actions from humanitarian assistance on one extreme to general war on the other. It applies equally to small unit leaders and senior commanders. Moreover, since any activity not directly a part of warfighting is part of the preparation for war, this doctrinal publication is meant to apply also to the conduct of peacetime activities in garrison as well as in the field. This publication provides the authority for the subsequent development of command and control doctrine, education, training, equipment, facilities, procedures, and organization. This doctrinal publication provides no specific techniques or procedures for command and control; rather, it provides broad guidance which requires judgment in application. Other publications in the command and control series will provide specific tactics, techniques, and procedures for performing various tasks. MCDP 5 Planning discusses the planning side of command and control more specifically. Operation VERBAL IMAGE, the short story with which this publication begins, offers a word picture of command and control in action, done well and done poorly, and illustrates various key points that appear in the text. It can be read separately or in conjunction with the rest of the text. Chapter 1 works from the assumption that in order to develop an effective philosophy of command and control, we must first come to a realistic appreciation for the nature of the process and its related problems and opportunities. Based on this understanding, chapter 2 discusses theories of command and control, looking at the subject from various aspects such as leadership, information management, and decisionmaking. Building on the conclusions of the preceding chapters, chapter 3 describes the basic features of the Marine Corps approach to command and control.

United States Government US Marine Corps, 2018-04-21 Marine Corps Doctrinal Publication MCDP 1 0 w change 1 Marine Corps Operations July 2017. First published in September 2001. Marine Corps Doctrinal Publication MCDP 1 0 Marine Corps Operations provided a bridge between the maneuver warfare philosophy articulated in our first nine MCDPs and the tactics, techniques, and procedures contained in our warfighting and reference publications. It focused on describing the role of the Marine Corps component in providing sustaining and deploying Marine Corps Forces at the operational level of war and on how the largest of our Marine air ground task forces, MAGTFs, the Marine expeditionary force, conducted operations at the tactical level. Developed just prior to and published shortly after the momentous events of 11 September 2001, the original edition reflected the language and operational constructs prevalent within joint doctrine at that time. Key among them were the notions of war versus military operations other than war, as well as the unstated but imbedded belief that the ability to defeat a conventional adversary granted the ability to succeed against lesser foes. Marine Corps commanders and staffs at all levels should read, study, and be thoroughly conversant with the content of MCDP 1 0. The notion that words matter is embedded throughout this publication, which defines key terms to ensure Marines speak a common operational language. Inasmuch as MCDP 1 0 illustrates how the flexibility and rapid deployability of our task-organized combined arms forces apply across the range of military operations.

joint and multinational force commanders and their staffs can also use this publication to better understand Marine Corps capabilities and considerations for their employment This publication supersedes MCDP 1 0 Marine Corps Operations dated 27 September 2001
