Scott,Elise L.

Amel,Susan M. Koger,Christie M. Manning,2015-07-24 Psychology for Sustainability 4th Edition known as Psychology of Environmental Problems Psychology for Sustainability in its previous edition applies psychological theory and research to so called environmental problems which actually result from human behavior that degrades natural systems This upbeat user

friendly edition represents a dramatic reorganization and includes a substantial amount of new content that will be useful to students and faculty in a variety of disciplines and to people outside of academia as well. The literature reviewed throughout the text is up to date and reflects the burgeoning efforts of many in the behavioral sciences who are working to create a more sustainable society. The 4th Edition is organized in four sections. The first section provides a foundation by familiarizing readers with the current ecological crisis and its historical origins and by offering a vision for a sustainable future. The next five chapters present psychological research methods, theory and findings pertinent to understanding and changing unsustainable behavior. The third section addresses the reciprocal relationship between planetary and human wellbeing and the final chapter encourages readers to take what they have learned and apply it to move behavior in a sustainable direction. The book concludes with a variety of theoretically and empirically grounded ideas for how to face this challenging task with positivity, wisdom and enthusiasm. This textbook may be used as a primary or secondary textbook in a wide range of courses on Ecological Psychology, Environmental Science, Sustainability Sciences, Environmental Education and Social Marketing. It also provides a valuable resource for professional audiences of policymakers, legislators and those working on sustainable communities.

Psychology for Sustainability Britain A. Scott, Elise L. Amel, Susan M. Koger, Christie M.

Manning, 2021-04-08 Psychology for Sustainability applies psychological science to so-called environmental problems that manifest when human behavior disrupts and degrades natural systems. Drawing on environmental psychology, ecopsychology, conservation psychology and related disciplines, the authors provide an extensive review of relevant theory and research in a lively and easy-to-read style. This edition represents a substantial revision and expansion spurred by a burgeoning body of research and by global ecological, political and social developments. Particular attention is paid to environmental justice and collective action for systems change. More than one third of the content is entirely new and there are more than nine hundred new references. This edition also features a new full color design and over two hundred full color figures, tables and photos. Timely topics include climate change, biodiversity loss, environmental racism, Indigenous perspectives, social media and COVID 19 and other pandemics. Content retained from the previous edition has been updated throughout. The twelve chapters are organized into four parts. What on Earth Are We Doing includes a prologue on psychology as a sustainability science followed by three chapters that provide an overview of the ecological crisis and its historical origins and a vision for a sustainable future. Psychology for a Sustainable Future encompasses five chapters on research methods, theory and findings pertinent to understanding and shifting unsustainable behavior. What's Good for the Planet is Good for Us includes two chapters that address the reciprocal relationship between planetary and human health. Being the Change We Want to See introduces two new chapters to inspire readers to take what they have learned and apply it as changemakers in the world. The first is about collective action for systemic change. The second presents a positive psychology perspective on how to tackle the ecological crisis in a way that promotes wellbeing and resilience and is personally meaningful and fulfilling. Carefully tailored to the

length of a standard college semester Psychology for Sustainability is essential reading for courses on sustainability across disciplines It will be invaluable to people outside academia as well including policymakers legislators and those working on sustainable communities The text is also supplemented with online resources for instructors
