Hirji, R., Nicol, Alan, Davis, R., 2018-08-24 **Water Resource Management in South Asia** Anjal Prakash, 2022-05-29 This cluster of books presents innovative and nuanced knowledge on water resources based on detailed case studies from South Asia India Bangladesh Bhutan Nepal Pakistan and Sri Lanka In providing comprehensive analyses of the existing economic demographic and ideological contexts in which water policies are framed and implemented the volumes argue for alternative informed and integrated approaches towards efficient management and equitable distribution of water These also explore the globalization of water governance in the region particularly in relation to new paradigms of neoliberalism civil society participation integrated water resource management IWRM public private partnerships privatization and gender mainstreaming These volumes will be indispensable for scholars and students of development studies environmental studies natural resource management governance and public administration particularly those working on water resources in South Asia They will also be useful for policymakers and governmental and non governmental organizations

Indian Water Policy at the Crossroads: Resources, Technology and Reforms Vishal Narain, Annasamy Narayanamoorthy, 2016-01-12 This book reviews and analyzes emerging challenges in water policy governance and institutions in India Recent times have seen the contours of water policy shaped by new discourses and narratives there has been a pluralization of the state and a changing balance of power among the actors who influence the formulation of water policy Discourses on gender mainstreaming and Integrated Water Resource Management IWRM are influential though they have often remained rhetorical and difficult to put into practice Debate over property rights reform and inter linking of rivers has been polarized At the same time there has been a rising disenchantment with policy initiatives in participatory irrigation management cleaning up of water bodies and pollution control Fast depletion of groundwater resources and the importance of adopting new irrigation methods are getting increased focus in the recent policy dialogue The contributors review current debate on these and other subjects shaping the governance of water resources and take stock of new policy developments The book examines the experience of policy implementation and shows where important weaknesses still lie The authors present a roadmap for the future and discuss the potential of alternative approaches for tackling emerging challenges A case is made for greater emphasis on a discursive analysis of water policy to examine underlying policy processes The contributors observe that the ongoing democratization of

water governance coupled with the multiplication of stresses on water will create a more visible demand for platforms for negotiation conflict resolution and dialogue across different categories of users and uses Finally the authors propose that future research should challenge implicit biases in water resources planning and address imbalances in the allocation of water from the perspectives of both equity and sustainability Water Management in South Asia Sumana Bandyopadhyay, Habibullah Magsi, Sucharita Sen, Tomaz Ponce Dentinho, 2020-01-29 This book highlights various challenges and opportunities for water management and cooperation in South Asia In light of increasing urbanization and development in the region and related pressure on water resources the contributions investigate water conflictual and cooperative attitudes and gestures between countries and regions analyse management trade offs between nature agriculture and urban uses and examine water sustainable management and related policies By studying major river basins in the region such as Indus Ganges Brahmaputra Narmada Godavari and Krishna the chapters highlight socio economic infrastructural environmental and institutional aspects of water scarcity in South Asia and present best practices for improved sustainable water management and security in the region **Land and Water Nexus in South Asia** Seema Rani, 2025-05-09 This book aims to unravel the intricate relationship between land and water resources and delve into their interdependencies synergies and challenges As the world grapples with pressing issues such as water scarcity land degradation and climate change understanding the complex dynamics and interplay between these two critical resources has become more crucial than ever This comprehensive volume brings together multidisciplinary perspectives from leading experts in the field offering an integrated approach to studying the land water nexus The book provides readers with a clear understanding of how land and water interact and delves into key topics such as land use change and its impacts on water resources water management in agricultural landscapes land water interactions in aquatic ecosystems urbanization and water resource management and climate change s influence on the land water nexus Moreover the book investigates integrated governance frameworks policy considerations and sustainable development approaches that are essential for effective land and water resource management It also sheds light on future perspectives and research frontiers envisioning innovative solutions to address emerging challenges in this field By synthesizing current knowledge showcasing case studies and presenting cutting edge research this book provides a valuable resource for researchers policymakers and professionals working in water resource management environmental science agriculture urban planning and sustainable development The book s holistic approach encourages readers to envision sustainable pathways that balance the needs of both land and water fostering a resilient and harmonious future for our planet
