Craft Theory and Contemporary Architecture Grant Alford, 2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment Written for students and scholars this book challenges and extends the legacy of craft thinking in architecture

Theories in Digital Composite Photographs Yihui Huang, 2018-10-26 Theories in Digital Composite Photographs 12 Artists and Their Work presents a theoretical investigation of digital composite photographs through philosophical exploration of artists' concepts of reality With an international cohort of contemporary digital composite artists this book presents twelve case studies on artists' motivation production process and the relation of their worldview to theoretical interpretation Author Yihui Huang situates each artist's work in the context

of photographic theory and western aesthetics including realism expressionism formalism and postmodernism As creation of digital composites grows in popularity and influence this is the first to integrate a philosophical and theoretical understanding of this unique art form Featuring a wide range of international artists this volume is both insightful and inspirational for student and seasoned professional alike Humanizing Digital Reality Klaas De Rycke, Christoph Gengnagel, Olivier Baverel, Jane Burry, Caitlin Mueller, Minh Man Nguyen, Philippe Rahm, Mette Ramsgaard Thomsen, 2017-09-15 This book aims at finding some answers to the questions What is the influence of humans in controlling CAD and how much is human in control of its surroundings How far does our reach as humans really go Do the complex algorithms that we use for city planning nowadays live up to their expectations and do they offer enough quality How much data do we have and can we control Are today's inventions reversing the humanly controlled algorithms into a space where humans are controlled by the algorithms Are processing power robots for the digital environment and construction in particular not only there to rediscover what we already knew and know or do they really bring us further into the fields of constructing and architecture The chapter authors were invited speakers at the 6th Symposium Design Modelling Symposium Humanizing Digital Reality which took place in Ensa Versailles France from 16-20 September 2017
