The normal approach to the study of the foundations of psychoanalysis is to focus on Sigmund Freud's classical texts. In this book, however, the author approaches the issue from the perspective of the foundations of behavioural sciences in general. He studies the nature of psychological terms and explanations and the relation between neuroscience and psychology. Due to the wide perspective, the author is able to create a fresh view to the stubborn debate concerning the scientific status of psychoanalysis. The author shows that both advocates and critics of psychoanalysis have a tendency to misconstrue the nature of psychoanalytic theorizing and thus have had unrealistic expectations of psychoanalytic explanations. The book tries to differentiate between those aspects of psychoanalysis which should be considered scientific and those aspects of psychotherapies in general which should not come into the scientific category. This book will be found to be a valuable contribution to the field of psychoanalytic studies. **Theoretical Issues in Reading Comprehension** Rand J. Spiro, Bertram C. Bruce, William F. Brewer, 2017-11-03. Research in cognitive psychology, linguistics and artificial intelligence: the three disciplines that have the most direct application to an understanding of the mental processes in reading is

presented in this multilevel work originally published in 1980 that attempts to provide a systematic and scientific basis for understanding and building a comprehensive theory of reading comprehension The major focus is on understanding the processes involved in the comprehension of written text Underlying most of the contributions is the assumption that skilled reading comprehension requires a coordination of text with context in a way that goes far beyond simply chaining together the meanings of a string of decoded words The topics discussed are divided into five general areas Global Issues Text Structure Language Knowledge of the World and Inference Effects of Prior Language Experience and Comprehension Strategies and Facilitators and represent a broad base of methodology and data that should be of interest not only to those concerned with the reading process but also to basic science researchers in psychology linguistics artificial intelligence and related disciplines Theoretical Issues in Psychology Sacha Bem,Huib Looren de Jong,1997-06-23 This overview of the scientific and philosophical status of psychology provides a comprehensive guide to the theoretical issues at the heart of contemporary psychology *Theoretical Issues in Natural Language Processing* Yorick Wilks,2018-10-24 Accompanying continued industrial production and sales of artificial intelligence and expert systems is the risk that difficult and resistant theoretical problems and issues will be ignored The participants at the Third Tinlap Workshop whose contributions are contained in *Theoretical Issues in Natural Language Processing* remove that risk They discuss and promote theoretical research on natural language processing examinations of solutions to current problems development of new theories and representations of published literature on the subject Discussions among these theoreticians in artificial intelligence logic psychology philosophy and linguistics draw a comprehensive up to date picture of the natural language processing field
