The Writing Of The Walls Architectural Theory In The Late Enlightenment:

The Writing of the Walls Anthony Vidler, 1989 The Writing on the Walls Anthony Vidler, 1996-01-01 **The Writing of the Walls** Anthony Vidler, 1989 *Writting of the Walls* Vidler, 1987 A summary of the ideas and buildings of the period before the French Revolution with particular reference to the roots of modern architecture The author redefines the relationship between architecture and society during the period and looks at the reactions of contemporary architects

Writing of the walls; architectural theory in the late enlightenment A. Vidler, 1987 **The Theory of Architecture** Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader s powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic s use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text **Introducing Architectural Theory** Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your

adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers Introducing Architectural Theory teaches you to think as well

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-10 The SAGE Handbook of Architectural Theory documents and builds upon some of the most innovative developments in architectural theory over the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions the book examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation Spectacle Modernity History Memory Tradition Design Practice Production Technology Science Virtuality Nature Landscape Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research and practice the book organizes itself around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory A methodical authoritative and comprehensive addition to the literature the Handbook is suitable for academics researchers and practitioners in architecture urban geography cultural studies sociology and geography

The Architecture of Percier and Fontaine and the Struggle for Sovereignty in Revolutionary France Iris Moon, 2016-11-25 As the official architects of Napoleon Charles Percier 1764 1838 and Pierre Fran ois L onard Fontaine 1762 1853 designed interiors that responded to the radical ideologies and collective forms of destruction that took place during the French Revolution The architects visualized new forms of imperial sovereignty by inverting the symbols of monarchy and revolution constructing meeting rooms resembling military encampments and gilded thrones that replaced the Bourbon lily with Napoleonic bees Yet in the wake of political struggle each foundation stone that the architects laid for the new imperial regime was accompanied by an awareness of the contingent nature of sovereign power Contributing fresh perspectives on the architecture decorative arts and visual culture of revolutionary France this book explores how Percier and Fontaine s desire to build structures of permanence and their inadvertent reliance upon temporary architectural forms shaped a new awareness of time memory and modern political identity in France

French Modern Paul Rabinow, 2014-06-01 In this study of space and power and knowledge in France from the 1830s through the 1930s Rabinow uses the tools of anthropology philosophy and cultural criticism to examine how social environment was perceived and described Ranging from epidemiology to the layout of colonial cities he shows how modernity was revealed in urban planning architecture health and welfare administration and social legislation
