Theories Of Human Learning What The Professor Said Psy 361 Learning:

Theories of Human Learning: What the Professor Said Guy R. Lefrançois, 2012-07-27 Both a serious academic text and a delightful story this book offers a clear readable look at a full range of learning theories from behavioral to cognitive It also covers memory motivation connectionism neural net models and social learning and concludes with a comprehensive synthesis Its most apparent strength is its easily accessible style but its greatest value lies in the clarity of its concepts and its emphasis on practical applications THEORIES OF HUMAN LEARNING is narrated by a Professor But this Professor isn't just anyone In fact those familiar with previous editions may conclude that he is related to Kongor and Kro two extraterrestrials who so successfully guided students through the first two editions or to the Old Man or later the Old Woman who led readers through the next editions Wise as he is the Professor does the job even more effectively than his predecessors in this sixth edition of THEORIES OF HUMAN LEARNING WHAT THE PROFESSOR SAID Important Notice Media content referenced within the product description or the product text may not be available in the ebook version

Subject Guide to Books in Print, 1991 **Theories of Human Learning** Guy R. Lefrançois, 2012 Both a serious academic text and a delightful story this book offers a clear readable look at a full range of learning theories from behavioral to cognitive It also covers memory motivation connectionism neural net models and social learning and concludes with a comprehensive synthesis Its most apparent strength is its easily accessible style but its greatest value lies in the clarity of its concepts and its emphasis on practical applications THEORIES OF HUMAN LEARNING International Edition is narrated by a Professor But this Professor isn't just anyone In fact those familiar with previous editions may conclude that he is related to Kongor and Kro two extraterrestrials who so successfully guided students through the first two editions or to the Old Man or later the Old Woman who led readers through the next editions Wise as he is the Professor does the job even more effectively than his predecessors in this sixth edition of THEORIES OF HUMAN LEARNING WHAT THE PROFESSOR SAID Real Learning Melvin L. Silberman, Jerome S. Allender, Jay M. Yanoff, 1976 The Teaching and Learning of Mathematics at University Level Derek Holton, 2006-04-11 This book is the final report of the ICMI study on the Teaching and Learning of Mathematics at University Level As such it is one of a number of such studies that ICMI has commissioned The other Study Volumes cover assessment in mathematics education gender equity research in mathematics education the teaching of geometry and history in mathematics education All of these Study Volumes represent a statement of the state of the art in their respective areas We hope that this is also the case for the current Study Volume The current study on university level mathematics was commissioned for essentially four reasons First universities world wide are accepting a much larger and more diverse group of students than has been the case Consequently universities have begun to adopt a role more like that of the school system and less like the elite institutions of the past As a result the educational and pedagogical issues facing universities have changed Second although university student numbers have increased significantly there has not been a

corresponding increase in the number of mathematics majors Hence mathematics departments have to be more aware of their students needs in order to retain the students they have and to attract future students As part of this awareness departments of mathematics have to take the teaching and learning of mathematics more seriously than perhaps they have in the past

The Art and Science of Motivation Jenny Ziviani, Anne A. Poulsen, Monica Cuskelly, 2012 The authors groundbreaking approach to working with children and their parents or caregivers places motivation at the heart of all encounters and therapeutic activities The book provides readers with both a theoretical and practical understanding of methods for engaging and working successfully with children with a range of difficulties from physical disabilities to learning disabilities and emotional and behavioral difficulties The authors present an innovative new paradigm the model of Synthesis of Child Occupational Performance and Environment In Time SCOPE IT for working with these groups to enhance motivation and engagement and to achieve the best possible treatment outcomes The challenges professionals may face are clearly addressed and the contributors also explain how the therapist s use of language may influence motivation Engaging clinical examples bring to life the SCOPE IT model and the book closes with an extended case study of the therapeutic journey of one individual his parents and a therapist placing the key concepts from the preceding chapters in a richly human and personal context Combining research based theory with a wealth of tools and strategies for practice this book will be inspiring reading for all those working therapeutically with children and young people including occupational therapists speech and language therapists counselors psychologists and psychotherapists

Psychology Norman Leslie Munn, 1966

Perspectives on the Place of Creativity in Education, Policy and Practice Kevin Gormley, 2023-10-04 This book critically analyses how cultural and educational policies construct creativity through a range of concepts and compares this against the open and expansive idea of creativity as experienced by individuals in society more broadly The book draws on empirical data case study examples and ethnographic motifs to identify the discursive construction of creativity and the way in which discourses of creativity are enfolded into narratives of progress in cultural policy Along with auto ethnographical perspectives chapters apply a rich conceptualisation of Foucault and Agamben s work to contemporary questions and issues in education alongside recent policies and lived experiences from teachers Exploring ideas of both fixed and expansive creativity the volume argues that education policy and cultural policy are neoliberalised and that creativity is shaped in schools by regulative schooling systems but ultimately identifies how individuals enact creative practices that subvert and disrupt neoliberal narratives and limited appropriations This book will be of great interest to researchers academics and postgraduate students in the fields of education policy creativity studies and education politics Those interested in arts education or in intersections between education and the writings of Foucault and Agamben more broadly will also find the book of value
