Vtu 4th Sem Power Electronics Lab Manual:

Power Electronics Laboratory: Theory, Practice And Organization Arora, O P, 2007 *Development of Experiments in Power Electronics for Electrical Laboratory* B. Stephen Carrellas, 1978 Laboratory Manual for Electronic Devices and Circuits David A. Bell, 2001 This lab manual accompanies Electronic Devices and Circuits 4 e **Power Electronics Laboratory Development** Roger Paul Webb, Georgia Institute of Technology. School of Electrical Engineering. Project E-21-A06, 1986 *Power Electronics Laboratory Using SPICE* M. H. Rashid, Barbara Coburn, 1996 **Laboratory Manual For Electronic Devices And Circuits 4Th Ed.** Bell, **Courseware Development for a Laboratory Class in Power Electronics** Mariano Alvira, Massachusetts Institute of Technology. Department of Electrical Engineering and Computer Science, 2005

cont In Lab 1 the student learns why switching circuits are useful learns a few necessary control circuits and builds a switching audio amplifier In Lab 2 the student constructs a 1500W buck converter that drives an electric go kart at variable speeds they also design and build a 12W boosting power supply for a switching stereo amplifier of their construction In Lab 3 the student designs and builds a high voltage flyback converter and an electric fluorescent lamp ballast Lastly in Lab 4 the student explores how power electronics are used to drive induction and permanent magnet machines using a teaching motor specifically designed for this course **Spl Terrell, 2000-10 Laboratory Manual for Electronics via Waveform Analysis** Edwin C. Craig, 2012-12-06

To the Instructor The purpose of this laboratory manual is not just to help students to set up electronic circuits that function as they should The important thing is the electronic concepts that the student learns in the process of setting up and studying these circuits Quite often a student learns more electronics when he has to trouble shoot a circuit than when the circuit performs as it should when first built It is unlikely that any students would be able to complete all of these experiments in one semester The author believes that all students should have laboratory experiences with power supplies amplifiers oscillators and integrated circuits Additionallabomtory experiments should be de termined by the instructor Therefore you can choose those that you want done Some students are more efficient in the labomtory than others Therefore some would be able to complete more exper iments in a semester than others Also many of these experiments cannot be completed in one two hour laboratory period If space is available the circuits could be left intact from one period to the next Or you might want to select steps in an experiment that you want to delete Neither the val ues of the components or the magnitudes of the power supplies as given in the instructions are critical Therefore you could in most cases change them if the ones recommended are not available Electronics Laboratory Manual Ralph Ross Wright, 1945
