Adaptation Online Lyndsay Michalik Gratch, 2017-09-05 *Adaptation Online* Creating Memes Sweding Movies and other Digital Performances explores how traditional notions of the processes and products of creative adaptation are evolving online Using a performance lens and a shift in terminology from the metaphor of the cultural meme to the framing that adaptation affords Lyndsay Michalik Gratch considers online adaptations in terms of creative process and human agency rather than merely as products This book offers a glossary of strategies for online adaptation that is useful not only for scholars in performance studies but also for scholars of cinema communications and new media studies *Watching the Internet* José M. Alvarez-Monzoncillo, 2022-03-03 This book deals with the Internet's influence on television The traditional value chain has been transformed giving rise to new forms of television that foster user generated content We no longer dream about interactivity but participation Accordingly the digital natives like to tag programs and films in the cyberspace each conveniently tagged so that other users can find it Although many questions have yet to be answered this decade's motto may be the tag is the medium However on demand television is unlikely to replace mass TV The Web 2.0 has brought an end to the my TV concept of the dotcom age and may put our TV in its place These changes pose serious problems The industry is facing the real threat of revenue cannibalization because current online business models are not financially rewarding The Internet is not yet a profitable market for programs that require additional revenues to advertising To date the box office video and premium television have been the main sources of revenue of the audiovisual industry This book explores the factors at play in this shift *Extremely Online* Taylor Lorenz, 2023-10-03 Taylor Lorenz reveals how online influence came to upend the world demolishing traditional barriers and creating whole new sectors of the economy Lorenz shows this phenomenon to be one of the most disruptive changes in modern capitalism By tracing how the Internet has changed what we want and how we go about getting it Lorenz unearths how social platforms power users radically altered our expectations of content connection purchasing and power Lorenz documents how moms who started blogging were among the first to monetize their personal brands online how bored teens who began posting selfie videos reinvented fame as we know it and how young creators on TikTok are leveraging opportunities to opt out of the traditional career pipeline It's the real social history of the Internet Emerging seemingly out of nowhere these shifts in how we use the Internet seem easy to dismiss as fads However these social and economic transformations have resulted in a digital dynamic so unappreciated and insurgent that it ultimately created new approaches to work entertainment fame and ambition in the 21st century *Extremely Online* is the inside untold story of what we have done to the Internet and what it has done to us *Online TV* Catherine Johnson, 2019-01-04 With growth in access to high speed broadband and 4G and increased ownership of smartphones tablets and internet connected television sets the internet has simultaneously begun to compete with and transform television *Online TV* argues that these changes create the conditions for an emergent internet era that challenges

the language and concepts that we have to talk about television as a medium In a wide ranging analysis Catherine Johnson sets out a series of conceptual frameworks designed to provide a clearer language with which to analyse the changes to television in the internet era and to bring into focus the power dynamics of the online TV industry From providing definitions of online TV and the online TV industry to examining the ways in which technology rights interfaces and algorithms are used to control and constrain access to audiovisual content Online TV is a timely intervention into debates about contemporary internet and television cultures A must read for any students scholars and practitioners who want to understand and analyse the ways in which television is intertwining with and being transformed by the internet
