considerations and public perceptions recognizing their roles in fostering meaningful advancements in agricultural innovation A volume in the Nextgen Agriculture series this book is valuable to scientists practitioners and students in urban agriculture and planning horticulture engineering landscape architecture and plant technology sciences IoT-enabled farms and climate-adaptive agriculture technologies: Investment lessons from Singapore Montesclaros, Jose Ma. Luis, Babu, Suresh Chandra, Teng, Paul S., 2019-02-07 The adoption of climate adaptive agricultural technologies CAATs for extensive outdoor agriculture is stalled by funding gaps experienced by governments in the Mekong countries with negative implications on the rural farming industry on income and job security among smallholder farmers and on food sufficiency and access across the population We argue that one way of helping bridge these gaps is for providers and users of CAATs for extensive agriculture to learn from the practices of those in CAATs for intensive indoor agriculture Indoor CAATs are already receiving significant private sector investment a key reason being their ability to leverage the complementary nature of these technologies within farms that are integrated and enabled to use the so called Internet of things IoT Seamlessly linking different CAATs sensors crop analytics and automation can allow for synergies that significantly boost crop yields and in turn the viability of investing in CAATs We demonstrate these synergies through two case studies one that looks at the increasing global investment in indoor CAATs and another that describes a financial viability assessment for an indoor farm in Singapore We conclude with lessons on how these insights can be transferred to the Mekong countries including a prototype IoT enabled extensive farm that integrates multiple CAATs and an investment assessment tool for translating the yield benefits into terms that investors can appreciate **'One Planet' Cities** David Thorpe, 2019-04-30 This book addresses the crucial question of how the essential needs of the growing human population can be met without breaking the Earth's already stretched life support system With four out of five people predicted to be urban dwellers by 2080 One Planet Cities proposes a pathway to genuine sustainability for cities and neighbourhoods using an approach based on contraction and convergence Utilising interviews with key players including the Global Footprint Network World Future Council WWF mayors and government officials and case studies from across the globe including Europe North and South America Australia South Africa China and India David Thorpe examines all aspects of modern society from food provision to neighbourhood design via industry the circular economy energy and transport through the critical lens of the ecological footprint and relevant supporting international standards and indicators Recommendations on managing supply chains and impacts how the transition to a world within limits might be financed and a deep examination of the Welsh Government's pioneering efforts follow It concludes with an imagined vision of what a genuinely sustainable future might be like and an appeal for one planeters everywhere to step up to the challenge This book will be of great interest to practitioners and policymakers involved in governance administration urban environments and sustainability alongside students of the built environment urban planning environmental policy and energy **Agriculture and Environment Perspectives in Intelligent Systems**

Jaehwa Park,2019-06-15 The eventual aim when applying digital technologies in agriculture is to replace or reduce the human labor required for agricultural production Large amounts of heterogeneous data are essential for integration studies of automated agriculture and the digitalization of agriculture is helping to fulfill the demand for this data but management of the data gathered presents its own challenges That is where the Intelligent Environment IE paradigm comes into play to guide the design of the systems techniques and algorithms able to analyze the data and provide recommendations for farmers managers and other stakeholders This book Agriculture and Environment Perspectives in Intelligent Systems is divided into 5 chapters Chapter 1 explores the use of intelligent systems in Controlled Environment Agriculture CEA facilities Chapter 2 reviews the adoption of intelligent systems in the research field of biomonitoring Chapter 3 proposes an intelligent system to acquire and pre process data for precision agriculture applications Chapter 4 illustrates the use of intelligent algorithms to make more efficient use of scarce resources such as water and Chapter 5 focuses on the generation of intelligent models to predict frosts in crops in south eastern Spain There is still a need to bridge the gap between the needs of farmers environmental managers and stakeholders and the solutions offered by information and communication technology This book will be of interest to all those working in the field

