provides students with a toolbox of approaches for analyzing religion and popular culture. It encourages readers to think critically about the ways in which popular cultural practices and products especially those considered as forms of entertainment are laden with religious ideas, themes and values. The chapters feature lively and contemporary case study material and outline relevant theory and methods for analysis. Among the areas covered are religion and food, violence, music, television and videogames. Each entry is followed by a helpful summary, glossary, bibliography, discussion questions and suggestions for further reading/viewing. *Understanding Religion and Popular Culture* offers a valuable entry point into an exciting and rapidly evolving field of study.

Digital Media Criticism Anandam P. Kavoori, 2010. *Digital Media Criticism* is an introductory text about media criticism, the act of interpreting and making sense of a range of new media texts that we use and create on a daily basis, offering a critical language and a methodological template for interrogating and analyzing the complex texts of digital media. Individual chapters connect key methods of media criticism (genre, auteur, cultural, ideological and ethnographic) with digital culture. Case studies of social media, user-generated content, cell phones and video games are provided which include everything from downloading ring tones and making new Facebook friends to creating an avatar, texting and opening a window on RL (real life). Insightful and accessible, the book looks at the possibilities and limits of the digital age for us as creators, consumers and distributors of content. It will be useful to undergraduates studying media criticism, digital culture and communication and media literacy and is written to invite them into a conversation about the culture of the digital age.

Animated Worlds Suzanne Buchan, David Surman, Paul Ward, 2006. *Animated Worlds* is an edited anthology of papers originally presented at the eponymous conference held in 2003 at Farnham Castle, England.

Before the Crash Mark J. P. Wolf, 2012-06-15. Contributors examine the early days of video game history before the industry crash of 1983 that ended the medium's golden age. Following the first appearance of arcade video games in 1971 and home video game systems in 1972, the commercial video game market was exuberant with fast-paced innovation and profit. New games, gaming systems and technologies flooded into the market until around 1983 when sales of home game systems dropped, thousands of arcades closed and major video game makers suffered steep losses or left the market altogether. In *Before the Crash: Early Video Game History*, editor Mark J. P. Wolf assembles essays that examine the fleeting golden age of video games, an era sometimes overlooked for older games' lack of availability or their perceived primitiveness when compared to contemporary video games. In twelve chapters, contributors consider much of what was going on during the pre-crash era: arcade games, home game consoles, home computer games, handheld games and even early online games. The technologies of early video games are investigated as well as the cultural context of the early period from aesthetic, economic, industrial and legal perspectives.

Since the video game industry and culture got their start and found their form in this era these years shaped much of what video games would come to be This volume of early history then not only helps readers to understand the pre crash era but also reveals much about the present state of the industry Before the Crash will give readers a thorough overview of the early days of video games along with a sense of the optimism enthusiasm and excitement of those times Students and teachers of media studies will enjoy this compelling volume

Works and Days, 2004 *Seeing Perception* Silke Horstkotte, Karin Leonhard, 2007 What do we see when we see how do we perceive vision itself and how do we speak and write about seeing and perception The articles collected in this volume attempt to observe the constitution of perception be it of a visual field or visible objects but also of images which emerge in the mind e g that of the reader in the act of reading The act of vision is profoundly impure and seeing TM very much entails other modes of sense based perception such as listening touching feeling tasting or smelling Various modes of seeing can moreover be observed within literary texts or in music dreams memory or all kinds of bodily experiences like dance pain sexuality etc so that there cannot be any such thing as a clearly defined realm called visuality TM Moreover seer TM and seen TM are mutually permeable in any visual practice reflecting on the reciprocal relationship between the visuality of objects and the very act of looking which could be understood not only as a sensual experience but also as an interaction an intellectual performance and interpretation But if there exists this inseparable bond between object and spectator how can we distance ourselves from the act of looking and show seeing TM how is it possible to talk and write about seeing perception TM The impurity of the visual and the contextuality of all acts of looking constitutes a common thread running through the articles collected in this volume The ways in which images are perceived in Western culture are inextricably linked with verbal and textual structures and ways of thinking However the contributions in this volume are less concerned with the practical political implications of a visual culture which formed the backbone of visual studies research a few years ago and more with an adequate understanding of the various concepts and operations at work in theories of visual perception of seeing the gaze and of focalisation
