Abstract

By embracing the ontological view of vulnerability and stressing its social basis, the paper aims to clarify the role of vulnerability within human rights paradigm.

Vulnerability is conceived of by the author as a heuristic notion, which works as a pillar for a general approach to some crucial challenges to human dignity. Both this heuristic notion and these challenges are regarded in the paper as hallmarks for the human rights paradigm.

In order to ground this view, the coherence between “vulnerability turn” and the rationale of human rights relies on a four-steps argument dealing with: (i) the denial of a necessary mismatch between the notion of vulnerability and the principle of autonomy; (ii) the appreciation of *relation* in human rights conceptualization; (iii) the complementarity between vulnerability, as a heuristic notion, and the principle of equality; (iv) the understanding of vulnerability as a “vehicle of empathy” not necessarily involving paternalist trends and therefore not in conflict with the empowerment purposes of human rights.

The relevance of “vulnerability turn” in human rights paradigm is defended in the paper within a view of human rights as basic rights, i.e. as means to prevent or fight against those threats that seriously affect basic human needs.

Keywords Basic rights · Equality · Human Rights · Judicial Reasoning · Ontological Vulnerability · Relational Autonomy

* I would like to thank the two anonymous reviewers for their remarks to the first version of the paper.

Vulnerability And Human Rights Essays On Human Rights:

Vulnerability and Human Rights Bryan S. Turner, 2015-10-29 The mass violence of the twentieth century's two world wars followed more recently by decentralized and privatized warfare manifested in terrorism ethnic cleansing and other localized forms of killing has led to a heightened awareness of human beings vulnerability and the precarious nature of the institutions they create to protect themselves from violence and exploitation This vulnerability something humans share amid the diversity of cultural beliefs and values that mark their differences provides solid ground on which to construct a framework of human rights Bryan Turner undertakes this task here developing a sociology of rights from a sociology of the human body His blending of empirical research with normative analysis constitutes an important step forward for the discipline of sociology Like anthropology sociology has traditionally eschewed the study of justice as beyond the limits of a discipline that pays homage to cultural relativism and the value neutrality of positivistic science Turner's expanded approach accordingly involves a truly interdisciplinary dialogue with the literature of economics law medicine philosophy political science and religion

Human Rights, Security Politics and Embodiment Aneira J. Edmunds, 2023-12-05 Virtuous institutions such as human rights ones have been neglected by securitization theory's focus on the national state apparatus as the key driver of security politics This book challenges this assumption showing the ways institutional human rights deemed the most progressive of rights have been complicit in rendering the body vulnerable While the book principally focuses on the treatment of the veiled woman it also considers wider cases involving torture the ultimate removal of control over one's body and biggest transgression of human rights supposed foundational commitment to bodily integrity

Environmental Change, Forced Displacement and International Law Isabel M. Borges, 2018-12-07 This book explores the increasing concern over the extent to which those suffering from forced cross border displacement as a result of environmental change are protected under international human rights law Formally they are not entitled to admission or stay in a third state country a situation that has been identified as an international legal protection gap The book seeks to provide answers to two basic questions whether and to what extent existing international law protects cross border environmental displacement and whether and how existing formalized regional complementary protection standards can interpretively solidify and conceptualize protection for cross border environmental displacement The discussion outlines that the protection of the human person is not only an ex post facto obligation of states but must be increasingly seen as an ex ante one The analysis further suggests that the European Union regionally orientated protection regime can help states to consolidate an evolving protection paradigm of proactive and reactive measures being erected at the international level It can also narrow the identified legal protection gaps In so doing it helps states to reconceptualise protection as a holistic and dynamic enterprise This book will be of great interest to academics in law political science and human rights policy makers and civil society organisations both at national and international level
