A Modern Credit Rating Agency Daniel Cash, 2023-09-22 This book aims to present a picture of one of the world's leading credit rating agencies Credited as being the first credit rating agency Moody's stands as the epitome of the rating sector and all that it effects However outside of internal and non public histories compiled within the rating agency itself the story of Moody's has never been told until now However this is not a historical book Rather this book paints a picture of Moody's on a wider canvas that introduces the concept of rating to you taking into account the origins of the sector the competitive battles that formed the modern day oligopoly and the characters that have each taken their turn on sculpting the industry that today is critical to the modern economy The book is a story of personable people who provided the market with what it needed but it is more than that It is a story of conflict impact strategy and most of all the relationship between big business and modern society Standing as the gatekeeper to the capital markets that form the core of modern society Moody's represents the very best of what the marketplace can produce but also the very worst This story takes in economic crises in the antebellum US the Panics of the early 1900s the Wall Street Crash and the Great Depression and of course the Global Financial Crisis It does this because at the heart of each one was a member of the rating industry or the reporting industry that preceded it Associated with almost any financial scandal you may care to remember the credit rating agencies in their often uncomfortable role as gatekeepers have their fingerprints on most financial scandals and calamities This book tells the story

of the industry's founding member Risk Michael E. Tennenbaum, Donna Beech, 2020-10-01 The adventurer financier and philanthropist offers an insider's look at risk management in this personal guide to risk taking in life and business As the founder of Caribbean Capital Consultancy and a former general partner of Bear Sterns Michael E Tennenbaum knows a thing or two about taking risks and winning big In this unique and insightful volume he shares his views on risk through stories of high stakes deals and creative financial innovations as well as anecdotes about riding in a nuclear submarine and literally swimming with sharks Tennenbaum also shares strategies for using risk to seize opportunities manage mistakes and give back to one's community His personal tales take readers inside Bear Sterns the Smithsonian Institution Harvard Business School and the Joffrey Ballet among other firms and cultural institutions Through it all Tennenbaum demonstrates how to reach greater heights of performance achievement and contentment through embracing risk Regulation and the Credit Rating Agencies Daniel Cash, 2018-08-06 This book examines the transgressions of the credit rating agencies before during and after the recent financial crisis It proposes that by restricting the agencies ability to offer ancillary services there stands the opportunity to limit in an achievable and practical manner the potentially negative effect that the Big Three rating agencies Standard Poor's Moody's and Fitch may have upon the financial sector and society moreover The book contains an extensive and in depth discussion about how the agencies ascended to their current position why they were able to do so and ultimately their behaviour once their position was cemented This work offers a new framework for the reader to follow suggesting that investors issuers and the state have a desired version of the agencies in their thinking and operate upon that basis when in fact those imagined agencies do not exist as demonstrated by the actual conduct of the agencies The book primarily aims to uncover this divergence and reveal the real credit rating agencies and then on that basis propose a real and potentially achievable reform to limit the negative effects that result from poor performance in this Industry It addresses the topics with regard to financial regulation and the financial crisis and will be of interest to legal scholars interested in the intersection between business and the law as well as researchers academics policymakers industry and professional associations and students in the fields of corporate law banking and finance law financial regulation corporate governance and corporate finance **Sustainability Rating Agencies vs Credit Rating Agencies** Daniel Cash, 2021-04-16 This book details the difference between the two rating industries but this difference is converging all the time The concept of investing in a more responsible and sustainable manner is drawing in some of the world's leading investors and with it regulations and policies are developing at the highest levels However the market is not getting what it needs to fully submit to the concept of responsible investing It has called for more to be done from those tasked with injecting information into their processes and two industries in particular have been identified as being natural partners It has been suggested that they are on a collision course to serve the mainstream investor and in this book that collision course is contextualised explained presented and finally its outcome predicted