Design and Technological Applications in Sustainable Architecture Stephen Siu Yu Lau,Junjie Li,Shimeng Hao,Shuai Lu,2021-10-19 This volume discusses the climate responsiveness of sustainable architecture design and technology in China Japan Singapore and South Korea in recent years addressing concepts and applications in urban planning building design and structural performance evaluation The four sections of the text cover the theory and implementation of sustainable architecture within various geographic boundaries and contexts offering an interdisciplinary assessment of the challenges faced in urban areas at different climate zones The main topics covered are 1 urban ecological restoration under the influence of climate environment 2 health and human considerations of building and environment 3 prototype optimization of sustainable building and 4 feedback of building performance and design evaluation The book is intended to be a contribution to the growing body of knowledge on sustainable architecture for applicable use by practitioners city planners field researchers and building operators in building design construction usage operation and maintenance

The Real Cost of Cheap Food Michael Carolan,2013-10-30 This challenging but accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and exploring what exactly cheap food affords us Detailing the numerous ways that food has become reduced to a state such as a price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual understanding of food when debating its affordability The author makes a compelling case for why today s global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Thus meat production and consumption are inefficient uses of resources and contribute to climate change the use of pesticides in industrial scale agriculture may produce cheap food but there are hidden costs to environmental protection

human health and biodiversity conservation Many of these costs will be paid for by future generations cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to international development national security health care industrial meat production organic farming corporate responsibility government subsidies food aid and global commodity markets The book concludes by suggesting ways forward going beyond the usual solutions such as farmers markets community supported agriculture and community gardens Exploding the myth of cheap food requires we have at our disposal a host of practices and policies Some of those proposed and explored include microloans subsidies for consumers vertical agriculture and the democratization of subsidies for producers

Urban Agriculture and Community Values Lisa Newton, 2020-03-18 This book addresses the evolving crisis in agriculture and sketches the community economy that grounds agricultural enterprise more accurately than the industrial model In its current practice agriculture is in the United States but increasingly in the rest of the world unsustainable and destructive The most immediately unsustainable feature of industrial agriculture is its dependence on the products of petroleum as feedstock for fertilizers herbicides and pesticides and as fuel for the farm machinery and transport of agricultural products into the cities The problems of agriculture and in general the food systems to which it is attached range from the vulnerability of monocultures to new and stronger pests to the emerging medical problem of obesity The need for agricultural reform is widely acknowledged one part of the new work being done suggests that food production in the cities may solve several of its problems at once This book is suitable for both undergraduate and graduate students in agriculture and environmental studies

Rethinking Building Skins Eugenia Gasparri, Arianna Brambilla, Gabriele Lobaccaro, Francesco Goia, Annalisa Andaloro, Alberto Sangiorgio, 2021-12-05 Rethinking Building Skins Transformative Technologies and Research Trajectories provides a comprehensive collection of the most relevant and forward looking research in the field of facade design and construction today with a focus on both product and process innovation The book brings together the expertise creativity and critical thinking of more than fifty global innovators from both academia and industry to guide the reader in translating research into practice It identifies new opportunities for the construction sector to respond to present challenges towards a more sustainable efficient connected and safe future Introduces the reader to the role of facades with respect to the main challenges ahead Provides an overview of the major facade technological advancements throughout history and identifies prospective research trajectories Includes interviews with key industry players from different backgrounds and expertise Showcases a comprehensive range of leading research topics in the field organised by product and process innovation Covers major innovations across the value chain including facade design fabrication construction operation and maintenance and end of life Contributes towards the definition of an international research agenda and identifies emerging market opportunities for the facade industry

Sustainable Agriculture-Beyond Organic Farming Sean Clark, 2018-07-17 This book is a printed edition of the Special Issue Sustainable Agriculture Beyond Organic Farming that

was published in Sustainability *Creating Sustainable Communities* Rik Scarce, 2015-02-23 Explores efforts aimed at creating sustainable communities throughout the Hudson River region From Mount Marcy to Manhattan and beyond the Hudson River region has become an incubator for rich and varied experiments in sustainable living In this fascinating book Rik Scarce showcases some of these efforts by telling the stories of dynamic individuals and organizations that are remaking the region's landscape through ecosystem stewardship nurturing agricultural practices and urban renewal for the twenty first century along with those promoting creative land use planning richly functioning communities and green businesses Together their achievements point to the potential for other areas of the country to forge sustainable futures and also remind us of the sobering realities and daunting challenges that await us as we attempt to remake our relationships with the planet and with each other Powerful massively inspiring stories from one of the loveliest spots on the planet this is the new Hudson River School and we all should be taking notes Bill McKibben author of *Deep Economy The Wealth of Communities* and the *Durable Future* Unlike the bulk of environmental writing from the post World War II era dominated as it is by dystopian works and pessimistic predictions this book offers hope We meet good people doing good things and doing them effectively as models for others to imitate Mark Hamilton Lytle author of *The Gentle Subversive* Rachel Carson *Silent Spring* and the *Rise of the Environmental Movement*

