Zoos In The 21st Century Catalysts For Conservation Conservation Biology:

Zoos in the 21st Century Alexandra Zimmermann, Matthew Hatchwell, Lesley A. Dickie, Chris West, 2007-08-23 Modern zoos and aquaria are playing an increasingly active and important role in protecting and managing global biodiversity Many zoos include wildlife conservation in their mission and have started changing the focus of their institutions in order to increase even further the benefits of their activities for in situ wildlife conservation With these developments the following searching questions are now being asked What is the true role of zoos in conservation How can they contribute more significantly to global conservation efforts What are the unique attributes of zoos that can be applied in the conservation landscape And should zoos be doing more In parallel with this voluntary movement legal requirements for zoos to support conservation in the wild are also becoming more stringent This 2007 book defines a conservation vision for zoos and aquaria that will be of interest to those working in zoos alongside practitioners and researchers in conservation Zoo Conservation Biology John E. Fa, Stephan M. Funk, Donnamarie O'Connell, 2011-08-18 In the face of ever declining biodiversity zoos have a major role to play in species conservation Written by professionals involved in in situ conservation and restoration projects internationally this is a critical assessment of the contribution of zoos to species conservation through evidence amassed from a wide range of sources The first part outlines the biodiversity context within which zoos should operate introducing the origins and global spread of zoos and exploring animal collection composition The second part focuses on the basic elements of keeping viable captive animal populations It considers the consequences of captivity on animals the genetics of captive populations and the performance of zoos in captive breeding The final part examines ways in which zoos can make a significant difference to conservation now and in the future Bridging the gap between pure science and applied conservation this is an ideal resource for both conservation biologists and zoo professionals Wild Mammals in Captivity Devra G. Kleiman, Katerina V. Thompson, Charlotte Kirk Baer, 2010-08-15 Zoos aquaria and wildlife parks are vital centers of animal conservation and management For nearly fifteen years these institutions have relied on Wild Mammals in Captivity as the essential reference for their work Now the book reemerges in a completely updated second edition Wild Mammals in Captivity presents the most current thinking and practice in the care and management of wild mammals in zoos and other institutions In one comprehensive volume the editors have gathered the most current information from studies of animal behavior advances in captive breeding research in physiology genetics and nutrition and new thinking in animal management and welfare In this edition more than three quarters of the text is new and information from more than seventy five contributors is thoroughly updated The standard text for all courses in zoo biology Wild Mammals in Captivity will in its new incarnation continue to be used by zoo managers animal caretakers researchers and anyone with an interest in how to manage animals in captive conditions **Zoo Talk** Patricia G. Patrick, Sue Dale Tunnicliffe, 2012-09-28 Founded on the premise that zoos are bilingual that the zoo in the shape of its staff and exhibits and its visitors speak distinct languages this

enlightening analysis of the informal learning that occurs in zoos examines the speech of exhibits and staff as well as the discourse of visitors beginning in the earliest years Using real life conversations among visitors as a basis for discussion the authors interrogate children s responses to the exhibits and by doing so develop an informal learning model and a zoo knowledge model that prompts suggestions for activities that classroom educators can use before during and after a zoo visit Their analysis of the visitor voice informs creative suggestions for how to enhance the educational experiences of young patrons By assessing visitors entry knowledge and their interpretations of the exhibits the authors establish a baseline for zoos that helps them to refine their communication with visitors for example in expanding knowledge of issues concerning biodiversity and biological conservation The book includes practical advice for zoo and classroom educators about positive ways to prepare for zoo visits engaging activities during visits and follow up work that maximizes the pedagogical benefits It also reflects on the interplay between the developing role of zoos as facilitators of learning and the ways in which zoos help visitors assimilate the knowledge on offer In addition to being essential reading for educators in zoos and in the classroom this volume is full of insights with much broader contextual relevance for getting the most out of museum visits and field trips in general

Zoos and Tourism Warwick Frost, 2011 Zoos are important and popular tourist attractions Spread around the world they are typically located in major cities with visitation levels comparable to other major attractions Nature based attractions constructed in artificial settings they face the challenge of trying to balance potentially conflicting aims of conservation education and entertainment The best are continually developing fresh and effective techniques on visitor interpretation and management the worst highlight the manipulation of animals for human gratification Taking a global approach this book examines the problems and paradoxes of zoos as they try to balance their roles as visitor attractions while repositioning themselves as leading conservation agencies This book provides a detailed and critical examination of the conflicting roles and identities of the modern zoo from a tourism perspective and as such reminds us that zoos are as much about the people who visit them as about the animals that they display At a time when they are under continual critical scrutiny this book delivers a fresh approach to our understanding and appreciation of zoos and of the challenges and opportunities that they face as they strive to remain relevant within modern society Andrew Tribe University of Queensland Australia

