they cling to and how these practices gain traction or how they fail to do so in an international bureaucracy Inspired by actor network theory relational sociologies of association and performativity theory this ethnographic exploration multiplies the matters of concern in our study of international law and lawyering the human and non human material and semantic visible and evasive actants that tie together the fragile fabric of legality In tracing these threads this book signals important changes in the conceptual repertoire and materiality of international legal practice as liberal ideals were gradually displaced by managerial modes of evaluation It reveals a world teeming with life a space where professional postures and prototypes aesthetic styles and technical routines are woven together in law s shifting mode of existence This history of international law as a contingent cultural technique enriches our understanding of the discipline s disenchantment and the displacement of its traditional tropes by unexpected and unruly actors It thereby inspires new ways of critical thinking about international law s political pathways promises and pathologies as its language is inscribed in ever evolving rationalities of rule
