Theories Of Human Development

Richard M. Lerner

Theories Of Human Development:

Concepts and Theories of Human Development Richard M. Lerner, 2013-05-13 A classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives Since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis As a consequence a developmental systems orientation frames the presentation in this edition This new edition has been expanded substantially in comparison to the second edition Special features include A separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism Two new chapters surrounding the discussion of developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented A new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives A more differentiated treatment of nature oriented theories of development is provided There are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of Konrad Lorenz and a new chapter on sociobiology A new chapter concentrates on applied developmental science

An Introduction to Theories of Human Development Neil J Salkind, 2004-01-22 An Introduction to Theories of Human Development provides a comprehensive view of the primary theoretical models of human development including those from the biological psychoanalytic behavioral and cognitive developmental perspectives Along with a brief discussion of a historical background for each of these approaches this book examines the application of these theories to various aspects of human development such as the effectiveness of early intervention individual differences adolescence and sociobiology

Theories of Human Development Barbara M. Newman, Philip R. Newman, 2010-10-18 Intended for courses on theories of human development this new text presents nine theories grouped into three major families those that emphasize biological systems those that emphasize environmental factors and those that emphasize a dynamic interaction between biological and environmental forces The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights The inclusion of social role theory and life course theory expand the book's relevance to the study of adulthood and aging Grouping the theories by families enhances students ability to think critically about theoretical ideas assess the strengths and weaknesses of each theory and gain a deeper understanding of how each theory guides research and application The three families are introduced with a brief overview of the unique perspectives of each theory and the rationale for grouping these

theories together Discussion of each theory includes the historical and cultural context in which the theory was developed an overview of key concepts and important ideas new directions in contemporary scientific work a research example illustrating how the theory has been tested and modified an application showing how the theory has guided the design of an intervention or program an analysis of how the theory answers basic questions about human development and a critique highlighting the theories strengths and weaknesses Theories of Human Development serves as a text in advanced undergraduate and or beginning graduate courses in theories of human development Its clear organization and engaging writing style make it accessible to students with a minimal background in human development

Recent Theories of Human Development R. Murray Thomas, 2000-10-17 Intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the course of the past 20 years This period has seen a decline of the traditional grand theories that attempt to apply to all people all the time in favor of micro theories that focus more on individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past In addition the author inspects the changing ways in which the concept of theory itself has been interpreted during this period and he concludes with a chapter suggesting future directions

Theories of Human Development Neil J. Salkind, 1985-01-18 Provides a clearly written basic introduction to the different theoretical approaches to understanding human development designed for the first year student of human development Features an overview and discussion of the maturational biological psychoanalytic behavioral and cognitive developmental theories of human development and includes applied examples of every theory and a set of seven questions used to compare and contrast theories presented throughout the book

Theories of Human Development Michael G. Green, John A. Piel, 2015-07-14 The authors have grouped the theories into three classical families which differ in their views relative to the prime motives underlying human nature They show how theories are specific examples of more general points of view called paradigms The theories chosen to represent the three paradigms the Endogenous Paradigm Exogenous Paradigm and the Constructivist Paradigm were selected because they met four criteria importance as judged by academic and research psychologists fertility as judged by the amount of research the theory has generated scope as judged by the variety of phenomena the various theories explain family resemblance as judged by how well each theory represents its paradigm The authors present the paradigm case in the lead chapter for each paradigm This paradigm case is the best example for the paradigm The authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm

Theories of Human Growth and Development: Developmental Psychology Theresa Lowry-Lehnen, 2015-05-12 Developmental psychology is the branch of psychology and the scientific study of how people grow and change over the course of a lifetime Originally concerned with infants and children it expanded to include adolescence adult development ageing and the entire lifespan Beginning with Sigmund Freud 1856 1939 and Jean Piaget

1896 1980 the early focus of developmental psychology was on the maturation of children Within the last three decades researchers who study human development have expanded their focus to examine change across a broad range of topics including psycho physiological processes cognitive development involving areas such as problem solving moral and conceptual understanding language acquisition social personality emotional development self concept and identity formation The scientific study of human growth and development is important not only to psychology but also to biology sociology anthropology education history and health care Most important however are its practical applications By better understanding how and why people change and grow the knowledge can be applied to help people to reach their full potential

Theories of Human Development Michael Green,1989 *Human Development Theories* R Murray Thomas,1999-08-27 By examining each theory through a cultural lens Human Development Theories provides readers with the unusual perspective of being able to step outside of our own cultural heritage and to view other cultures as being equally viable reasonable and comprehensible The writing is crystal clear and the author has done a superb job of defining the 25 theories in a way that is at once accessible and stimulating I would rank Human Development Theories as outstanding Ann C Diver Stamnes Department of Education Humboldt State University California

Value Presuppositions in Theories of Human Development Leonard Cirillo,Seymour Wapner,2014-06-03 First published in 1986 The chapters and discussions presented in this volume derive from the conference Value presuppositions in theories of human development sponsored by the Heinz Werner Institute Clark University on June 10 11 1983 The conference included both psychologists and philosophers and mainly concerned those assumptions about what ought to be that enter into the ways that investigators in the human sciences construe development
