

Lancing Device

Use the lancing device to get a blood sample when you perform a FreeStyle blood glucose test.

The Receiver/Transmitter Connection

The receiver and the transmitter must be kept within 10 feet of one another for glucose readings to be successfully transmitted. If the receiver is moved more than 10 feet from the transmitter, the connection will be broken and the receiver will not be able to receive glucose readings.

When the connection is broken, the following screen appears and the receiver beeps once every minute. To silence the alarm, move the receiver within 10 feet of the transmitter.

NOTE: If you hear the receiver beep, check the display screen for a message. Refer to the Troubleshooting section for information on the receiver messages.
