Trials Of The Monkey An Accidental Memoir:

Trials of the Monkey Matthew Chapman, 2007-04-01 When Darwin called his second book *The Descent of Man* instead of *The Ascent of Man* he was thinking of his progeny So declares Darwin's great great grandson Matthew Chapman as he leaves behind his stressful career as a Hollywood screenwriter and travels to Dayton Tennessee where in 1925 creationist opposition to the teaching of evolution in schools was played out in a famous legal drama the Scopes Trial The purpose of this journey is to see if opinions have changed in the seventy five intervening years A defiant atheist Chapman is confronted not only by the fundamentalist beliefs that continue to banish the theory of evolution but by his own spiritual malaise as the outward journey becomes an inward quest a tragicomic accidental memoir First there was Charles Darwin two yards long and nobody's fool Then there was his son my great grandfather Sir Francis Darwin an eminent botanist Then came my grandmother Frances a modest poet who spent a considerable amount of time in rest homes for depression From her issued my beloved mother Clare who was extremely short failed to complete medical school and eventually became an alcoholic Then we get down to me I'm in the movie business *Trials of the Monkey* combines travel writing and reportage as Chapman records his encounters in the South with history and the accidental memoir of a man full of mid life doubts in a genre breaking first book that is darkly funny provocative and poignant

[The Scopes Monkey Trial](#) Jim Whiting, 2020-02-04 One of the most famous trials in U S History took place in a tiny town in Tennessee in 1925 Dayton was the site of what became known as the Scopes Monkey Trial The defendant John T Scopes was accused of violating a recently passed state law This law made it illegal to teach the theory of evolution Under most circumstances few people would have paid any attention to the trial Several of Dayton's leading citizens saw a chance to put their town on the map They were successful Two of the country's top lawyers William Jennings Bryan and Clarence Darrow soon became involved Dozens of reporters poured into Dayton from all over the country It was the first trial to receive live media coverage Scopes was found guilty He had to pay a small fine But the issues about evolution that the trial raised are still debated today

Public Opinion William A. Blade, 2002 Twenty four news networks a plethora of newspapers and magazines vibrant news talk radio and the ubiquitous Internet highlight our society as information driven With such a steady stream of hard facts mixed with publicised opinions the mainstream population has an opinion on everything Most anyone seems itching to argue their side of an issue making once private beliefs fodder for general consumption A staple of any medium's content is a regular public opinion poll on whatever hot topic strikes the editor's fancy From the significant to the mundane public opinion permeates society Accordingly politicians have taken note of these opinions and adopted stands and values that put them in tune with public sentiment An understanding of the nature of public opinion therefore is paramount in today's world This book assembles and presents a carefully chosen bibliography on public opinion in its many forms The collection of references makes for a valuable resource in studying and researching the critical issue of public opinion Easy access to these pieces of literature are then provided

with author title and subject indexes Monkey Business Marvin N. Olasky, John Perry, 2005 Media coverage at the time of the Scopes trial was far from accurate This book sets the record straight revealing how inaccuracies distorted the view of the Christian faith **The Trial of John T. Scopes** Steven P. Olson, 2003-12-15 Looks at the case of John Scopes a Tennessee schoolteacher who agreed in 1925 to be arrested for the crime of teaching evolution in order to provide a case to test the state laws forbidding such lessons A Field Guide for Immersion Writing Robin Hemley, 2012 Discusses the various types of immersion writing including travel memoir and journalism and explains some of the issues that writers encounter in reporting about the factual world and in describing other people and their own inner experiences **Knowledge in the Making** Joan DelFattore, 2010-10-26 How free are students and teachers to express unpopular ideas in public schools and universities Not free enough Joan DelFattore suggests Wading without hesitation into some of the most contentious issues of our times she investigates battles over a wide range of topics that have fractured school and university communities homosexuality themed children s books research on race based intelligence the teaching of evolution the regulation of hate speech and more and with her usual evenhanded approach offers insights supported by theory and by practical expertise Two key questions arise What ideas should schools and universities teach And what rights do teachers and students have to disagree with those ideas The answers are not the same for K 12 schools as they are for public universities But far from drawing a bright line between them DelFattore suggests that we must consider public education as a whole to determine how and how successfully it deals with conflicting views When expert opinion clashes with popular belief which should prevail How much independence should K 12 teachers have How do we foster the cutting edge research that makes America a world leader in higher education What are the free speech rights of students This uniquely accessible and balanced discussion deserves the full attention of everyone concerned with academic goals and agendas in our schools The Other Side of the Scopes Monkey Trial Jerry Bergman, 2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin s theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution s philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and Nebraska man Scopes was not a biology teacher but rather taught math His college degree was not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book

covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals The Chief Sea Lion's Inheritance Tom Blaney,2011-05-01 Charles Galton Darwin was the grandson of the great Charles Darwin and was born into the liberal and independent minded intellectual family in 1887 He became an eminent physical scientist but less respectably emerged as a proponent of eugenics a science devoted to the desirability even necessity of improving human stock by selective breeding He and most of the previous generation of Darwins were enthusiastic activists and leaders in the cause of eugenics which was controversial when it was first proposed and today after its association with Nazi atrocities has become hugely distasteful to most people The Chief Sea Lion s Inheritance Eugenics and the Darwins is the first book to scrutinise this aspect of the Darwin inheritance examining Charles Galton Darwin and six generations of the family Dr Blaney s research has placed the concept of eugenics within the context of Charles Galton Darwin s own unique family perspective Why did a member of a family with a reputation for enlightened and humane thought pursue a concept that was reviled from its inception And why has this seemingly reprehensible aspect of the Darwin family been given scant attention in nearly all versions of their illustrious story **Why We Believe in God(s)** J. Anderson Thomson,Clare Aukofer,2014-07-01 In this groundbreaking volume J Anderson Thomson Jr MD with Clare Aukofer offers a succinct yet comprehensive study of how and why the human mind generates religious belief Dr Thomson a highly respected practicing psychiatrist with credentials in forensic psychiatry and evolutionary psychology methodically investigates the components and causes of religious belief in the same way any scientist would investigate the movement of astronomical bodies or the evolution of life over time that is as a purely natural phenomenon Providing compelling evidence from psychology the cognitive neurosciences and related fields he with Ms Aukofer presents an easily accessible and exceptionally convincing case that god s were created by man not vice versa With this slim volume Dr Thomson establishes himself as a must read thinker and leading voice on the primacy of reason and science over superstition and religion
