Yield Management Strategies For The Service Industries:

Yield Management Ian Yeoman,Anthony Ingold,1997 The Spread of Yield Management Practices Fabiola Sfodera,2006-01-16 Yield management has always been considered a technique for large companies whether these be airlines railroad car rental or hotel companies Its application to the small and medium sized businesses that characterise the tourism industry in many countries Italy in the first place has never been totally excluded but its implementation and subsequent actuation has always been considered too expensive for this type of business In recent years all this has been changing Technology and research have opened up new possibilities for its application at costs and following methods that are acceptable even to those who cannot access sophisticated statistics or mathematics instruments The evolution and the rapid changes in the reference scenarios both of the demand and the offer have done the rest It has become clear that to compete in a market as vast as the tourism one one must apply the principles and techniques of marketing to produce and deliver a service that can satisfy the needs of the client better than the competition In the same way however a deeper knowledge of the processes of the clientele s choice acquisition and consumption permits the formulation of increasingly accurate forecasts of their behaviour and an understanding of the significance and importance that each client segment attaches to the purchase and consumption of a particular service In this way the application of the yield management technique has assumed a new and more important position as well as a greater and constant spread The SAGE Handbook of Hospitality Management Roy C Wood,Bob Brotherton,2008-06-05 At last a comprehensive systematically organized Handbook which gives a reliable and critical guide to all aspects of one of the world s leading industries the hospitality industry The book focuses on key aspects of the hospitality management curriculum research and practice bringing together leading scholars throughout the world Each essay examines a theme or functional aspect of hospitality management and offers a critical overview of the principle ideas and issues that have contributed and continue to contribute within it Topics include The nature of hospitality and hospitality management The relationship of hospitality management to tourism leisure and education provision The current state of development of the international hospitality business The core activities of food beverage and accommodation management Research strategies in hospitality management Innovation and entrepreneurship trends The role of information technology The SAGE Handbook of Hospitality Management constitutes a single comprehensive source of reference which will satisfy the information needs of both specialists in the field and non specialists who require a contemporary introduction to the hospitality industry and its analysis Bob Brotherton formerly taught students of Hospitality and Tourism at Manchester Metropolitan University He has also taught Research Methods to Hospitality and Tourism students at a number of international institutions as a visiting lecturer Roy C Wood is based in the Oberoi Centre of Learning and Development India Managing Tourism and Hospitality Services B. Prideaux,Gianna Moscardo,Eric Laws,2006-09-14 The aim of this book is to enhance theoretical and practical understanding of quality management in

tourism and hospitality It provides a benchmark of current knowledge and examines the range of research methods being applied to further develop tourism and hospitality service management research It is hoped that this book will stimulate new research questions by highlighting tensions and challenges in the area

Mixed-Mode Modelling: Mixing Methodologies For Organisational Intervention M.G. Nicholls, S.A. Clarke, B. Lehaney, 2013-12-01 The 1980s and 1990s have seen a growing interest in research and practice in the use of methodologies within problem contexts characterised by a primary focus on technology human issues or power During the last five to ten years this has given rise to challenges regarding the ability of a single methodology to address all such contexts and the consequent development of approaches which aim to mix methodologies within a single problem situation This has been particularly so where the situation has called for a mix of technological the so called hard and human centred so called soft methods The approach developed has been termed mixed mode modelling The area of mixed mode modelling is relatively new with the phrase being coined approximately four years ago by Brian Lehaney in a keynote paper published at the 1996 Annual Conference of the UK Operational Research Society Mixed mode modelling as suggested above is a new way of considering problem situations faced by organisations Traditional technological approaches used in management science have suffered criticisms relating to their adequacy in the past few decades and these hard approaches have been replaced by soft methods which consider process more relevant than outcome However the sole use of human centred approaches to organisational problems has also proved to be inadequate Mixed mode modelling accepts the importance of both process and outcome and provides enabling mechanisms for hard and soft investigation to be undertaken
