Translation and Adaptation in Theatre and Film Katja Krebs, 2013-08-15 This book provides a pioneering and provocative exploration of the rich synergies between adaptation studies and translation studies and is the first genuine attempt to discuss the rather loose usage of the concepts of translation and adaptation in terms of theatre and film At the heart of this collection is the proposition that translation studies and adaptation studies have much to offer each other in practical and theoretical terms and can no longer exist independently from one another As a result it generates productive ideas within the contact zone between these two fields of study both through new theoretical paradigms and detailed case studies Such closely intertwined areas as translation and adaptation need to encounter each other's methodologies and perspectives in order to develop ever more rigorous approaches to the study of adaptation and translation phenomena challenging current assumptions and prejudices in terms of both The book includes contributions as diverse yet interrelated as Bakhtin's notion of translation and adaptation Bollywood adaptations of Shakespeare's Othello and an analysis of performance practice itself arguably an adaptive practice which uses a variety of languages from English and Greek to British and International Sign Language As translation and adaptation practices are an integral part of global cultural and political activities and agendas it is ever more important to study such occurrences of rewriting and reshaping By exploring and investigating interdisciplinary and cross cultural perspectives and approaches this volume investigates the impact such occurrences of rewriting have on the constructions and experiences of cultures while at the same time developing a rigorous methodological framework which will form the basis of future scholarship on performance and film translation and adaptation

Theatre Translation Massimiliano Morini, 2022-01-13 Translation for the theatre is often considered to hold a marginal status between literary translation and adaptation for the stage As a result this book argues that studies of this complex activity tend to take either a textual or performative approach After exploring the history of translation theory through these lenses Massimiliano Morini proposes a more totalizing view of theatre translation as the sum of operations required to transform one theatre act into another and analyses three complex Western case histories in light of this all encompassing definition Combining theory with practice Morini investigates how traditional ideas on translation from Plautus and Cicero to the early 20th century have been applied in the theatrical domain He then compares and contrasts the inherently textual viewpoint of post humanistic translators with the more performative approaches of contemporary theatrical practitioners and chronicles the rise of performative views in the third millennium Positioning itself at the intersection of past and present as well as translation studies and theatre semiotics *Theatre Translation* provides a full diachronic survey of an age old activity and a burgeoning academic field

debate has shown a growing tendency to downplay and challenge the notion of translational accuracy in favor of a recreational and post dramatic attitude underlying the role of the director and playwright instead This book discusses the delicate balance between translating and directing from an intercultural semiotic aesthetic and interlingual perspective taking a critical stance on approaches that belittle translation for the theatre or equate it to an editorial practice focused on literalism Chapters emphasize the idea of dramatic translation as a particular and extremely challenging type of performance while consistently exploring its various textual intertextual intertranslational contextual cultural and intercultural facets The notion of performance is applied to textual interpretation as performance interlingual versus intersemiotic performance and inter cultural performance in the adaptation of translated texts for the stage providing a wide ranging discussion from an international group of contributors directors and translators

Performance A range of case studies from the National Theatre's Medea to The Gate Theatre's Dances of Death and Emily Mann's The House of Bernarda Alba shed new light on the creative processes inherent in translating for the theatre destabilising the literal performable binary to suggest that adaptation and translation can and do coexist on stage

Samuel Beckett's theatrical works maintain a prominent position within contemporary theatre His plays provide a prodigious potential to study several forms of acting staging and dramaturgy as well as language and translation thereby setting a fertile ground to tackle the problematic issue of the relationship between theatre criticism and theatre translation criticism That is precisely what this study examines by drawing attention to the fundamental characteristics of translated theatre texts as blueprints for productions and taking several aspects into account from directing to acting from staging to performance together with the language factor To that end Bur dem Din el focuses on one of Beckett's most significant plays namely Krapp's Last Tape situating it within the author's oeuvre and along the way scrutinising not only the theatrical pieces but also the prose By looking into the Turkish translations and productions of the play this book brings forth a new dimension into approaching theatre through translation
