Warships After Washington The Development Of The Five Major Fleets 1922 193:

Warships After Washington John Jordan,2011-11-21 This fascinating study of post WWI naval powers reveals how international peace treaties influenced the design and engineering of modern warships The Washington Naval Treaty of 1922 was designed to prevent an arms race between the major naval powers after the First World War But the new constraint inspired ingenious attempts to maximize the power of ships built within the treaty s restrictions By effectively banning the construction of new battleships for a decade the signatories shifted their focus to the design and construction of large cruisers In Warships After Washington naval historian John Jordan examines the political and strategic background of the Washington Naval Treaty and the subsequent London Treaty of 1930 He then presents a detailed study of the types of warships built by the navies of Britain the USA Japan France The treaties influenced naval engineering across the board from the development of capital ships and cruisers to super destroyers aircraft carriers and large submarines **WARSHIPS**

AFTER LONDON JOHN. JORDAN,2020 *The Grand Fleet* D. K. Brown,2010 Originally published London Chatham Pub 1999 **Super-Battleships of World War I** Angus Konstam,2025-05-22 As World War I ended the victors were developing a powerful new generation of hyper dreadnoughts and battlecruisers Fully illustrated this studies the big gun warships that never were 1918 was a moment of great naval change Britain still had the largest fleet in the world but its ships were ageing and many of them were markedly inferior to the latest American and Japanese battleships An arms race loomed between the war s victors In this book naval expert Angus Konstam studies and compares the battleships being designed between 1918 and 1922 which drew on the lessons of World War I Britain was designing four G3 class 15in gun battlecruisers plus four N3 hyper dreadnoughts mounting colossal 18in guns The US Navy was planning six new South Dakota battleships carrying an incredible 12 16in guns plus six Lexington class battlecruisers Japan was working on a similar project and in 1920 the first of four Amagi class battlecruisers were laid down However in 1922 this costly arms race was averted by the Washington Naval Treaty which halted new battleship construction and limited the major fleets These battleships and battlecruisers were mostly cancelled and scrapped with a few such as Lexington and Akagi converted into aircraft carriers With new colour reconstructions of the G3 H3 South Dakota Lexington and Amagi classes this is the first book to study these never built monster warships *The Age of the Battleship 1890-1922* Brayton Harris,2015-03-01 In the years following the Civil War ignorance indifference and corruption left such a mark on the U S Navy that the entire fleet of the 1880s could have been defeated by any single modern warship of the day It was to take years of often acrimonious wrangling to re build the sorry fleet but despite factional disputes and political bumbling the Navy rose in strength and efficiency until by 1922 it was second to none in the world The Age of the Battleship tells the tale and along the way reminds us that the United States Navy helped introduce submarines and airplanes to naval warfare that a racially integrated Navy became segregated and then integrated again that too many Members of the Congress are more interested in pork than progress and includes stories of

the Navy's success in two wars the largely naval war against Spain 1898 and the sea air and land war with the Navy's Marine Corps at the front against Germany 1918 It also tells the tale more than any other of the Navy's frequent wars against itself Originally published in 1965 today re issued revised and enlarged **Major Warships** John Evelyn Moore,1978