Environmental Management of Air, Water, Agriculture, and Energy Ahmad Vassel-Behagh, David S.K. Ting, 2020-04-14 Environmental Management of Air Water Agriculture and Energy brings together the most current state of knowledge on four major elements for sustaining life on planet Earth air water food and energy It examines how green technology aids in mitigating the global water energy and climate change crises including the use of electrostatic force and green infrastructure The concepts of underwater vegetation and aquatic cultivation as well as vertical farms are presented to spark discussion on emerging water energy food nexus lessons experiences and opportunities This book takes a comprehensive global scale approach to examining potential future environmental scenarios and outcomes Features Analyzes the most recent research findings in each of the areas covered Synthesizes the state of the art understanding Recommends ways to strive forward and to shape future research Serves as an educational tool for educators and students Supported by detailed examples and case studies this book serves not only as an up to date source of information for environmental experts and researchers in the field but also as an educational tool for relevant undergraduate and graduate courses It is also suitable for industry professionals concerned with preserving planet Earth for generations to come

Digital Technologies to Implement the UN Sustainable Development Goals Walter Leal Filho, Sandeep Kautish, Tony Wall, Sonja Rewhorn, Sanjoy Kumar Paul, 2024-09-16 Against this background and in order to facilitate a broad discussion on the contribution of IT toward implementing the UN SDGs this book is being produced The book gathers inputs from universities enterprises and research organizations working on matters related to IT and sustainable development in a variety of contexts It also provides a platform for the dissemination of information on the latest initiatives paving the way for

technology transfer and networking Last but not least a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aims to show how IT may support sustainability efforts in a wide range of settings and contexts Digital technologies are now widely spread and the variety of tools and methods available today means that they can potentially useful in helping to achieve the United Nations Sustainable Development Goals UN SDGs However the gap between technological innovation and sustainable development applications is quite wide For instance it is unclear how artificial intelligence can be leveraged to tackle some of the world s biggest environmental challenges including climate change biodiversity and water management Also there is a need to highlight how innovative green technologies and their applications in areas such as renewable energy waste management and sustainable agriculture may be used and to showcase how technological innovation can lead to more sustainable production and consumption patterns

Urban Soils Rattan Lal,B. A. Stewart,2017-10-18 Globally 30% of the world population lived in urban areas in 1950 54% in 2016 and 66% projected by 2050 The most urbanized regions include North America Latin America and Europe Urban encroachment depletes soil carbon and the aboveground biomass carbon pools enhancing the flux of carbon from soil and vegetation into the atmosphere Thus urbanization has exacerbated ecological and environmental problems Urban soils are composed of geological material that has been drastically disturbed by anthropogenic activities and compromised their role in the production of food aesthetics of residential areas and pollutant dynamics Properties of urban soils are normally not favorable to plant growth the soils are contaminated by heavy metals and are compacted and sealed Therefore the quality of urban soils must be restored to make use of this valuable resource for delivery of essential ecosystem services e g food water and air quality carbon sequestration temperature moderation biodiversity Part of the Advances in Soil Sciences Series Urban Soils explains properties of urban soils assesses the effects of urbanization on the cycling of carbon nitrogen and water and the impacts of management of urban soils soil restoration urban agriculture and food security evaluates ecosystem services provisioned by urban soils and describes synthetic and artificial soils