Animal Ethics in the Age of Humans Bernice Bovenkerk, Jozef Keulartz, 2016-09-21 This book provides reflection on the increasingly blurry boundaries that characterize the human animal relationship In the Anthropocene humans and animals have come closer together and this asks for rethinking old divisions Firstly new scientific insights and technological advances lead to a blurring of the boundaries between animals and humans Secondly our increasing influence on nature leads to a rethinking of the old distinction between individual animal ethics and collectivist environmental ethics Thirdly ongoing urbanization and destruction of animal habitats leads to a blurring between the categories of wild and domesticated animals Finally globalization and global climate change have led to the fragmentation of natural habitats

blurring the old distinction between in situ and ex situ conservation In this book researchers at the cutting edge of their fields systematically examine the broad field of human animal relations dealing with wild liminal and domestic animals with conservation and zoos and with technologies such as biomimicry This book is timely in that it explores the new directions in which our thinking about the human animal relationship are developing While the target audience primarily consists of animal studies scholars coming from a wide range of disciplines including philosophy sociology psychology ethology literature and film studies many of the topics that are discussed have relevance beyond a purely theoretical one as such the book also aims to inspire for example biologists conservationists and zoo keepers to reflect on their relationship with animals

Recovering Australian Threatened Species Stephen Garnett, John Woinarski, David Lindenmayer, Peter Latch, 2018-03 Australia's nature is exceptional wonderful and important But much has been lost and the ongoing existence of many species now hangs by a thread Against a relentless tide of threats to our biodiversity many Australians and government and non government agencies have devoted themselves to the challenge of conserving and recovering plant and animal species that now need our help to survive This dedication has been rewarded with some outstanding and inspiring successes of extinctions averted of populations increasing of communities actively involved in recovery efforts *Recovering Australian Threatened Species* showcases successful conservation stories and identifies approaches and implementation methods that have been most effective in recovering threatened species These diverse accounts dealing with threatened plants invertebrates fish reptiles birds and mammals show that the conservation of threatened species is achievable that it can be done and should be done They collectively serve to inform guide and inspire other conservation efforts This is a book of hope and inspiration It shows that with dedication knowledge and support we can retain and restore our marvellous natural heritage and gift to our descendants a world that is as diverse healthy and beautiful as that which we have inherited

Animals and Tourism Kevin Markwell, 2015-05-01 This book critically examines the many ways in which tourism and animals intersect whether as tourist attractions wildlife conservation tools as travel companions or as meat to be eaten It aims to make a meaningful contribution to the growing body of knowledge concerning the relationships between animals tourists and the tourism industry The chapters are organised into three themes ethics and welfare conflict contradiction and contestation and shifting relationships Theoretically informed and empirically rich the chapters examine topics such as whale watching animal performances the objectification and commodification of animals and stakeholder conflict among a range of others It is hoped that the book will help to highlight key research questions and stimulate other researchers and students to reflect critically on the place of animals within tourism spaces experiences practices and structures [The Animal Ethics Reader](#) Susan J. Armstrong, Richard G. Botzler, 2016-11-18 *The Animal Ethics Reader* is an acclaimed anthology containing both classic and contemporary readings making it ideal for anyone coming to the subject for the first time It provides a thorough introduction to the central topics controversies and ethical dilemmas surrounding the treatment of animals

covering a wide range of contemporary issues such as animal activism genetic engineering and environmental ethics The extracts are arranged thematically under the following clear headings Theories of Animal Ethics Nonhuman Animal Experiences Primates and Cetaceans Animals for Food Animal Experimentation Animals and Biotechnology Ethics and Wildlife Zoos and Aquariums Animal Companions Animal Law and Animal Activism Readings from leading experts in the field including Peter Singer Bernard E Rollin and Jane Goodall are featured as well as selections from Tom Regan Jane Goodall Donald Griffin Temple Grandin Ben A Minteer Christine Korsgaard and Mark Rowlands Classic extracts are well balanced with contemporary selections helping to present the latest developments in the field This revised and updated Third Edition includes 31 new readings on a range of subjects including animal rights captive chimpanzees industrial farm animal production genetic engineering keeping cetaceans in captivity animal cruelty and animal activism The Third Edition also is printed with a slightly larger page format and in an easier to read typeface Featuring contextualizing introductions by the editors study questions and further reading suggestions as the end of each chapter this will be essential reading for any student taking a course in the subject With a new foreword by Bernard E Rollin *Critical Animal Studies* John Sorenson, 2014-04-21 Engaging and passionate this contemporary work provokes new ways of thinking about animal human interaction A cutting edge volume of original essays *Critical Animal Studies* examines our exploitation and commodification of non human animals By inquiring into the contradictions that have shaped our understanding of animals the contributors of this collection have set out to question the systemic oppression inherent in our treatment of animals The collection closes with a thoughtful consideration of some of the complexities of activism as well as a discussion of how to further the progress of animal rights Analyzing economic ethical historical and sociological aspects of human animal relations this interdisciplinary volume is a must read for all upper level students in animal studies critical animal studies animals and society and anthrozoology courses Features draws together contributions from some of the most active and committed individuals advancing the field of critical animal studies takes a revolutionary approach to mainstream animal studies by advocating for justice from a politically progressive abolitionist perspective supports curricular objectives of animal studies courses by encouraging students to critically analyze the shifting roles of animals in contemporary Western society and their consequences
