  $323 \times 123$  in your head Square large numbers in seconds Example Calculate  
 $64 \times 64$  faster than a calculator Mentally divide large numbers Example Divide  $601324$  by  $73$  entirely in your head Quickly  
check a calculation with 90% accuracy without re-calculating Overcome math anxiety Cement your mental math skills with  
bonus weekly training This book only has the best techniques used by over 27 mental and Vedic math experts across the  
world The techniques in this book are so simple you will wonder why nobody taught you this before You will be able to  
master it even if you have failed math in school Imagine waking up tomorrow being able to do lightning fast math in your  
head Your family friends will look at you like you are some kind of a genius Since you do the calculations in your head you  
will acquire better mental habits in the process So you will not just look like a genius You will actually be one Buy Now To  
Become A Human Calculator Every minute you wait to buy this book is another minute you don't see the benefit of being
