

A scenic landscape featuring a winding asphalt road that leads into the distance, flanked by dark, silhouetted mountains. The sky is filled with soft, orange and pink clouds, suggesting a sunset or sunrise. The overall mood is contemplative and serene.

Thinking Strategically in Turbulent Times: An Inside View of Strategy Making Alan M. Glassman, Deonne Zell, Shari Duron, 2014-12-18 An emergent approach to organizational strategy making assumptions that few organizations actually realize the goal of deliberative top down strategic planning and that effective strategy making occurs on a continual basis and is a shared activity of the entire organization This innovative book provides the first in depth look at how real organizations are formulating and implementing strategic change under this new paradigm The authors have dug deep into three large and varied organizations Hewlett Packard the California State University system and the County of Los Angeles and identified each one's efforts to develop a new strategic planning process better suited to match the current pace of change and environmental unpredictability The book is filled with vignettes quotes and real world examples that illustrate the trend toward faster more adaptive strategic planning processes It is relevant for a wide range of business governmental and non profit settings and should be required reading in any course on strategic planning

Travels in Paradox Claudio Minca, Tim Oakes, 2006-03-30 This innovative volume focuses on tourism through the twin lenses of cultural theory and cultural geography Presenting a set of innovative case studies on tourist destinations around the world the contributors explore the paradoxes of the tourist experience and the implications of these paradoxes for our broader understanding of the problems of modernity and identity The book examines how tourism reveals the paradoxical ways that places are both mobile and rooted real and fake inhabited by those who are simultaneously insiders and outsiders and both subjectively experienced and objectively viewed The concepts of travel and mobility long have been used to explain modern identity and social behavior but this work pushes beyond the established literature by considering the ways that place and mobility are inherently related in unexpected even contradictory ways Travel the international cast of authors contends occurs in place rather than between places Thus instead of offering yet another interpretation of the ways modern societies are distinguished by their mobilities in contrast to the supposed place bound quality of traditional societies the chapters here collectively argue for an understanding of modern identity as simultaneously grounded and mobile This rich blend of empirical and theoretical analysis will be invaluable for cultural geographers anthropologists and sociologists of tourism