Agroforestry for Sustainable

Intensification of Agriculture in Asia and Africa Jagdish Chander Dagar,Sharda Rani Gupta,Gudeta Weldesemayat Sileshi,2023-04-19 This edited book opens up new vistas for sustainable intensification in agriculture to provide food to ever growing population as well as adapting to the risks of global environmental change Diverting from conventional agriculture the book explores new dimensions and concepts that have been identified for future research and development in sustaining agriculture in Asia and Africa regions The chapters are written by leading researchers and practitioners in the field of agroforestry The book demonstrates how agroforestry could be instrumental in bringing stability and sustainability in agricultural production It offers sustainable solutions for the impending problems of climate change ecosystem degradation declining agricultural productivity and uncertain food security It is an essential resource for students in agroforestry courses as well as a valuable introduction to the field for professionals in related areas

Smart Village Technology Srikanta

Patnaik,Siddhartha Sen,Magdi S. Mahmoud,2020-02-07 This book offers a transdisciplinary perspective on the concept of smart villages Written by an authoritative group of scholars it discusses various aspects that are essential to fostering the development of successful smart villages Presenting cutting edge technologies such as big data and the Internet of Things and showing how they have been successfully applied to promote rural development it also addresses important policy and sustainability issues As such this book offers a timely snapshot of the state of the art in smart village research and practice

Environmental Pest Management Moshe Coll,Eric Wajnberg,2017-10-02 A wide ranging interdisciplinary exploration of key topics that interrelate pest management public health and the environment This book takes a unique multidimensional approach to addressing the complex issues surrounding pest management activities and their impacts on the environment and human health and environmental effects on plant protection practices It features contributions by a distinguished group of authors from ten countries representing an array of disciplines They include plant protection scientists and officers economists agronomists ecologists environmental and public health scientists and government policymakers Over the course of eighteen chapters those experts share their insights into and analyses of an array of issues of vital concern to everyone with a professional interest in this important subject The adverse effects of pest control have become a subject of great concern worldwide and researchers and enlightened policymakers have at last begun to appreciate the impact of environmental factors on our ability to manage pest populations Moreover while issues such as pesticide toxicity have dominated the global conversation about pest management economic and societal considerations have been largely neglected Environmental Pest Management Challenges for Agronomists Ecologists Economists and Policymakers is the first work to provide in depth coverage of all of these pressing issues between the covers of one book Offers a unique multi dimensional perspective on the complex issues surrounding pest management activities and their effect on the environment and human health Addresses growing concerns about specific pest management strategies including the use of transgenic crops and biological controls Analyses the influence of global processes such as climate change biological invasions and shifts in consumer demand and ecosystem services and disservices on pest suppression efforts Explores public health concerns regarding biodiversity pesticide use and food safety Identifies key economic drivers of pest suppression research strategies and technologies Proposes new regulatory approaches to create sustainable and viable crop protection systems in the framework of agro environmental schemes Offering a timely and comprehensively unique treatment of pest management and its environmental impacts in a single inter disciplinary volume this book is a valuable resource for scientists in an array of disciplines as well as government officials and policymakers Also teachers of undergraduate and graduate level courses in a variety of fields are sure to find it a highly useful teaching resource

THE CREATIVE MINDSET: Food Security through Research and Innovation Al-anni A. Asgali ,Farshani A. Mañalas-Asgali, Alfradzkhani A. Mañalas ,2025-02-25 Food security stands as one of the most pressing challenges of our time a challenge that intertwines environmental economic and

social dimensions As we face an era marked by rapid technological advancements climate uncertainties and evolving global dynamics the need for innovative creative approaches to ensuring that every community has reliable access to safe and nutritious food has never been greater This book is an invitation to explore the multifaceted world of food security through a lens that celebrates creativity and ingenuity Beginning with a foundational overview we delve into what food security means on both global and local scales unveiling the intricate networks that connect our food systems As the chapters unfold you will discover how a creative mindset can transform traditional paradigms and unlock new solutions in food production distribution community engagement policy making education and beyond Throughout this journey we not only examine the challenges but also highlight inspiring case studies innovative practices and forward thinking strategies that have already begun to reshape our food landscape Whether you are a policymaker community leader educator or simply someone who cares deeply about the future of food this book offers insights and practical guidance to help cultivate resilient and dynamic food systems By merging theory with practice this work aims to empower readers to envision and contribute to a future where food security is not just an aspiration but a realized commitment to sustainability equity and creativity Let this book be a catalyst for discussion collaboration and action a call to harness the transformative power of innovation in the pursuit of a food secure world
