Ethical Veganism, Virtue Ethics, and the Great Soul Carlo Alvaro,2019-03-13 Millions of animals are brought into existence and raised for food every year This has generated three serious problems first intensive animal farming is one of the leading causes of environmental degradation Farming livestock contributes to a large amount of greenhouse gases to the atmosphere each year it contributes to land and water degradation biodiversity loss coral reef degeneration and deforestation Second raising animals for food causes millions of animals to suffer and be killed And third consumption of meat and animal products is linked with heart disease diabetes and various cancers Consequently a global change in the way that animals are treated is imperative Many moral philosophers have suggested a move toward vegetarianism But vegetarianism unfortunately still relies on raising animals for food and does not avoid the deleterious effects of animal products on human health The right solution is ethical veganism which is the avoidance of all animal products and by products Some moral philosophers have framed ethical veganism in terms of animals having the same fundamental rights as humans a notion that is highly controversial In any case the view that animals have rights is not capable of generating the moral duty to embrace ethical veganism The answer is to adopt a virtue oriented approach to the treatment of animals because the acquisition of virtues such as compassion magnanimity temperance and fairness enable people to see that raising and using animals for food is unfair callous and self indulgent

Climate Bonus Alison Smith, 2013-06-26 We urgently need to transform to a low carbon society yet our progress is painfully slow in part because there is widespread public concern that this will require sacrifice and high costs But this need not be the case Many carbon reduction policies provide a range of additional benefits from reduced air pollution and increased energy security to financial savings and healthier lifestyles that can offset the costs of climate action This book maps out the links between low carbon policies and their co benefits and shows how low carbon policies can lead to cleaner air and water conservation of forests more sustainable agriculture less waste safer and more secure energy cost savings for households and businesses and a stronger and more stable economy The book discusses the ways in which joined up policies can help to maximise the synergies and minimise the conflicts between climate policy and other aspects of sustainability Through rigorous analysis of the facts the author presents well reasoned and evidenced recommendations for policy makers and all those with an interest in making a healthier and happier society This book shows us how instead of being paralysed by the threat of climate change we can use it as a stimulus to escape from our dependence on polluting fossil fuels and make the

transition to a cleaner safer and more sustainable future *Computer Science and Applications* Ally Hu,2015-06-11 The 2014 Asia Pacific Conference on Computer Science and Applications was held in Shanghai December 27 28 2014 These CSAC 2014 proceedings include 105 selected papers which focus not only on the research of science and technology of computer sciences but also on the research of applications aiming at a quick and immediate effect on Computational Science and Its Applications – ICCSA 2017 Osvaldo Gervasi,Beniamino Murgante,Sanjay Misra,Giuseppe Borruso,Carmelo M. inquiry based learning in advancing students conceptual understanding and modelling proficiency students understandings about the nature of scientific inquiry classroom studies on teachers enactment of inquiry based learning teachers facilitation of classroom discourse for inquiry based learning and co teaching in developing teachers in adopting an inquiry based pedagogy It was originally published as a special issue of the journal Education 3 13 Accountability in education: meeting our commitments UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover Tracing Technologies Helena Machado,Barbara Prainsack,2016-02-24 The real heroes of television crime shows in the twenty first century are no longer police detectives but forensic technologies The immense popularity of high tech crime television shows has changed the way in which crime scene work is viewed The term CSI effect was coined to signify a situation where people s views and practices have been influenced by such media representations e g judges and jurors putting more weight on forensic evidence that has been produced with high tech tools in particular DNA evidence than on other kinds of evidence While considerable scholarly attention has been paid to examining the CSI effect on publics jurors judges and police investigators prisoners views on forensic technologies and policing have been under explored Drawing on a research sample of over 50 interviews carried out with prisoners in Portugal and Austria this groundbreaking book shows how prisoners view crime scene traces how they understand crime scene technologies and what effect they attribute to the existence of large police databases on their own lives careers and futures Through critically engaging with STS sociological and criminological perspectives on the use of DNA technologies within the criminal justice system this work provides the reader with valuable insights into the effect of different legal

political discursive and historical configurations on how crime scene technologies are utilized by the police and related to by convicted offenders
