homeowners today face an overwhelming amount of advice on how to sell quickly and for the highest price possible. For these sellers trying to understand what actions truly matter when selling a home can feel like an impossible task. And selling a home the wrong way can result in sellers losing out on thousands of dollars of potential finance gain. Fortunately, research has shown how taking a few select actions can make a significant difference in the sale price of the home, a difference worth 5% or even 10% of the value of the home.

Full Value real estate agent management consultant and strategy expert Jack Richards shows homeowners, real estate agents, and investors how to identify and showcase sources of value in residential property. Drawing insights from academic and industry studies, **Full Value** provides homeowners with practical, fact-based advice on how to sell their homes for maximum value. The value-enhancing strategies in this book will show you how to sell your home at a higher price and for greater profit than would be possible otherwise.

Retail Disruptors Jan-Benedict Steenkamp, Laurens Slood, 2018-10-03 The rise of hard discounters like Aldi and Lidl has been monumental. Explore the very real threat they pose to traditional retailers and brand manufacturers and what you can learn from their growth. Hard discounters are stores that sell a limited selection of consumer packaged goods and perishables, typically fewer than 2,000 Stock Keeping Units, for prices that are usually 50-60% lower than national brands. The best-known hard discounters are Aldi and Lidl, but global brands include Trader Joe's, EuroSpin, Biedronka, Netto, and Leader Price. Their rise has been monumental; they have irrevocably changed the face of retail in Europe and Australia and are making steady inroads into the US. **Retail Disruptors** is the first book that explores this upheaval, providing expert insight into the business models of the leading hard discounters and what mainstream retailers and brand manufacturers can do to remain competitive in the face of disruption. Meticulously researched by two of the leading authorities in retail strategy, private labels, branding, and hard discounting, **Retail Disruptors** is essential reading for all brand manufacturers and retailers who want to retain the competitive edge.

If You Could Live Anywhere Melody Warnick, 2022-07-26 Even when your job can be done from anywhere, the place you call home still matters a lot. By the old rules of work, your dream career determines where you live. If you want to make movies, move to Los Angeles. If you want to work in publishing, you must be in New York. And if you're launching a start-up, you'll only succeed in Silicon Valley. But with the meteoric rise of remote and freelance work, more people than ever are becoming location-independent. Even doctors, teachers, and other people in more traditional occupations have to make tough choices about where they settle, because living in the right place can still make all the difference for your success and happiness. So if work won't dictate where you live, how will you ever decide? **If You Could Live Anywhere** answers that question. Melody Warnick unpacks the big picture concerns that we often miss when we're writing pros and cons lists about potential destinations. Because the secret to being happy isn't moving; it's aligning your location with your values. You'll learn how to craft a personal location strategy that will make the most of your money, your community, and your life, with success stories from people who flexed their location independence to find homes and work they love. The future of work is clear: it can

happen wherever you are So where do you really want to be **All Data Are Local** Yanni Alexander Loukissas,2019-04-30

How to analyze data settings rather than data sets acknowledging the meaning making power of the local In our data driven society it is too easy to assume the transparency of data Instead Yanni Loukissas argues in All Data Are Local we should approach data sets with an awareness that data are created by humans and their dutiful machines at a time in a place with the instruments at hand for audiences that are conditioned to receive them The term data set implies something discrete complete and portable but it is none of those things Examining a series of data sources important for understanding the state of public life in the United States Harvard s Arnold Arboretum the Digital Public Library of America UCLA s Television News Archive and the real estate marketplace Zillow Loukissas shows us how to analyze data settings rather than data sets Loukissas sets out six principles all data are local data have complex attachments to place data are collected from heterogeneous sources data and algorithms are inextricably entangled interfaces recontextualize data and data are indexes to local knowledge He then provides a set of practical guidelines to follow To make his argument Loukissas employs a combination of qualitative research on data cultures and exploratory data visualizations Rebutting the myth of digital universalism Loukissas reminds us of the meaning making power of the local **Housing in the United States** Katrin B.
